

PROSPER AWUNI

Cyber Security Engineer | CISSP | Microsoft Sentinel | Microsoft Defender | SSO | PKI | SC-200
Aligned

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of deep, hands-on experience deploying and operating Microsoft Sentinel, Microsoft Defender, Single Sign-On (SSO), and enterprise identity security controls at scale. At the University of the Arts, London, I have led the full implementation and ongoing management of the Microsoft Defender suite including Defender for Endpoint (MDE), Defender for Identity (MDI), and Microsoft 365 (M365) Defender across 8,000 users, alongside operating Microsoft Sentinel as the organisation's primary Security Information and Event Management (SIEM) platform. I bring strong knowledge of Public Key Infrastructure (PKI), Conditional Access, Multi-Factor Authentication (MFA), Privileged Access Management (PAM), and security automation using PowerShell and SOAR playbooks. I hold the CISSP certification and have practical alignment to Microsoft SC-200 competencies through extensive Sentinel and Defender operational experience. I am seeking a permanent hybrid Cyber Security Engineer position where I can apply my Microsoft security tooling expertise to protect a demanding enterprise environment.

CORE SKILLS AND TECHNICAL STACK

- **Microsoft Sentinel:** SIEM deployment and management, Kusto Query Language (KQL) analytics, custom detection rules, automated response playbooks, Log Analytics workspace management
- **Microsoft Defender Suite:** Defender for Endpoint (MDE), Defender for Identity (MDI), Microsoft 365 (M365) Defender, Defender for Cloud Apps, policy configuration, alert investigation
- **Single Sign-On (SSO) and Identity Management:** Azure Active Directory (Azure AD) / Entra ID, Conditional Access, SSO federated identity, Multi-Factor Authentication (MFA), user provisioning and lifecycle management
- **Public Key Infrastructure (PKI):** Certificate lifecycle management, digital certificates, encryption standards, PKI architecture principles
- **Privileged Access Management (PAM):** BeyondTrust PAM, least-privilege enforcement, privileged session management
- **Endpoint Detection and Response (EDR):** Microsoft Defender for Endpoint (MDE), CrowdStrike Falcon EDR
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel SOAR playbooks, PowerShell automation, Logic Apps integration
- **Endpoint and Device Management:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Email and Perimeter Security:** Mimecast email security, Check Point Harmony firewall
- **Scripting:** PowerShell, KQL
- **Frameworks:** NIST Cyber Security Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Own and operate Microsoft Sentinel as the enterprise Security Information and Event Management (SIEM) platform, developing Kusto Query Language (KQL) detection analytics, custom correlation rules, and Security Orchestration, Automation and Response (SOAR) playbooks to automate incident triage and response actions.
- Manage the Microsoft Defender suite including Defender for Endpoint (MDE), Defender for Identity (MDI), and Microsoft 365 (M365) Defender across 8,000 users, performing alert investigation, policy tuning, and

proactive threat hunting to maintain a strong detection posture.

- Design, implement, and maintain Azure Active Directory (Azure AD) / Entra ID Conditional Access policies, Single Sign-On (SSO) configurations, and Multi-Factor Authentication (MFA) controls to enforce identity security standards across the enterprise.
- Manage Public Key Infrastructure (PKI) and certificate lifecycle processes, ensuring digital certificates are issued, renewed, and revoked in line with organisational security policy and compliance requirements.
- Administer BeyondTrust Privileged Access Management (PAM) to control and audit access to privileged accounts and critical systems, enforcing least-privilege principles across the technology estate.
- Operate CrowdStrike Falcon (NG-SIEM, Endpoint Detection and Response (EDR), Prevent, Insight, Discover) for endpoint threat detection, alert triage, and proactive detection engineering.
- Lead vulnerability management using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), coordinating remediation of critical and high-severity findings with infrastructure and development teams.
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) to enforce device compliance and application security policies across managed endpoints.
- Automate security operational tasks using PowerShell scripting and SOAR playbooks, reducing manual effort in alert handling, user provisioning, and compliance reporting.
- Deliver incident response aligned to NIST 800-61, coordinating containment, eradication, recovery, and post-incident review across complex multi-vector incidents.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Operated the enterprise SIEM platform for daily event monitoring, log analysis, alert triage, and investigation of potential security incidents, developing custom detection content to improve threat coverage.
- Managed Azure Active Directory (Azure AD) identity and access management processes including user provisioning, access reviews, SSO configurations, and Multi-Factor Authentication (MFA) enforcement for the enterprise user population.
- Supported incident response activities, performing initial triage, coordinating containment actions, and documenting response findings aligned to established security procedures.
- Conducted vulnerability assessments using scanning tools across on-premises and cloud infrastructure, producing actionable remediation reports for both technical and management audiences.
- Maintained Microsoft Intune MDM and MAM device compliance policies, ensuring endpoints met organisational security baselines and configuration standards.
- Contributed to security awareness training programmes and phishing simulation campaigns to reduce risk from social engineering attacks across the institution.
- Supported the management of digital certificates and PKI processes, assisting with certificate requests, renewals, and revocations in line with organisational policy.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security and infrastructure engineering across the organisation's Software as a Service (SaaS) FinTech platform, supporting IT security controls, access management, and compliance requirements.
- Managed identity and access management processes and maintained system security configurations across on-premises and cloud-hosted infrastructure.
- Implemented endpoint security and monitoring solutions, supporting incident identification and resolution in collaboration with development and operations teams.

KEY ACHIEVEMENTS

- Delivered an enterprise-wide Microsoft Sentinel deployment, including development of Kusto Query Language (KQL) detection rules and SOAR automation playbooks, significantly improving threat detection speed and reducing manual alert handling overhead.
- Led the Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), and Microsoft 365 (M365) Defender rollout across 8,000 users, providing comprehensive endpoint and identity threat visibility from a single unified platform.

- Implemented Azure Active Directory (Azure AD) / Entra ID Conditional Access policies and Multi-Factor Authentication (MFA) enforcing Zero Trust identity principles across the enterprise, materially reducing identity-based attack risk.
- Deployed BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access control, eliminating uncontrolled privileged account exposure and supporting audit compliance requirements.
- Built a continuous vulnerability management programme using Pentera Breach and Attack Simulation (BAS) and Tenable.io, enabling proactive identification and remediation of security weaknesses before they could be exploited.
- Achieved and maintained Cyber Essentials Plus certification, demonstrating alignment to foundational security controls and providing assurance to stakeholders across the institution.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
