

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | CISSP | Mimecast | Entra ID | PAM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of hands-on experience managing Security Operations Centre (SOC) tooling, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR), firewalls, Multi-Factor Authentication (MFA) / Single Sign-On (SSO), Mobile Device Management (MDM) / Mobile Application Management (MAM), Privileged Access Management (PAM), and vulnerability management within complex enterprise environments. I am an expert in the CrowdStrike Falcon platform, having operated it as a senior engineer across NG-SIEM, EDR, Prevent, Insight, and Discover modules. I also bring strong experience with Mimecast email security gateways, Microsoft Intune, Entra Identity (formerly Azure Active Directory), and BeyondTrust PAM. I have a structured approach to incident response aligned to NIST 800-61 and the MITRE ATT&CK framework, and I am experienced managing vulnerability scans and remediation programmes. I am seeking a permanent hybrid Cyber Security Engineer role within a fast-paced financial services or regulated environment where I can make an immediate impact on security operations and controls management.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, NG-SIEM) - Expert level; Microsoft Defender for Endpoint (MDE)
- **Security Information and Event Management (SIEM) and SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), SOAR automation, alert triage and response
- **Email and Web Security Gateways:** Mimecast email security, anti-phishing and anti-malware gateway management
- **Firewalls and Network Security:** Check Point Harmony firewall, Intrusion Detection and Prevention Systems (IDS/IPS), network security policy management, perimeter security controls
- **Identity and Access Management (IAM) - MFA/SSO:** Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), group policy management
- **Privileged Access Management (PAM):** BeyondTrust PAM, least-privilege enforcement, privileged session monitoring
- **Mobile Device Management (MDM) and MAM:** Microsoft Intune MDM/MAM, device compliance policy management
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS), vulnerability scan management, remediation tracking, penetration test finding remediation
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK alignment, playbook development, post-incident review
- **Security Awareness:** Security awareness training delivery, phishing simulation campaigns
- **Scripting and Automation:** PowerShell, Kusto Query Language (KQL), SOAR playbook automation
- **Frameworks:** NIST Cyber Security Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Operate the CrowdStrike Falcon platform as the primary Endpoint Detection and Response (EDR) solution across the enterprise, managing NG-SIEM, Falcon Prevent, Insight, and Discover modules to deliver threat detection, alert triage, threat hunting, and proactive detection engineering.

- Manage Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms including CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, performing alert response, investigation, and automated playbook execution to reduce mean time to respond.
- Manage Mimecast email security gateway to enforce anti-phishing, anti-malware, and email data loss prevention policies, protecting users from email-borne threats and reducing the volume of malicious email reaching the enterprise.
- Administer Check Point Harmony firewall and network security controls, managing firewall policies, reviewing rule sets, and supporting network segmentation and perimeter security.
- Implement and maintain Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Conditional Access policies in Azure Active Directory (Azure AD) / Entra ID, enforcing strong identity controls across the 8,000-user environment.
- Manage BeyondTrust Privileged Access Management (PAM) to govern, monitor, and audit privileged access to critical systems and infrastructure, enforcing least-privilege principles and reducing exposure from compromised privileged accounts.
- Operate Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) to enforce device compliance and application security policies across managed endpoints.
- Manage the organisation's vulnerability management programme using Tenable.io, AppCheck, and Pentra Breach and Attack Simulation (BAS), performing regular vulnerability scans, prioritising critical findings, and coordinating remediation with infrastructure and application teams.
- Manage certificate lifecycle processes to maintain security of Intrusion Detection and Prevention Systems (IDS/IPS) and other security infrastructure, ensuring certificates are renewed and revoked in line with policy.
- Lead incident response from initial detection through containment, eradication, recovery, and post-incident review, aligned to NIST 800-61 and MITRE ATT&CK, with documentation of lessons learned and improvements to detection rules and response playbooks.
- Remediate penetration test findings and contribute to ad-hoc security improvement projects, working with infrastructure and development teams to close identified gaps.
- Deliver security awareness training and phishing simulation exercises to strengthen the organisation's human-layer defences.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed daily SIEM monitoring, event correlation, and alert triage, investigating security events and escalating confirmed or suspected incidents in line with established response procedures.
- Supported incident response operations, coordinating containment actions, gathering forensic evidence, and producing incident reports for technical and management stakeholders.
- Managed Azure Active Directory (Azure AD) identity and access management processes including user provisioning, access reviews, group policy management, and MFA/SSO enforcement for the enterprise user base.
- Conducted vulnerability assessment scans across on-premises and cloud infrastructure, tracking findings and supporting remediation prioritisation in line with risk ratings.
- Maintained Microsoft Intune MDM device compliance policies, ensuring managed endpoints met organisational security baselines and configuration standards.
- Operated and monitored endpoint security tools including EDR platforms, investigating alerts and escalating threats to the senior security team.
- Delivered security awareness training and phishing simulation campaigns to reduce social engineering risk across the institution.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security and infrastructure engineering across the organisation's Software as a Service (SaaS) and FinTech platform, supporting security controls, access management, and IT compliance requirements.
- Managed endpoint security, network infrastructure, and server environments, implementing security monitoring, access controls, and hardening measures.

- Supported incident identification, triage, and resolution, coordinating with development and operations teams to address security findings promptly.
- Maintained IT security quality standards, conducting periodic security reviews and reporting findings to management.

KEY ACHIEVEMENTS

- Expert-level management of the full CrowdStrike Falcon platform across NG-SIEM, Endpoint Detection and Response (EDR), Prevent, Insight, and Discover, providing comprehensive endpoint threat detection and response capability across the enterprise.
- Led SIEM/SOAR operations across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, developing automated alert triage and response playbooks that significantly reduced manual investigation workload for the security team.
- Managed Mimecast email security gateway, reducing successful phishing and malware delivery attempts through proactive policy tuning and monitoring of email threat intelligence feeds.
- Implemented BeyondTrust Privileged Access Management (PAM), eliminating uncontrolled privileged access and enabling full session monitoring and audit of privileged activity across the technology estate.
- Deployed Azure Active Directory (Azure AD) / Entra ID Conditional Access and Multi-Factor Authentication (MFA) across 8,000 users, substantially reducing identity-based attack risk across the enterprise.
- Built a Pentra Breach and Attack Simulation (BAS) programme alongside Tenable.io vulnerability scanning, providing a continuous and risk-prioritised view of the organisation's security posture.
- Remediated critical penetration test findings within agreed timescales, demonstrating the ability to translate test results into actionable security improvements and coordinate cross-functional remediation efforts.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
