

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike | Security Information and Event Management (SIEM) |
Endpoint Detection and Response (EDR)

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of hands-on experience securing enterprise environments at scale. I specialise in Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) using CrowdStrike Falcon, and the full lifecycle of security operations from threat detection through to incident response and remediation. At the University of the Arts London, I have led security operations across an 8,000-user estate, managing CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender, Mimecast, Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), BeyondTrust Privileged Access Management (PAM), and enterprise-wide vulnerability scanning programmes. I bring proven expertise in managing Web Application Firewall (WAF), Multi-Factor Authentication (MFA), Single Sign-On (SSO), Microsoft Entra ID and Azure Active Directory (Azure AD), and firewall platforms, and I am comfortable operating as a generalist security engineer within a small, high-performing team.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Next-Generation Security Information and Event Management (NG-SIEM), Prevent, Insight, Discover, Spotlight) - Expert level
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL), Splunk / Security Processing Language (SPL)
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender - 8,000-user deployment
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, MFA, SSO, Group Policy
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, Intune MDM/MAM
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Email and Web Security:** Mimecast email security platform
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Firewall and Network Security:** Check Point Harmony firewall, IDS/IPS, WAF/DDoS protection
- **Security Automation:** PowerShell scripting, SOAR automation, detection rule engineering
- **Frameworks:** National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF), NIST 800-61 Incident Response, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials+
- **Additional Tools:** Tanium, Microsoft Defender for Cloud Apps, MDM/MAM policy management

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL) | London, UK

- Lead the management and optimisation of CrowdStrike Falcon across all modules (Prevent, Insight, Discover, NG-SIEM, Spotlight), providing expert-level Endpoint Detection and Response (EDR) across the organisation's entire estate.
- Administer the Microsoft Sentinel Security Information and Event Management (SIEM) platform, authoring advanced KQL detection rules, threat hunting queries, and automated Security Orchestration, Automation and Response (SOAR) playbooks to reduce mean time to detect and respond.
- Manage the Microsoft Defender suite (MDE, MDI, M365 Defender) across 8,000 users, including policy configuration, alert triage, and advanced incident investigation using MITRE ATT&CK.

- Oversee Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access policies, MFA roll-out, and SSO integrations, ensuring identity and access management aligns with zero-trust principles.
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance and application policies across Windows, macOS, iOS, and Android endpoints.
- Manage BeyondTrust Privileged Access Management (PAM) platform, controlling and auditing privileged account access across the enterprise.
- Operate the Mimecast email security platform, including policy tuning, threat response, and security awareness campaign coordination.
- Drive the enterprise vulnerability management programme using Tenable.io, Nessus, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising remediation aligned to business risk.
- Lead cyber incident response activities in accordance with NIST 800-61, coordinating containment, eradication, and recovery across cross-functional teams.
- Deliver security awareness training and phishing simulation campaigns, reporting on engagement metrics to senior leadership.
- Manage security certificate lifecycle, ensuring timely renewal and deployment of digital certificates across web-facing and internal services.
- Collaborate with IT teams on WAF, IDS/IPS, and network security gateway configurations to protect perimeter and internal services.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL) | London, UK

- Deployed and matured the CrowdStrike Falcon EDR platform, establishing baseline detection policies, custom alert rules, and automated response workflows.
- Implemented Microsoft Sentinel as the organisation's primary SIEM, onboarding data connectors, building KQL analytics rules, and integrating SOAR playbooks to automate alert triage.
- Conducted daily alert triage from SIEM, EDR, and email security platforms, escalating confirmed incidents and producing post-incident reports with lessons learned.
- Managed Conditional Access policies and MFA configurations in Azure Active Directory (Azure AD) / Microsoft Entra ID, enforcing phishing-resistant authentication across the user base.
- Administered Mimecast for email threat detection, spam filtering, and business continuity, maintaining platform health and security policy alignment.
- Performed regular vulnerability assessments using Tenable.io and Nessus, tracking remediation progress and reporting to the security leadership team.
- Supported privileged access management processes using BeyondTrust, including account provisioning, session monitoring, and quarterly access reviews.
- Authored PowerShell automation scripts to streamline repetitive security operations tasks, including account lifecycle management and compliance reporting.
- Contributed to the development of security policies and procedures aligned with ISO 27001 and Cyber Essentials+ frameworks.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / Financial Technology) | London, UK

- Provided security and infrastructure engineering support across the company's Software as a Service (SaaS) and Financial Technology (FinTech) platform, including endpoint security configuration and network access controls.
- Supported identity and access management (IAM), including user provisioning, de-provisioning, and access reviews across cloud and on-premise systems.
- Assisted with vulnerability scanning and patch management activities, identifying and tracking remediation of identified risks.
- Maintained and monitored security tooling, escalating alerts and supporting incident response activities.
- Contributed to IT quality assurance processes and infrastructure improvement initiatives, ensuring compliance with internal security standards.

KEY ACHIEVEMENTS

- Successfully deployed and operationalised CrowdStrike Falcon EDR, NG-SIEM, and Insight modules across UAL's 8,000-user estate, significantly improving threat visibility and detection capability.
- Reduced mean time to detect (MTTD) and mean time to respond (MTTR) by engineering automated SOAR playbooks in Microsoft Sentinel, cutting manual triage workload by over 40%.
- Implemented enterprise-wide Privileged Access Management (PAM) using BeyondTrust, eliminating standing administrative privileges and achieving compliance with CIS Controls.
- Led the organisation's Cyber Essentials+ accreditation effort, achieving certification and demonstrating alignment with UK government security requirements.
- Delivered Breach and Attack Simulation (BAS) using Pentera, enabling proactive identification of detection gaps and demonstrating security control effectiveness to senior leadership.
- Deployed and managed Mimecast across 8,000 users, reducing successful phishing attempts and improving email security posture across the organisation.
- Authored a suite of PowerShell automation scripts for security operations, reducing manual effort and improving consistency in incident response and compliance reporting.

EDUCATION

- **Master of Science (M.Sc.), Environmental and Resource Engineering**
- **Bachelor of Science (B.Sc.), Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
