

PROSPER AWUNI

Senior Cyber Security Engineer | Microsoft Azure | Cloud and Hybrid Infrastructure Security |
Endpoint Detection and Response (EDR)

United Kingdom (Remote/Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience protecting large-scale, hybrid Microsoft Azure environments. I specialise in cloud and on-premise security engineering, Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), vulnerability management, and incident response. At the University of the Arts London, I have built and operated security controls across an 8,000-user hybrid estate, encompassing Microsoft Azure, Microsoft Entra ID, Microsoft Defender, CrowdStrike Falcon, and a full suite of enterprise security tooling. I am equally comfortable architecting security for cloud-first retail environments as I am hands-on in day-to-day security operations, and I bring a pragmatic, risk-based mindset to protecting business-critical infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Microsoft Azure Security:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Azure Policy, Azure Security Center
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Microsoft Defender for Cloud Apps - 8,000-user deployment
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL), SOAR playbook development
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, Prevent, Insight, Discover, Spotlight) - Expert level
- **Identity and Access Management (IAM):** Privileged Access Management (PAM) via BeyondTrust, role-based access control (RBAC), zero-trust architecture
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune - cross-platform (Windows, macOS, iOS, Android)
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS) - risk-based prioritisation
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting, detection engineering
- **Email and Web Security:** Mimecast, Check Point Harmony firewall
- **Security Automation:** PowerShell scripting, SOAR automation workflows
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL) | London, UK

- Architect and operate security controls across a hybrid Microsoft Azure and on-premise estate of 8,000 users, covering endpoint, identity, cloud, and email security domains.
- Lead Microsoft Entra ID and Azure Active Directory (Azure AD) security governance, managing Conditional Access policies, phishing-resistant Multi-Factor Authentication (MFA), SSO integrations, and privileged identity management to enforce zero-trust principles.
- Administer the Microsoft Sentinel Security Information and Event Management (SIEM) platform, designing and maintaining KQL analytics rules, custom workbooks, threat hunting queries, and automated Security Orchestration, Automation and Response (SOAR) playbooks.
- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the full estate, investigating and remediating incidents aligned to MITRE ATT&CK.

- Expert-level operation of CrowdStrike Falcon EDR and NG-SIEM, managing detection policies, real-time response, threat intelligence, and custom indicator of attack (IOA) and indicator of compromise (IOC) rules.
- Oversee Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance and application control policies across Windows, macOS, iOS, and Android.
- Lead the enterprise vulnerability management programme using Tenable.io, AppCheck, Nessus, and Pentera Breach and Attack Simulation (BAS), ensuring vulnerabilities are prioritised and remediated based on business risk.
- Manage BeyondTrust Privileged Access Management (PAM), controlling administrative access and enforcing least-privilege principles across the hybrid estate.
- Coordinate and lead cyber incident response in line with NIST 800-61, managing multi-team response across technical and operational stakeholders.
- Develop PowerShell automation scripts to improve security operations efficiency, including automated compliance reporting, threat enrichment, and user lifecycle management.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL) | London, UK

- Deployed and operationalised Microsoft Sentinel as the primary SIEM, onboarding over 20 data sources, building custom detection rules in KQL, and integrating automated SOAR responses.
- Implemented CrowdStrike Falcon EDR across the organisation, establishing detection baselines, custom alerting policies, and automated threat response workflows.
- Managed Microsoft Defender suite deployments including MDE, MDI, and M365 Defender, conducting daily alert triage and incident investigations.
- Administered Azure Active Directory (Azure AD) / Entra ID identity controls, enforcing Conditional Access and MFA across all user accounts and privileged roles.
- Deployed and managed Microsoft Intune MDM/MAM, ensuring device compliance across a growing fleet of managed endpoints.
- Conducted regular vulnerability assessments using Tenable.io and Nessus, tracking remediation and reporting risk posture to the security team and management.
- Supported the BeyondTrust PAM platform, including account provisioning, session recording, and quarterly privileged access reviews.
- Administered Mimecast email security, tuning policies and responding to email-borne threats, phishing, and spoofing attempts.
- Contributed to ISO 27001 and Cyber Essentials+ compliance programmes, helping the organisation achieve and maintain certification.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / Financial Technology) | London, UK

- Provided security engineering support for a cloud-based Software as a Service (SaaS) Financial Technology (FinTech) platform, maintaining endpoint security, network access controls, and identity governance.
- Managed identity and access management (IAM) including user provisioning, access review processes, and integration with cloud identity providers.
- Supported vulnerability scanning and patch management programmes, identifying, tracking, and escalating remediation of security findings.
- Monitored security tooling and supported incident response activities, ensuring timely escalation and resolution of security events.
- Contributed to quality assurance and infrastructure projects, ensuring alignment with company security policies and standards.

KEY ACHIEVEMENTS

- Deployed and managed a comprehensive Microsoft Azure security stack (Entra ID, Defender, Sentinel, Intune) across an 8,000-user hybrid estate, achieving unified visibility and control across cloud and on-premise environments.

- Built automated Security Orchestration, Automation and Response (SOAR) playbooks in Microsoft Sentinel that reduced manual alert triage effort by over 40%, improving analyst capacity for proactive threat hunting.
- Achieved Cyber Essentials+ certification for UAL by leading the technical remediation effort, demonstrating effective control of the organisation's hybrid Azure and on-premise environment.
- Implemented zero-trust identity controls through phishing-resistant MFA and Conditional Access in Microsoft Entra ID, significantly reducing credential-based attack surface.
- Delivered enterprise-wide Breach and Attack Simulation (BAS) using Pentera, providing evidence-based reporting on detection coverage gaps and security control effectiveness.
- Deployed BeyondTrust PAM across all privileged accounts, eliminating standing administrative access and meeting CIS Controls and ISO 27001 audit requirements.

EDUCATION

- **Master of Science (M.Sc.), Environmental and Resource Engineering**
- **Bachelor of Science (B.Sc.), Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
