

PROSPER AWUNI

Senior Cyber Security Engineer

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience designing, deploying, and operating enterprise security platforms across hybrid cloud and on-premises environments. I have deep, hands-on expertise with CrowdStrike Falcon — including Endpoint Detection and Response (EDR), Next-Generation Security Information and Event Management (NG-SIEM), Falcon Prevent, Insight, and Discover — and have led the deployment and ongoing management of these capabilities at scale. I have extensive experience managing Security Information and Event Management (SIEM) and Security Orchestration, Automation, and Response (SOAR) platforms, triaging and investigating security alerts, leading incident response, and driving vulnerability management programmes. I am equally comfortable managing Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) controls, email security gateways, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) solutions, and Mobile Device Management (MDM) and Mobile Application Management (MAM) policies. I bring a proven track record of protecting large, complex organisations and am looking to apply my expertise in a forward-thinking financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover) — expert-level deployment and management
- **SIEM / SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel; SOAR automation, playbook authoring, alert triage and tuning
- **Email Security:** Mimecast — policy management, threat protection, impersonation controls
- **Identity and Access Management:** Microsoft Azure Active Directory (Azure AD) / Entra ID, Conditional Access, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **Endpoint Management:** Microsoft Intune — MDM and MAM policy enforcement, compliance management
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS); Nessus; risk-based prioritisation and remediation tracking
- **Incident Response:** NIST 800-61 lifecycle; MITRE ATT&CK framework; senior escalation lead; playbook authoring and execution
- **Firewall / Network Security:** Check Point Harmony; network security architecture; WAF and DDoS mitigation concepts
- **Scripting / Automation:** PowerShell, Kusto Query Language (KQL)
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, JISC
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender — 8,000-user deployment

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Operate as the senior security platform engineer responsible for the CrowdStrike Falcon EDR and NG-SIEM environment, managing policies, detections, and day-to-day platform health across all endpoints and servers
- Lead SIEM and SOAR operations: build and tune detection rules, author automated response playbooks, and perform advanced alert triage across endpoint, cloud, and email telemetry
- Serve as the senior escalation lead for security incidents, conducting end-to-end incident response in line with the NIST 800-61 framework and MITRE ATT&CK taxonomy

- Manage identity security controls across Azure Active Directory (Entra ID), including Conditional Access policies, MFA enforcement, and SSO configuration
- Oversee email security via Mimecast — configuring anti-phishing, impersonation protection, and data loss prevention policies
- Drive vulnerability management using Tenable.io, AppCheck, and Pentera BAS; track remediation across hybrid infrastructure and report risk to senior stakeholders
- Administer Microsoft Intune MDM and MAM policies to enforce endpoint compliance across a mixed-device fleet
- Collaborate with infrastructure teams to integrate security controls across hybrid cloud and on-premises environments, ensuring consistent security posture
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity *March 2022 – March 2025*

- Deployed and configured the CrowdStrike Falcon platform across the university estate, building a hybrid Security Operations Centre (SOC) capability
- Investigated SIEM and EDR alerts, performed root-cause analysis, and escalated critical incidents in accordance with defined playbooks
- Configured and managed Mimecast email security controls, reducing phishing and Business Email Compromise (BEC) risk
- Administered Azure AD and Conditional Access policies, supporting MFA rollout and SSO integration across enterprise applications
- Managed Microsoft Intune MDM and MAM policies, enforcing device compliance for 8,000 users across university-owned and Bring Your Own Device (BYOD) fleets
- Supported vulnerability scanning and remediation activities using Tenable.io and Nessus, producing risk reports for the CISO and technical teams
- Developed and maintained incident response playbooks based on NIST 800-61 and MITRE ATT&CK threat intelligence

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure *February 2021 – March 2022*

- Managed endpoint security tooling, identity controls, and infrastructure security across a SaaS FinTech environment
- Deployed and maintained MDM and security gateway solutions, ensuring device and application compliance
- Monitored security alerts and performed first-line triage, escalating incidents to senior engineers as required
- Supported ISO 27001 compliance activities including risk assessments, access reviews, and policy documentation
- Conducted vulnerability assessments and coordinated remediation with infrastructure and development teams

KEY ACHIEVEMENTS

- Led the full deployment of CrowdStrike Falcon EDR and NG-SIEM across a complex hybrid university estate, establishing a mature SOC capability from the ground up
- Authored and operationalised a comprehensive library of SOAR playbooks, reducing mean time to respond to critical incidents by automating initial triage and containment steps
- Drove Cyber Essentials Plus certification by remediating vulnerability findings and hardening endpoint and identity controls
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, improving visibility into endpoint and identity-based threats
- Reduced phishing incident volume by enhancing Mimecast email security policies and delivering targeted user awareness campaigns

- Delivered risk-based vulnerability management programme using Pentera BAS and Tenable.io, enabling prioritised remediation aligned to business risk appetite

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
