

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | IAM | Vulnerability Management | PAM
United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience deploying, managing, and optimising enterprise security tooling across complex hybrid environments. I hold expert-level proficiency with CrowdStrike Falcon Endpoint Detection and Response (EDR), and have built and managed Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms including Microsoft Sentinel and CrowdStrike NG-SIEM. I have direct experience managing Multi-Factor Authentication (MFA) and Single Sign-On (SSO) solutions, Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, Privileged Access Management (PAM) via BeyondTrust, and email security through Mimecast across large-scale enterprise environments. I bring proven expertise in vulnerability scanning and remediation, firewall management, Intrusion Detection and Prevention System (IDS/IPS) operations, incident response, and security awareness training. Holding the Certified Information Systems Security Professional (CISSP) certification, I am ready to join a focused security team and materially strengthen the security posture of a fast-paced financial services organisation.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, NG-SIEM) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **SIEM and SOAR:** Microsoft Sentinel (workspace design, data connectors, KQL analytics rules, playbooks, workbooks); CrowdStrike NG-SIEM; Splunk/SPL; alert triage and detection engineering
- **Identity and Access Management (IAM):** Microsoft Azure Active Directory (Azure AD) / Entra ID; Conditional Access policies; MFA and SSO; Privileged Access Management (PAM) via BeyondTrust
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM; Tanium; CrowdStrike Falcon Prevent
- **Email and Web Security:** Mimecast; WAF/DDoS protection; web and email security gateway administration
- **Vulnerability Management:** Tenable.io; Nessus; AppCheck; Pentera Breach and Attack Simulation (BAS); penetration test finding remediation
- **Firewall and Network Security:** Check Point Harmony; IDS/IPS management; network segmentation
- **Incident Response and Threat Hunting:** NIST 800-61 IR lifecycle; MITRE ATT&CK framework; senior escalation lead; playbook authoring
- **Scripting and Automation:** PowerShell; SOAR automation workflows; KQL
- **Frameworks and Compliance:** NIST Cyber Security Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; JISC

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Deploy, manage, and optimise **CrowdStrike Falcon EDR** (Prevent, Insight, Discover, NG-SIEM) across the enterprise, acting as the primary SME and escalation point for all CrowdStrike-related incidents and policy decisions.
- Administer and mature **SIEM/SOAR** operations using Microsoft Sentinel; design data connectors, write KQL-based analytics rules, build automated response playbooks, and maintain security workbooks for stakeholder reporting.
- Manage **WAF, email security gateways, and Mimecast** configurations to protect against web-based and email-borne threats, including phishing, malware, and DDoS-class attacks.
- Oversee **MFA/SSO, MDM/MAM, and PAM** through Microsoft Entra ID Conditional Access, Intune device management, and BeyondTrust Privileged Access Management; enforce least-privilege across the estate.

- Lead vulnerability scanning, prioritisation, and remediation cycles using **Tenable.io, Nessus, AppCheck, and Pentra BAS**; track and close findings through to resolution including penetration test remediation.
- Serve as **senior incident response lead**; triage high-severity alerts, contain and eradicate threats, conduct post-incident reviews, and maintain IR playbooks aligned to NIST 800-61.
- Deliver targeted **security awareness training** campaigns and phishing simulation exercises across the organisation.
- Manage **security certificates** lifecycle and IDS/IPS rule sets to maintain visibility and reduce exposure.
- Automate repetitive security tasks using **PowerShell scripting and SOAR**, reducing mean time to respond (MTTR) and analyst workload.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Led the deployment and rollout of **Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender** across an estate of approximately 8,000 users.
- Performed continuous **alert triage, threat hunting, and EDR telemetry analysis** using CrowdStrike Falcon Insight and Microsoft Sentinel, escalating confirmed incidents through the IR process.
- Managed **Azure Active Directory (Azure AD) / Entra ID** identity lifecycle, enforcing Conditional Access, MFA, and SSO policies aligned to Zero Trust principles.
- Conducted **vulnerability scanning and remediation** using Tenable.io and AppCheck; tracked open findings and provided management reporting on remediation status.
- Developed and maintained **KQL detection rules and SOAR playbooks** in Microsoft Sentinel to improve signal fidelity and automate response actions.
- Managed **Intune MDM/MAM** policies to enforce device compliance and application management across Windows, iOS, and Android endpoints.
- Supported **Cyber Essentials Plus and ISO 27001** audit activities, providing evidence and contributing to policy and control documentation.
- Administered **Check Point Harmony firewall** rules and IDS/IPS policies; maintained network access controls and reviewed firewall logs for anomalous activity.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Maintained security controls across a cloud-first SaaS/FinTech environment; implemented and monitored endpoint protection, access controls, and email security gateway policies.
- Conducted vulnerability assessments and remediated findings in line with internal security standards; supported penetration test scoping and remediation tracking.
- Managed **Azure AD** identity and access provisioning, MFA configuration, and SSO integrations for staff and third-party vendor accounts.
- Developed and enforced **security policies, procedures, and standards** to align the organisation with industry frameworks including ISO 27001 and NIST CSF.
- Supported **infrastructure and cloud** operations including network administration, server hardening, patch management, and backup verification.

KEY ACHIEVEMENTS

- Deployed and fully operationalised **CrowdStrike Falcon EDR** across the UAL enterprise, building a hybrid Security Operations Centre (SOC) capability and reducing mean time to detect (MTTD) through behavioural analytics and automated SOAR responses.
- Designed and implemented a **Microsoft Sentinel SIEM workspace** including custom KQL analytics rules, SOAR playbooks, and data connector integrations; improved detection coverage across cloud and on-premises environments.
- Led **Microsoft Defender rollout (MDE, MDI, M365 Defender)** across 8,000 users with zero service disruption; established baseline detection and response capabilities for the organisation.

- Reduced alert fatigue by over 40% by tuning **CrowdStrike Falcon policies and SIEM correlation rules**, focusing analyst effort on high-fidelity, actionable alerts.
- Delivered successful **Cyber Essentials Plus and ISO 27001** certification support, demonstrating robust security controls across endpoint, identity, and network layers.
- Automated security certificate renewals and MFA policy enforcement using **PowerShell scripts**, eliminating manual processes and reducing the risk of expired credentials.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
