

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Endpoint Detection and Response | Incident Response

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of experience delivering robust, hands-on security across enterprise IT environments. I have expert-level proficiency with CrowdStrike Falcon, covering Endpoint Detection and Response (EDR), Next-Generation Security Information and Event Management (NG-SIEM), Prevent, Insight, and Discover modules, which I have deployed and managed at scale. I have extensive experience managing Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, including Microsoft Sentinel with Kusto Query Language (KQL), alongside day-to-day alert triage, threat hunting, and incident response aligned to NIST 800-61 and the MITRE ATT&CK framework. I am experienced in managing Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection controls, email security gateways including Mimecast, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) technologies, Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, Privileged Access Management (PAM) with BeyondTrust, and vulnerability scanning and remediation using Tenable.io, AppCheck, and Nessus. I am comfortable working in a small, focused security team where I can operate across the full security stack and contribute immediately.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - Expert level deployment, policy management, and threat hunting
- **SIEM/SOAR:** Microsoft Sentinel (workspace design, analytics rules, playbooks, workbooks, KQL), CrowdStrike NG-SIEM; alert triage and response
- **Email and Web Security:** Mimecast (email security gateway); WAF/DDoS protection management
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA/SSO; Group Policy
- **MDM/MAM:** Microsoft Intune device management and mobile application management
- **Privileged Access Management (PAM):** BeyondTrust PAM implementation and administration
- **Vulnerability Management:** Tenable.io, AppCheck, Pentra Breach and Attack Simulation (BAS), Nessus; penetration test finding remediation
- **Firewall and Network Security:** Check Point Harmony; IDS/IPS management; security certificate lifecycle management
- **Incident Response:** Senior escalation lead; playbook authoring; NIST 800-61 and MITRE ATT&CK aligned
- **Microsoft Defender Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (8,000-user deployment)
- **Automation and Scripting:** PowerShell; SOAR playbook automation
- **Security Awareness:** Security awareness training delivery and programme management
- **Compliance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, JISC

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Own end-to-end management of **CrowdStrike Falcon** (EDR, Prevent, NG-SIEM, Insight, Discover) across the organisation, including policy configuration, alert triage, detection tuning, and proactive threat hunting using CrowdStrike's query language and MITRE ATT&CK-mapped TTPs.

- Administer **SIEM/SOAR** operations via Microsoft Sentinel: design and maintain analytics rules, data connectors, workbooks, and automated playbooks to reduce mean time to detect and respond across a hybrid cloud and on-premises environment.
- Serve as senior escalation lead for **security incident response**, leading investigations end-to-end in line with NIST 800-61, coordinating containment, eradication, and post-incident reviews.
- Manage **Mimecast** email security gateway, including policy configuration, anti-phishing controls, and security awareness simulation campaigns.
- Administer **Microsoft Intune** MDM/MAM policies for mobile devices and applications, enforcing Conditional Access and compliance baselines across an 8,000-user estate.
- Manage **BeyondTrust PAM** solution: onboarding privileged accounts, enforcing least-privilege access, session monitoring, and credential vaulting.
- Oversee **vulnerability management** programme using Tenable.io, AppCheck, and Pentera BAS; track remediation of findings from internal scans and third-party penetration tests to closure.
- Manage **Microsoft Entra ID** (formerly Azure Active Directory), Conditional Access policies, MFA, and SSO integrations across the organisation.
- Administer **Check Point Harmony** next-generation firewall, IDS/IPS rules, and security certificate lifecycle management.
- Deliver **security awareness training** across staff populations; author and maintain incident response playbooks and SOC runbooks.
- Apply frameworks including NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, and JISC to assess and improve the organisation's security posture.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity *March 2022 – March 2025*

- Performed Tier 2/3 SOC analyst duties: alert triage, investigation, and escalation across SIEM and EDR platforms, including CrowdStrike Falcon and Microsoft Sentinel.
- Supported management of Microsoft Entra ID, Group Policy, MFA, and Conditional Access for a multi-site user base.
- Conducted vulnerability scanning using Nessus and AppCheck; tracked and supported remediation of identified risks with asset owners.
- Managed **Mimecast** email security controls including anti-spam, anti-phishing, and URL protection policies.
- Administered Microsoft Intune MDM/MAM policies; supported Conditional Access policy rollout.
- Responded to security incidents including phishing, malware, and account compromise events; authored post-incident reports and lessons-learned documentation.
- Contributed to development of SIEM detection rules and SOAR playbook workflows to improve automated response capability.
- Delivered security awareness training sessions and phishing simulation exercises to staff across the university.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure *February 2021 – March 2022*

- Implemented and maintained security controls across a SaaS/FinTech cloud and on-premises infrastructure, supporting compliance with ISO 27001 and industry security standards.
- Managed endpoint security tooling, patch management, and vulnerability remediation across the corporate estate.
- Administered identity and access management controls, enforcing least-privilege principles and MFA across internal systems.
- Supported IT infrastructure operations including network security, firewall management, and monitoring tooling in a fast-paced FinTech environment.

- Contributed to internal quality processes and security documentation including policies, procedures, and risk assessments.

KEY ACHIEVEMENTS

- Deployed and operationalised **CrowdStrike Falcon** NG-SIEM and EDR across a complex hybrid environment, building a hybrid Security Operations Centre (SOC) capability from the ground up.
- Led **Microsoft Defender** (MDE, MDI, M365) deployment across an 8,000-user estate, significantly improving endpoint visibility and reducing dwell time for security incidents.
- Designed and implemented **Microsoft Sentinel** workspace architecture, including custom KQL analytics rules, automated SOAR playbooks, and executive-level workbooks for security reporting.
- Achieved and maintained **Cyber Essentials Plus** certification, coordinating technical evidence across multiple control domains including patching, access control, and malware protection.
- Implemented **BeyondTrust PAM** solution, eliminating standing privileged access and enforcing just-in-time access for administrative accounts.
- Led vulnerability management programme delivering measurable reduction in critical and high-severity findings through structured remediation tracking and stakeholder engagement.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
