

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR) | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience protecting enterprise environments through hands-on management of Security Information and Event Management (SIEM), Security Orchestration Automation and Response (SOAR), and Endpoint Detection and Response (EDR) platforms. I have deep expertise in CrowdStrike Falcon across the full suite, including Next-Generation SIEM (NG-SIEM), Prevent, Insight, and Discover, and have led the deployment of Microsoft Defender across an 8,000-user estate. I am skilled in managing web and email security gateways including Mimecast, administering Privileged Access Management (PAM) via BeyondTrust, and delivering vulnerability management programmes using Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus. I bring extensive experience with Identity and Access Management (IAM) through Microsoft Entra Identity (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO), as well as Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune. I thrive in fast-paced security teams and bring strong communication skills alongside a methodical, risk-focused approach to protecting critical infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) and SIEM/SOAR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Microsoft Sentinel, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Email and Web Security Gateways:** Mimecast email security gateway, web filtering and content inspection platforms
- **Identity and Access Management (IAM):** Microsoft Entra Identity / Azure Active Directory (AD), Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM, endpoint policy enforcement
- **Privileged Access Management (PAM):** BeyondTrust PAM, privileged session management, least-privilege enforcement
- **Vulnerability Management:** Pentera BAS, Tenable.io, AppCheck, Nessus; vulnerability scanning, prioritisation, and remediation tracking
- **Firewall and Network Security:** Check Point Harmony, Intrusion Detection and Prevention Systems (IDS/IPS), Web Application Firewall (WAF), DDoS mitigation controls
- **Scripting and Automation:** PowerShell, SOAR playbook development, KQL (Kusto Query Language)
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), NIST 800-61 Incident Response, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+, Google IT Support Professional

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) | Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Own and operate the CrowdStrike Falcon platform end-to-end, including NG-SIEM, EDR, Prevent, Insight, and Discover modules, performing alert triage, SIEM/SOAR/EDR alert response, and proactive threat hunting across the enterprise estate.
- Manage and optimise the Mimecast email security gateway, enforcing email filtering, anti-phishing, and data-loss prevention policies to protect against inbound and outbound threats.
- Administer Microsoft Intune MDM/MAM policies governing mobile device enrolment, application management, and compliance enforcement across staff and student devices.

- Lead vulnerability scanning and remediation programmes using Pentera BAS, Tenable.io, AppCheck, and Nessus; track remediation progress and report critical findings to the IT Security Officer.
- Administer BeyondTrust Privileged Access Management (PAM), eliminating standing administrator accounts and enforcing just-in-time privilege across Windows and Linux endpoints.
- Manage Microsoft Entra Identity (Azure AD) Conditional Access policies, MFA enforcement, and SSO configurations to strengthen IAM posture across the organisation.
- Manage and maintain Check Point Harmony endpoint firewall policies, IDS/IPS rulesets, and network security controls.
- Maintain and manage digital security certificates, coordinating renewals and replacements to ensure continued service availability and encryption integrity.
- Develop and deliver security awareness training and phishing simulation campaigns, driving measurable reductions in staff susceptibility rates.
- Remediate penetration testing findings identified by third-party assessors, coordinating cross-team remediation plans and tracking closure through to verification.
- Develop KQL-based analytics rules in Microsoft Sentinel and contribute to SOAR playbook automation via PowerShell scripting, reducing mean time to respond (MTTR) to incidents.
- Support incident response activities aligned to NIST 800-61 and MITRE ATT&CK, performing root-cause analysis, containment, eradication, and post-incident review.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts London (UAL) | Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Performed day-to-day SIEM alert triage and security event monitoring, investigating and escalating incidents in line with defined response playbooks.
- Administered Azure Active Directory / Entra Identity IAM functions including user provisioning, access reviews, MFA enrolment, and SSO integration.
- Supported vulnerability assessment cycles using Nessus and AppCheck, coordinating with system owners to remediate identified weaknesses within agreed service level agreements (SLAs).
- Contributed to detection engineering by developing and tuning SIEM correlation rules and alerts to reduce false positives and improve signal fidelity.
- Maintained endpoint security policies and MDM/MAM configurations, ensuring devices met organisational compliance baselines.
- Supported PAM operations and assisted in the implementation and onboarding of BeyondTrust across privileged user populations.
- Led and supported internal security awareness initiatives, including phishing simulations and training programmes targeted at reducing human risk.
- Assisted with firewall rule reviews, IDS/IPS tuning, and network security control assessments to maintain a hardened perimeter.

HICX Solutions Ltd (SaaS/FinTech) | IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security engineering and infrastructure hardening across a Software as a Service (SaaS)/FinTech cloud environment, implementing endpoint security controls, identity management, and network security measures.
- Managed endpoint protection platforms, MFA enrolment, and access control policies across the organisation, aligning controls to CIS benchmarks and company security policies.
- Coordinated vulnerability scanning activities and tracked remediation of identified weaknesses across cloud and on-premises infrastructure.
- Supported quality assurance processes and contributed to security documentation, policy development, and compliance reporting.

KEY ACHIEVEMENTS

- Led the full deployment and operationalisation of Microsoft Defender for Endpoint, Defender for Identity, and Microsoft 365 Defender across an 8,000-user estate at UAL, significantly reducing mean time to detect (MTTD) and mean time to respond (MTTR) to security incidents.
- Built and tuned CrowdStrike Falcon NG-SIEM detection content and custom correlation rules, reducing false positive alert volume and improving analyst efficiency across the Security Operations Centre (SOC) function.
- Designed and delivered the BeyondTrust PAM implementation at UAL, eliminating standing privileged credentials and achieving least-privilege access across server and application infrastructure.
- Developed an automated SOAR incident response pipeline using PowerShell and Microsoft Sentinel playbooks, cutting manual analyst handling time for high-volume alert categories by a significant margin.
- Delivered a comprehensive vulnerability management programme using Pentera BAS, Tenable.io, AppCheck, and Nessus, achieving systematic identification and prioritised remediation of critical and high-severity findings.
- Implemented Entra Identity Conditional Access policies and MFA rollout across the organisation, strengthening IAM posture and reducing identity-based attack surface.

EDUCATION

- Master of Science (M.Sc.), Environmental and Resource Engineering
- Bachelor of Science (B.Sc.), Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
