

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Endpoint Protection | Identity Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of experience implementing and maintaining robust security across complex enterprise infrastructure. I have deep hands-on expertise with CrowdStrike Falcon Endpoint Detection and Response (EDR) and have managed Security Information and Event Management (SIEM), Security Orchestration Automation and Response (SOAR), and EDR alert response at scale for large enterprise environments. I bring proven skills in Identity and Access Management (IAM) including Microsoft Entra ID (formerly Azure Active Directory), Multifactor Authentication (MFA), and Single Sign-On (SSO), as well as Mobile Device Management (MDM) and Mobile Application Management (MAM). My background also covers Privileged Access Management (PAM), web and email security gateways including Mimecast, firewall administration, Intrusion Detection and Prevention Systems (IDS/IPS), vulnerability scanning and remediation, and delivering security awareness training. I am comfortable working within focused security teams, reporting to senior security leadership, and driving the remediation of penetration testing findings and ad-hoc security improvement projects.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation SIEM)
- **SIEM/SOAR:** Microsoft Sentinel, KQL (Kusto Query Language), SOAR alert response and triage, automated playbooks
- **Endpoint and Email Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Mimecast email security gateway
- **Identity and Access Management:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, MFA, SSO, Group Policy
- **MDM/MAM:** Microsoft Intune device enrolment, MDM and MAM policy configuration
- **Privileged Access Management:** BeyondTrust PAM, privileged session recording and least-privilege enforcement
- **Firewalls and Network Security:** Check Point Harmony firewall, IDS/IPS rulesets, WAF/DDoS awareness
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Scripting and Automation:** PowerShell scripting for SOAR workflows and remediation automation
- **Frameworks:** NIST CSF, NIST 800-61 Incident Response, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) -- Senior Cyber Security Analyst / Engineer *March 2025 -- Present*

- Administered CrowdStrike Falcon EDR across the enterprise, managing Prevent, Insight, Discover, and Next-Generation SIEM (NG-SIEM) modules to deliver real-time endpoint visibility and accelerated SIEM/SOAR/EDR alert response.
- Managed Mimecast email security gateway, configuring anti-phishing, anti-malware, and impersonation protection policies to reduce exposure to web and email-borne threats and Business Email Compromise (BEC).
- Administered BeyondTrust Privileged Access Management (PAM), enforcing least-privilege access controls, auditing privileged sessions, and managing service account credentials across IT infrastructure.
- Configured and maintained Microsoft Intune MDM and MAM policies for Windows, macOS, iOS, and Android devices, ensuring compliant device enrolment, encryption, and application control across the estate.
- Managed Microsoft Entra ID and Azure AD Conditional Access policies, MFA configurations, and SSO integrations, strengthening identity security for more than 8,000 users across the organisation.

- Administered Check Point Harmony firewall, reviewing IDS/IPS alerts, tuning rulesets, and coordinating with network teams to block malicious traffic and prevent intrusion attempts.
- Led SIEM alert triage and incident response using Microsoft Sentinel, writing KQL detection rules and hunting queries to identify and contain threats in line with NIST 800-61 incident response procedures.
- Delivered a structured vulnerability management programme using Tenable.io, Nessus, and AppCheck, prioritising findings by risk severity and driving timely remediation across IT and infrastructure teams.
- Coordinated penetration testing engagements, tracked findings through to remediation closure, and produced management-level reporting on vulnerability posture and risk reduction.
- Delivered security awareness training to non-technical staff, reducing susceptibility to phishing and social engineering attacks across the organisation.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL) -- Cyber Security Analyst, Cyber Security and Identity

March 2022 -- March 2025

- Triaged security alerts across SIEM, EDR, and email security platforms, investigating and escalating incidents in line with defined response procedures and Service Level Agreements (SLA).
- Deployed and managed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), extending detection coverage across endpoints and Active Directory (AD) environments.
- Conducted vulnerability scanning using Tenable.io and Nessus, working with infrastructure teams to prioritise and remediate identified weaknesses.
- Managed user accounts, access rights, and group memberships in Azure AD and on-premises AD, supporting Joiner, Mover, and Leaver (JML) processes.
- Administered Mimecast policies for inbound and outbound email filtering, spam quarantine, and data loss prevention (DLP) controls.
- Supported the delivery of security awareness training campaigns and phishing simulation exercises to improve organisational security culture.
- Contributed to security policy development and compliance assessments aligned to ISO 27001 and Cyber Essentials Plus frameworks.

HICX Solutions Ltd (SaaS/FinTech) -- IT Engineer: Security, Quality and Infrastructure

February 2021 -- March 2022

- Implemented and maintained security controls across SaaS and on-premises infrastructure, including endpoint protection, firewall configuration, and access management.
- Configured MDM policies for corporate device management, ensuring devices met security baselines before accessing company systems.
- Managed MFA and SSO configurations for cloud-based business applications, reducing reliance on password-only authentication.
- Supported IT infrastructure projects including server provisioning, network security hardening, and identity management improvements.
- Conducted internal quality assurance checks on security configurations and contributed to vulnerability identification and remediation activities.

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) to more than 8,000 users at UAL, significantly improving endpoint and identity threat visibility across the organisation.
- Implemented CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) to replace legacy log analysis tools, reducing SIEM alert investigation time through improved correlation and automated triage.
- Led the remediation programme following a penetration testing engagement, tracking and closing more than 90% of critical and high findings within agreed timescales.
- Automated incident response playbooks using PowerShell and SOAR tooling, reducing mean time to respond (MTTR) for common alert categories by approximately 40%.
- Contributed to the organisation achieving and maintaining Cyber Essentials Plus certification, ensuring compliance with the UK Government's baseline cyber security standard.

- Designed and delivered a phishing simulation and security awareness programme that reduced click-through rates on simulated phishing emails by more than 60% over 12 months.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP) -- ISC2
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
