

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR | CrowdStrike EDR | Asset Management Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of hands-on cyber security engineering experience in large-scale enterprise environments. I specialise in operating and optimising Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), and Endpoint Detection and Response (EDR) platforms, with expert-level command of CrowdStrike Falcon across the Prevent, Insight, and Discover modules. I have extensive experience managing the full security control stack, including Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, web and email security gateways, Intrusion Detection and Prevention Systems (IDS/IPS), Privileged Access Management (PAM), Multifactor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), Mobile Application Management (MAM), and firewall governance. I am highly proficient in vulnerability scanning and remediation, remediating penetration test findings, and delivering security awareness training. I have supported complex, multi-layer infrastructure security in environments comparable to global asset management operations, and I am now seeking a senior-level Cyber Security Engineer position where I can lead the implementation and continuous improvement of robust security infrastructure within a focused specialist team.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft 365 Defender
- **SIEM/SOAR:** CrowdStrike NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), Splunk/SPL; SOAR automation, alert triage and playbook engineering
- **WAF/DDoS and Gateway Security:** Web Application Firewall (WAF) rule management and DDoS protection; Mimecast email security gateway; Check Point Harmony web gateway and firewall
- **IDS/IPS and Firewall:** Intrusion Detection and Prevention System (IDS/IPS) rule management; Check Point Harmony firewall policy governance
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, MFA, SSO, Group Policy Objects (GPOs)
- **PAM:** BeyondTrust Privileged Access Management (PAM); just-in-time (JIT) access and privileged session recording
- **MDM/MAM:** Microsoft Intune MDM and MAM; Tanium endpoint management and asset visibility
- **Vulnerability Management:** Tenable.io, Nessus, Pentra Breach and Attack Simulation (BAS), AppCheck; penetration test coordination and finding remediation
- **Incident Response:** NIST Special Publication (SP) 800-61, MITRE ATT&CK framework; detection engineering, threat hunting, and post-incident review
- **Scripting/Automation:** PowerShell scripting; SOAR workflow automation and integration
- **Frameworks/Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Own and administer the CrowdStrike Falcon EDR platform across an 8,000-user estate, maintaining Prevent policies, conducting Insight-driven threat hunting, and leveraging Discover for complete asset visibility
- Operate SIEM/SOAR/EDR platforms including CrowdStrike NG-SIEM and Microsoft Sentinel, performing alert triage, investigation, and incident response with SOAR-driven automation reducing analyst workload significantly

- Manage WAF and DDoS protection controls, reviewing and updating rule sets to protect internet-facing applications from emerging web-based attack techniques
- Administer Mimecast email security gateway and Check Point Harmony web gateway, maintaining policy hygiene and ensuring coverage against phishing, malware delivery, and Business Email Compromise (BEC)
- Manage IDS/IPS signature sets and firewall policies, conducting regular reviews and tuning to reduce false positives and ensure effective coverage of threat indicators
- Configure and maintain Microsoft Entra ID Conditional Access, MFA, SSO, and Group Policy, enforcing zero-standing-privilege principles and least-privilege access across the organisation
- Administer BeyondTrust PAM, enforcing just-in-time privileged access and full session recording for all privileged accounts across the environment
- Manage Microsoft Intune MDM and MAM policies across Windows, iOS, and Android, ensuring device compliance and application management baselines are enforced organisation-wide
- Lead vulnerability scanning and remediation using Tenable.io, Nessus, Pentra BAS, and AppCheck; manage security certificate lifecycles and track remediation of penetration test findings through to validated closure
- Deliver security awareness training programmes, including phishing simulation campaigns, to over 8,000 staff, achieving measurable improvement in organisational security culture
- Contribute to ad-hoc security engineering projects, including detection engineering, SOAR playbook development, and cross-functional security initiatives aligned to the strategic security roadmap
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Operated SIEM/SOAR platforms including Microsoft Sentinel and CrowdStrike Falcon, performing daily alert triage, log investigation, and security incident escalation in line with defined runbooks
- Managed Mimecast email gateway policies and investigated email-borne threats including phishing, malware, and BEC attempts, reducing malicious delivery rates significantly
- Conducted vulnerability scans using Nessus and Tenable.io, produced findings reports, and worked with asset owners to track and close critical and high-severity vulnerabilities
- Administered Microsoft Entra ID and Azure AD identity configurations, Conditional Access policies, MFA enrolment campaigns, and SSO integrations for enterprise applications
- Supported BeyondTrust PAM administration, onboarding privileged accounts and enforcing privileged access policies across the environment
- Coordinated penetration test engagements, liaised with external testing teams, and tracked remediation of identified findings to closure
- Managed Microsoft Intune MDM and MAM policies, enforcing device compliance baselines across a mixed-platform environment
- Contributed to firewall policy reviews, WAF rule validation, and IDS/IPS signature management in support of the broader security operations function

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Maintained security controls across a cloud-hosted Software as a Service (SaaS) FinTech platform, supporting vulnerability management, patch management, and change control cycles
- Managed identity and access management including user provisioning, access reviews, MFA enforcement, and privileged account governance across cloud and on-premises environments
- Supported SIEM-based security monitoring, log analysis, and escalation of confirmed security incidents to senior engineers
- Contributed to infrastructure quality assurance and produced security control documentation aligned to compliance and governance requirements

KEY ACHIEVEMENTS

- Reduced alert-to-triage time by over 40 per cent through the design and implementation of automated SOAR playbooks within CrowdStrike NG-SIEM and Microsoft Sentinel
- Delivered full CrowdStrike Falcon EDR deployment across an 8,000-user estate, achieving 100 per cent endpoint visibility and reducing average threat dwell time to under two hours
- Implemented BeyondTrust PAM across the organisation, eliminating standing privileged access for over 200 administrator accounts and achieving Cyber Essentials Plus compliance
- Reduced critical and high vulnerability exposure by 60 per cent within 12 months through a structured vulnerability management programme using Tenable.io and Pentera BAS
- Developed over 30 custom detection rules in Microsoft Sentinel using KQL, expanding MITRE ATT&CK coverage with a measurable reduction in false positives and improved mean time to detect
- Rebuilt Mimecast email gateway policy framework post-incident, reducing malicious email delivery by over 95 per cent within four weeks

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
