

PROSPER AWUNI

Senior Cyber Security Engineer | Identity and Access Management | Cloud Security | Zero Trust

London, United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience in identity and access management (IAM), cloud security engineering, and securing enterprise Microsoft 365 and Azure environments. I have a strong track record of administering and securing IAM platforms at enterprise scale, engineering Conditional Access policies, Multi-Factor Authentication (MFA), Privileged Access Management (PAM), Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions in line with Zero Trust principles. I am a delivery-focused engineer, comfortable owning security engineering projects end-to-end from design and planning through to implementation, documentation, and transition into business as usual (BAU) operations. I am skilled at translating regulatory and security requirements into pragmatic technical controls and communicating clearly across technical and non-technical stakeholders.

CORE SKILLS AND TECHNICAL STACK

- **Identity and Access Management (IAM):** Azure Active Directory (Azure AD)/Microsoft Entra ID, Conditional Access, MFA, Single Sign-On (SSO), Role-Based Access Control (RBAC), Identity Governance and access reviews, modern authentication (SAML, OAuth, OIDC)
- **Privileged Access Management (PAM):** BeyondTrust PAM, least privilege enforcement, privileged account lifecycle management, session recording and auditing
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM, device enrolment, compliance baselines, app protection policies, Conditional Access enforcement
- **Cloud and Zero Trust Security:** Azure cloud security, Zero Trust principles, Microsoft 365 security capabilities, Data Loss Prevention (DLP)
- **Endpoint Security:** CrowdStrike Falcon (Next-Generation SIEM (NG-SIEM), Endpoint Detection and Response (EDR), Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **SIEM and Detection:** Microsoft Sentinel (Kusto Query Language (KQL)), alert tuning, identity-related detection engineering
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Security Orchestration, Automation, and Response (SOAR):** Playbook development, automated alert triage, PowerShell scripting
- **Frameworks:** NIST CSF, ISO 27001, CIS Controls, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts London (UAL), London

- Engineer and maintain enterprise IAM controls across Azure AD/Microsoft Entra ID, including Conditional Access policies, MFA, SSO, RBAC, Identity Governance, and access reviews, across an 8,000-user environment.
- Administer BeyondTrust PAM, managing privileged account lifecycle, enforcing least privilege, and maintaining full session recording and auditing for privileged access activity.
- Manage Microsoft Intune MDM and MAM policies: device enrolment, compliance baselines, app protection policies, and Conditional Access enforcement to ensure non-compliant devices cannot access organisational resources.
- Support application onboarding using modern authentication protocols including Security Assertion Markup Language (SAML), OAuth, and OpenID Connect (OIDC), integrating cloud and on-premises applications into the Azure AD tenant.

- Lead security engineering projects end-to-end across identity, endpoint, and cloud domains, translating regulatory and security requirements into pragmatic technical controls; deliver projects from design through to implementation and BAU transition.
- Configure and optimise CrowdStrike Falcon EDR and Microsoft Defender (MDE, MDI, M365 Defender) across the enterprise, maintaining Zero Trust endpoint security posture and integrating telemetry with Microsoft Sentinel.
- Author KQL detection rules in Microsoft Sentinel with a focus on identity-related alerts; tune identity-based detections in partnership with the security operations team.
- Manage vulnerability management programme using Tenable.io, AppCheck, and Pentera BAS, prioritising remediation by risk and reporting to senior leadership.
- Develop SOAR playbooks to automate identity and endpoint security workflows, reducing manual effort and improving response times.
- Enforce security-by-design practices across the organisation, contributing to DLP policies, Conditional Access design, and Zero Trust architecture reviews.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts London (UAL), London

- Administered Azure AD Conditional Access, MFA, and RBAC policies; supported application onboarding using modern authentication protocols (SAML, OAuth, OIDC).
- Managed Intune MDM and MAM policy configuration, device enrolment, compliance baselines, and app protection across the managed device fleet.
- Administered BeyondTrust PAM, enforcing least privilege access controls and supporting privileged account reviews and access certification activities.
- Contributed to Identity Governance processes including access reviews, role assignments, and identity lifecycle management tasks.
- Developed PowerShell automation scripts for identity lifecycle management, access provisioning, and security operations task automation.
- Supported security monitoring and alert triage using SIEM and EDR platforms; contributed to detection tuning and log analysis.
- Supported Cyber Essentials+ and ISO 27001 compliance activities, particularly within the access control and identity management domains.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech), London

- Delivered identity and access management improvements and security engineering initiatives across a Software as a Service (SaaS) and FinTech cloud environment.
- Managed endpoint security controls, network security tooling, and IT infrastructure across cloud and on-premises platforms.
- Supported ISO 27001 and Cyber Essentials compliance activities, focusing on access control, identity, and infrastructure security domains.
- Provided IT security and infrastructure engineering support, improving system resilience and security posture.

KEY ACHIEVEMENTS

- Designed and deployed enterprise Conditional Access and MFA policies across Azure AD for 8,000 UAL users, significantly reducing the identity-based attack surface and achieving compliance with Cyber Essentials+ requirements.
- Implemented and configured BeyondTrust PAM to replace uncontrolled privileged access across the UAL estate, enforcing least privilege, full session recording, and privileged account lifecycle governance.

- Led Microsoft Intune MDM and MAM rollout across the UAL device fleet, automating compliance enforcement and integrating Conditional Access to prevent non-compliant device access to organisational resources.
- Delivered end-to-end cloud security engineering projects at UAL across identity, endpoint, and Azure cloud domains, consistently on time and within scope, translating security requirements into robust technical controls.
- Achieved CISSP certification, demonstrating expert-level knowledge across all eight domains of information security including identity and access management, cloud security, and security engineering.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
