

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM / SOAR / EDR | CrowdStrike | Azure | PAM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience delivering robust security across complex enterprise environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) via CrowdStrike Falcon, Identity and Access Management (IAM) using Microsoft Entra ID and Azure Active Directory (AD), Privileged Access Management (PAM) via BeyondTrust, and vulnerability management using Tenable.io and AppCheck. I have directly managed WAF/DDoS controls, web and email security gateways, multi-factor authentication (MFA) and single sign-on (SSO) solutions, mobile device management (MDM) and mobile application management (MAM) policies via Microsoft Intune, and Intrusion Detection and Prevention (IDS/IPS) controls across an 8,000-user estate. I am confident managing penetration test findings and delivering security awareness training at all levels of an organisation. I am now seeking a senior hybrid role within a dynamic environment where I can continue to protect critical assets and lead security operations.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / SOAR / EDR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), SOAR playbook development, alert triage and incident response
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover, Microsoft Defender for Endpoint (MDE)
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, MFA, SSO, Azure Active Directory Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM, least-privilege enforcement, privileged session management
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, device policy enforcement
- **Email Security Gateway:** Mimecast, phishing defence, spam filtering, email threat protection
- **Vulnerability Management:** Tenable.io, AppCheck, Pentra Breach and Attack Simulation (BAS), Nessus, penetration test finding remediation
- **Firewalls / IDS/IPS / WAF/DDoS:** Check Point Harmony, network perimeter security, intrusion detection and prevention
- **Frameworks:** NIST CSF, NIST 800-61, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting / Automation:** PowerShell, KQL, SOAR automation
- **Cloud Security:** Microsoft Azure, Azure Security Centre, Defender for Cloud

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead SIEM/SOAR/EDR operations across an 8,000-user enterprise estate, managing alert triage, escalation, and incident response using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel with KQL-based detection rules
- Administer and optimise CrowdStrike Falcon EDR (Prevent, Insight, Discover) to detect, investigate, and contain endpoint threats, reducing mean time to respond (MTTR) significantly
- Manage BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege policies and auditing privileged session activity across critical administrative accounts
- Configure and maintain Entra ID and Azure Active Directory (AD) Conditional Access policies, MFA, and SSO to protect identity infrastructure across the organisation

- Oversee Intune MDM/MAM policies, ensuring secure device and application management across 8,000 endpoints, in line with corporate security standards
- Manage Mimecast email security gateway configuration, defending against phishing, Business Email Compromise (BEC), and malware delivered via email
- Execute vulnerability scans and remediation programmes using Tenable.io, Pentera BAS, and AppCheck, prioritising findings for patching and configuration hardening
- Remediate penetration test findings, producing structured remediation reports and tracking closure timelines for management
- Manage PKI and security certificates, ensuring timely renewal and correct deployment across web-facing services
- Deliver security awareness training to staff and conduct phishing simulation exercises, improving organisational security culture
- Contribute to IDS/IPS monitoring and tuning, reducing false-positive alerts and improving signal fidelity across network perimeter controls
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Performed day-to-day SIEM/SOAR alert triage and Endpoint Detection and Response (EDR) investigations using Microsoft Sentinel and CrowdStrike Falcon
- Deployed and administered Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and the Microsoft 365 (M365) Defender suite across an 8,000-user estate
- Managed Entra ID and Azure Active Directory (AD) identity lifecycle, Conditional Access, and MFA/SSO policies to enforce zero-trust access controls
- Supported vulnerability management programmes using Tenable.io and Nessus, coordinating remediation activities with infrastructure and application teams
- Configured and managed Intune MDM/MAM policies, enforcing device compliance and application security standards
- Assisted in management of Mimecast email security gateway, tuning policies to reduce phishing and spam exposure
- Supported incident response activities following NIST 800-61 incident handling procedures, including containment, eradication, and post-incident review
- Contributed to security awareness training delivery and phishing simulation campaigns

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Implemented and maintained security controls across a SaaS/FinTech infrastructure environment, covering identity, endpoint, and network security layers
- Managed MFA and SSO configuration, ensuring secure access to corporate and cloud systems
- Configured and maintained Intune MDM/MAM policies, enforcing device and application management standards across the organisation
- Supported vulnerability scanning and patch management activities, prioritising critical findings for remediation
- Contributed to security hardening and compliance activities, supporting ISO 27001 and Cyber Essentials Plus certification requirements

KEY ACHIEVEMENTS

- Led CrowdStrike Falcon EDR deployment and management across 8,000 endpoints at UAL, achieving full visibility into endpoint threats and reducing incident response times
- Delivered the Microsoft Defender for Endpoint (MDE), Defender for Identity (MDI), and M365 Defender rollout across the full UAL estate, unifying SIEM/SOAR/EDR telemetry
- Implemented BeyondTrust PAM solution at UAL, significantly reducing the privileged access attack surface and achieving compliance with Cyber Essentials Plus requirements

- Designed and deployed Entra ID Conditional Access policies and MFA/SSO controls, reducing unauthorised access incidents across the organisation
- Drove penetration test remediation programmes, achieving measurable reduction in critical and high vulnerability counts within agreed timelines
- Delivered organisation-wide security awareness training and phishing simulation campaigns, improving staff resilience against social engineering attacks

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
