

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM | SOC Operations | IAM | Asset Management Security

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience delivering Security Operations Centre (SOC) capabilities, Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), and Privileged Access Management (PAM) across highly regulated enterprise environments. I have expert-level experience with CrowdStrike Falcon EDR and NG-SIEM, Mimecast email security, Microsoft Entra ID (formerly Azure Active Directory) identity governance, Multi-Factor Authentication (MFA) / Single Sign-On (SSO), Mobile Device Management (MDM) / Mobile Application Management (MAM) via Microsoft Intune, and vulnerability management using Tenable.io, Pentera Breach and Attack Simulation (BAS), and Nessus. I am experienced in managing Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) controls, firewall administration, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS) monitoring, security certificate management, and remediating penetration test findings. I am particularly effective in small focused security teams where breadth of technical ownership, accurate alert triage, and collaborative cross-functional working are essential.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / Security Orchestration, Automation and Response (SOAR):** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), alert triage, detection engineering, playbook automation
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover (expert, 8,000-user estate)
- **Identity and Access Management (IAM) / Privileged Access Management (PAM):** Microsoft Entra ID / Azure Active Directory (AD) / Conditional Access / MFA / SSO / Group Policy; BeyondTrust PAM
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Email and web security gateways:** Mimecast (policy configuration, anti-phishing, incident investigation)
- **Vulnerability management:** Tenable.io, Pentera BAS, AppCheck, Nessus (scanning, risk scoring, remediation tracking)
- **Firewall, WAF/DDoS, IDS/IPS:** Check Point Harmony; WAF rule management; IDS/IPS monitoring and tuning
- **Microsoft Defender suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Incident Response:** NIST 800-61, MITRE ATT&CK, Security Orchestration Automation and Response (SOAR) playbooks
- **Security awareness and training:** Phishing simulation design and delivery, user education campaigns
- **Scripting and automation:** PowerShell (security task automation, reporting)
- **Governance frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead Security Operations Centre (SOC) functions within a focused cyber security team, operating CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) as the primary SIEM/SOAR and EDR platform across an 8,000-user estate
- Triage and respond to security alerts from SIEM, EDR, email gateway, and endpoint tooling; lead incident investigations and drive remediation activities in line with the NIST 800-61 Incident Response framework and MITRE ATT&CK

- Manage WAF and DDoS controls, reviewing rule sets and responding to web-layer threats in coordination with network and infrastructure teams
- Administer Microsoft Entra ID (formerly Azure Active Directory) Conditional Access, MFA, and SSO for 8,000 users, enforcing identity governance and least-privilege access principles
- Operate BeyondTrust Privileged Access Management (PAM) platform to control, audit, and record privileged account activity
- Administer Microsoft Intune MDM/MAM policies across mobile and desktop device fleets, ensuring endpoint compliance and security baseline adherence
- Lead end-to-end vulnerability management lifecycle: plan and execute scans with Tenable.io, Pentra BAS, AppCheck, and Nessus; produce risk-scored reports; coordinate and track remediation with system owners
- Manage Mimecast email security gateway including policy configuration, anti-phishing controls, and investigation of email-borne security incidents
- Maintain firewall rules and IDS/IPS configurations using Check Point Harmony; conduct security certificate lifecycle management
- Design and deliver security awareness training and simulated phishing exercises, achieving measurable reductions in phishing susceptibility across the institution
- Remediate penetration test findings, coordinating with third-party security suppliers and internal teams to close critical and high vulnerabilities within agreed SLAs
- Author SOAR playbooks to automate tier-1 alert triage, reducing manual handling time and improving mean time to respond (MTTR)
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender to maintain endpoint and identity protection across the estate
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored SIEM and EDR alert queues, investigating and triaging security events and escalating critical incidents for senior review
- Supported MFA/SSO and Conditional Access policy administration within Microsoft Entra ID, covering identity lifecycle management for a large and complex user base
- Administered Mimecast email security gateway policies and investigated email-borne phishing and malware incidents
- Conducted scheduled vulnerability scans, produced risk-scored reports, and tracked remediation through to closure with system owners
- Supported Microsoft Intune MDM/MAM device compliance management across the institution's device fleet
- Contributed to incident response activities including evidence gathering, containment, and post-incident reporting
- Supported security awareness training campaigns and phishing simulations to improve end-user vigilance

HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Deployed and maintained endpoint security tooling including EDR agents across cloud and on-premises infrastructure
- Managed firewall rule requests, security certificate renewals, Identity and Access Management (IAM) reviews, and MDM/MAM policies across the SaaS platform
- Supported SOC 2 Type II compliance activities and conducted vendor security assessments to meet regulatory and contractual obligations
- Contributed to vulnerability scanning, risk reporting, and security hardening activities across cloud and on-premises environments

KEY ACHIEVEMENTS

- Led enterprise deployment of CrowdStrike Falcon EDR/NG-SIEM across 8,000 users, consolidating legacy antivirus into a unified SIEM/SOAR and EDR capability, significantly improving alert visibility and response speed
- Achieved Cyber Essentials Plus certification at UAL, leading the gap analysis, technical evidence collation, and remediation programme end to end
- Implemented BeyondTrust Privileged Access Management (PAM), eliminating unmonitored standing privilege and delivering comprehensive audit trail coverage across the estate
- Reduced mean time to detect (MTTD) and mean time to respond (MTTR) through automated SOAR playbooks that handled tier-1 alert triage without manual analyst intervention
- Delivered phishing simulation programme that produced measurable improvements in user reporting of suspicious emails across the institution
- Reduced critical and high vulnerability counts through structured Tenable.io and Pentera BAS remediation cycles, improving the organisation's overall risk posture

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
