

PROSPER AWUNI

Senior Cyber Security Engineer | Cloud and Hybrid Infrastructure Security | SIEM | Threat Detection |
Remote UK

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience strengthening security across hybrid and cloud infrastructure environments. I have expert-level capability in CrowdStrike Falcon Security Information and Event Management (SIEM) and Endpoint Detection and Response (EDR), Microsoft Sentinel with Kusto Query Language (KQL), and Microsoft Azure and Entra ID security including Conditional Access, Multi-Factor Authentication (MFA), and cloud identity governance. I have led enterprise-scale cyber security operations across an 8,000-user hybrid infrastructure, delivering detection engineering, threat hunting, vulnerability management, and Security Orchestration, Automation and Response (SOAR) automation that have measurably improved the organisation's security posture. I am highly effective working remotely as part of a distributed team, bringing strong self-direction, clear communication, and a track record of delivering complex security programmes independently. I am eager to bring this capability to an expanding cyber security team within a dynamic UK retail environment.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and detection engineering:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), detection rule authoring, threat hunting, alert triage
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover (expert level, 8,000-user deployment)
- **Cloud and hybrid infrastructure security:** Microsoft Azure, Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, SSO, cloud identity governance
- **Security Orchestration, Automation and Response (SOAR):** Playbook development, automated alert triage, workflow automation using PowerShell
- **Microsoft Defender suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365D)
- **Vulnerability management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Email and endpoint security:** Mimecast, Check Point Harmony firewall, Tanium
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework
- **Scripting and automation:** PowerShell
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead cyber security engineering across a complex hybrid infrastructure (on-premises and Microsoft Azure cloud) covering 8,000 users, driving continuous improvement of the security architecture and tooling stack
- Operate CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) as the primary Security Information and Event Management (SIEM) / SOAR and Endpoint Detection and Response (EDR) platform; author detection rules, conduct threat hunting, triage alerts, and lead incident response in line with NIST 800-61 and MITRE ATT&CK
- Manage Microsoft Sentinel with Kusto Query Language (KQL) queries for advanced threat detection, log analysis, and correlation across cloud and hybrid data sources

- Administer Microsoft Entra ID (formerly Azure Active Directory) Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) policies for 8,000 users, securing cloud identity and enforcing zero-trust principles
- Lead end-to-end vulnerability management using Tenable.io, Pentera BAS, AppCheck, and Nessus, coordinating risk-prioritised remediation across infrastructure and application teams
- Operate BeyondTrust Privileged Access Management (PAM) to govern privileged access across cloud and on-premises systems
- Administer Microsoft Intune MDM/MAM policies, ensuring device compliance across remote and office-based endpoints
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the hybrid estate
- Author PowerShell automation scripts to streamline security operations, reporting, and routine administrative tasks, improving efficiency for a distributed team
- Manage Mimecast email security gateway and Check Point Harmony firewall policies, monitoring for anomalous activity and reviewing logs
- Design and deliver security awareness training campaigns and phishing simulations, maintaining a strong security culture across a geographically distributed user base
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored SIEM and EDR platforms, triaging security alerts and escalating incidents for senior review and response across a hybrid infrastructure environment
- Supported Microsoft Entra ID identity governance, administering MFA, SSO, and Conditional Access policies for a large distributed user population
- Conducted vulnerability scans using Tenable.io and Nessus, tracked remediation progress, and produced risk-scored reports for stakeholders
- Supported Microsoft Sentinel KQL queries for log analysis and anomaly detection across cloud and on-premises data sources
- Contributed to incident response activities including evidence gathering, containment, and post-incident reporting in line with NIST 800-61
- Administered Mimecast email security gateway and supported endpoint security tooling across a hybrid infrastructure estate

HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Deployed and maintained endpoint security tooling including EDR agents across cloud-hosted and on-premises infrastructure, contributing to a cloud-first security model
- Managed Identity and Access Management (IAM) processes, firewall rule requests, and security certificate lifecycle management across the SaaS platform
- Supported SOC 2 Type II compliance and vendor security assessment activities, ensuring third-party risk was assessed and documented
- Contributed to vulnerability scanning, remediation tracking, and infrastructure hardening across cloud and on-premises environments

KEY ACHIEVEMENTS

- Led the enterprise deployment of CrowdStrike Falcon EDR and NG-SIEM across an 8,000-user hybrid infrastructure at UAL, delivering a unified threat detection and response capability that replaced legacy antivirus tooling
- Achieved Cyber Essentials Plus certification for UAL, leading the end-to-end gap analysis, technical evidence collation, and remediation programme

- Built and deployed Microsoft Sentinel KQL detection rules and SOAR automation playbooks, reducing mean time to detect (MTTD) and mean time to respond (MTTR) across hybrid infrastructure
- Implemented BeyondTrust Privileged Access Management (PAM) to eliminate unmonitored standing privilege across cloud and on-premises systems
- Delivered structured Tenable.io and Pentra BAS vulnerability management cycles, reducing critical and high vulnerability counts and improving the organisation's overall risk posture
- Operated effectively as a distributed team member, managing complex security programmes and technical responsibilities across multiple remote and on-site locations

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
