

PROSPER AWUNI

Senior Cyber Security Engineer | Azure | Cloud and Hybrid Infrastructure Security | Prevent and Protect

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience strengthening enterprise security across cloud and hybrid infrastructure environments, with particular expertise in Microsoft Azure, endpoint protection and security control implementation. In my current role at the University of the Arts London (UAL), I lead security engineering and operations across an 8,000-user hybrid environment, implementing and managing controls across Microsoft Azure Active Directory (Azure AD) / Microsoft Entra ID, Microsoft Defender for Endpoint (MDE), CrowdStrike Falcon and Microsoft Intune. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a prevent-and-protect mindset, translating threat intelligence and vulnerability findings into practical, infrastructure-embedded security controls that reduce organisational risk at scale. I am fully effective in remote-first roles and bring strong communication and cross-functional collaboration skills to distributed security teams.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Hybrid Infrastructure Security:** Microsoft Azure, Azure Active Directory (Azure AD) / Microsoft Entra ID, Microsoft Defender suite, cloud security controls
- **Endpoint Protection and Prevention:** CrowdStrike Falcon Prevent, Microsoft Defender for Endpoint (MDE), Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Security Information and Event Management (SIEM):** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, KQL (Kusto Query Language)
- **Identity and Access Management (IAM):** Azure AD / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Security Orchestration, Automation and Response (SOAR):** Automated playbook development, alert triage, mean time to respond (MTTR) reduction
- **Network and Perimeter Security:** Check Point Harmony firewall, Mimecast email security
- **Endpoint Visibility:** CrowdStrike Falcon Insight and Discover, Tanium
- **Scripting and Automation:** PowerShell
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Incident Response:** NIST 800-61 lifecycle, end-to-end case management

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Strengthen and maintain enterprise security across an 8,000-user hybrid infrastructure and Azure environment, implementing prevent-and-protect security controls across cloud, endpoint and identity layers
- Manage CrowdStrike Falcon Prevent and Microsoft Defender for Endpoint (MDE) as primary endpoint protection platforms, ensuring comprehensive prevention coverage across the entire managed estate
- Administer Microsoft Azure Active Directory (Azure AD) / Microsoft Entra ID, implementing Conditional Access policies, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) to enforce secure access controls across cloud and hybrid resources
- Operate CrowdStrike Falcon Next-Generation SIEM (NG-SIEM) and Microsoft Sentinel for security monitoring, detection engineering and threat hunting across cloud and on-premise infrastructure

- Deploy and manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) across the full device estate, ensuring security policy compliance for remote and hybrid workers
- Configure and tune Security Orchestration, Automation and Response (SOAR) playbooks to automate repetitive triage tasks and reduce mean time to respond (MTTR) to security events
- Administer BeyondTrust Privileged Access Management (PAM) solution, enforcing least-privilege access and just-in-time controls across critical infrastructure and cloud systems
- Drive vulnerability management programme using Tenable.io, AppCheck, Nessus and Pentra Breach and Attack Simulation (BAS), ensuring security controls are validated and gaps are remediated promptly
- Manage Check Point Harmony firewall and Mimecast email security, maintaining robust perimeter and messaging security controls in the hybrid environment
- Coordinate incident response activities aligned to NIST 800-61, managing end-to-end case lifecycle from detection through containment, eradication and recovery
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Supported security operations across hybrid cloud and on-premise infrastructure, monitoring alerts and investigating incidents across SIEM, Endpoint Detection and Response (EDR) and email security platforms
- Contributed to strengthening security controls across Azure Active Directory (Azure AD), including access governance, Conditional Access policy configuration and privileged access reviews
- Assisted in implementing endpoint protection and Mobile Device Management (MDM) controls, ensuring security policy coverage across the managed device population
- Supported vulnerability management activities using Tenable.io and Nessus, prioritising and tracking remediation of findings across the infrastructure estate
- Developed and refined incident response playbooks, contributing to the security team's continuous improvement programme
- Delivered security awareness training and phishing simulation campaigns to reduce human-layer risk across the institution

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security engineering and infrastructure management within a cloud-first Software as a Service (SaaS) and FinTech environment, implementing and maintaining security controls across cloud and on-premise systems
- Managed endpoint security, network access controls and identity management, enforcing security policy compliance across all users and devices
- Contributed to security audits, compliance assessments and infrastructure improvement initiatives, supporting the organisation's information security posture

KEY ACHIEVEMENTS

- Led enterprise-wide deployment of Microsoft Defender for Endpoint (MDE) across 8,000 users at UAL, delivering full prevention and detection coverage across the hybrid infrastructure on schedule
- Implemented CrowdStrike Falcon NG-SIEM and Falcon Prevent across the hybrid estate, establishing comprehensive real-time monitoring and endpoint protection capability
- Deployed BeyondTrust Privileged Access Management (PAM) solution, materially reducing the privileged account attack surface across cloud and on-premise systems
- Rolled out Microsoft Intune MDM and MAM, achieving full security policy enforcement across the remote and hybrid device population
- Built SOAR-driven automated playbooks that reduced mean time to respond (MTTR) to high-priority security incidents, freeing analyst capacity for higher-value investigations

- Contributed to achievement and maintenance of Cyber Essentials Plus certification, validating baseline security controls across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
