

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Endpoint Security | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience designing, implementing, and maintaining robust security controls across complex hybrid environments. I specialise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations, identity and access management, and vulnerability management. In my current role I protect a large higher education institution with over 8,000 endpoints, managing security tools including CrowdStrike Falcon, Mimecast email security, Microsoft Defender, Privileged Access Management (PAM), and Mobile Device Management and Mobile Application Management (MDM/MAM). I have hands-on experience across the full security lifecycle, from alert triage and incident response through to penetration test finding remediation, and I am seeking a focused, hands-on engineering role within a high-performing security team where I can continue to deliver meaningful security improvements.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM), Microsoft Defender for Endpoint (MDE)
- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), Splunk (SPL)
- **Email Security:** Mimecast (anti-phishing, anti-spoofing, Data Loss Prevention (DLP))
- **Intrusion Detection/Prevention Systems (IDS/IPS), Firewall and Perimeter Security:** Check Point Harmony, Tanium
- **Identity and Access Management (IAM):** Entra ID / Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **MDM/MAM:** Microsoft Intune, endpoint compliance and policy management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Incident Response:** NIST 800-61, MITRE ATT&CK Framework
- **Security Frameworks:** NIST Cybersecurity Framework (NIST CSF), CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Microsoft Defender Suite:** MDE, Microsoft Defender for Identity (MDI), Microsoft 365 Defender

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 to Present

Senior Cyber Security Analyst / Engineer

- Manage and optimise CrowdStrike Falcon EDR across an 8,000-endpoint environment, configuring detection policies, prevention settings and performing proactive threat hunting to identify and contain advanced threats.
- Lead SIEM/SOAR alert triage and response, investigating and escalating security events across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, reducing mean time to respond (MTTR) through automated playbooks.
- Administer Mimecast email security gateway, configuring and maintaining anti-phishing, anti-spoofing, URL rewriting, and DLP policies to protect against email-borne threats.
- Manage BeyondTrust PAM solution, enforcing least-privilege access across all privileged accounts and critical infrastructure to reduce the organisation's attack surface.

- Maintain Microsoft Intune MDM/MAM configuration, enforcing device compliance policies across mobile and endpoint devices to ensure security posture alignment.
- Deploy and manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across the full enterprise estate, providing unified threat protection for over 8,000 users.
- Conduct vulnerability management using Tenable.io, Pentera BAS and AppCheck, prioritising remediation based on Common Vulnerability Scoring System (CVSS) severity and business risk.
- Configure and maintain MFA and SSO policies via Entra ID / Azure AD Conditional Access, enforcing Zero Trust access controls across cloud and on-premises applications.
- Lead incident response activities in line with NIST 800-61 framework and MITRE ATT&CK methodology, coordinating containment, eradication and recovery across all incident types.
- Deliver security awareness training and phishing simulation campaigns, reducing phishing click rates across the organisation.
- Remediate penetration test findings and contribute to security improvement projects, working closely with the IT Security Officer and infrastructure teams.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL)

March 2022 to March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed daily alert triage and monitoring across SIEM, EDR and email security platforms, applying investigation and escalation procedures in line with agreed service level agreements (SLAs).
- Supported CrowdStrike Falcon EDR deployment and policy management, maintaining endpoint protection coverage across the university estate.
- Managed identity lifecycle and access controls within Azure AD / Entra ID, including Conditional Access policy review and MFA configuration.
- Conducted vulnerability scanning and remediation tracking using Tenable.io and Nessus, reporting on compliance posture to senior management and the IT Security Officer.
- Developed incident response playbooks and runbooks aligned to NIST 800-61 and MITRE ATT&CK, improving response consistency and reducing dwell time.
- Maintained IDS/IPS rule sets and security certificate lifecycle management, ensuring continuous protection of perimeter and internal infrastructure.
- Administered Mimecast email security configuration, managing quarantine, policy updates and threat intelligence feeds.
- Supported security awareness training delivery and coordinated phishing simulation exercises across the institution.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 to March 2022

IT Engineer: Security, Quality and Infrastructure

- Administered endpoint security, email security and identity access management across a SaaS/FinTech cloud-first environment, supporting both cloud and on-premises infrastructure.
- Maintained security infrastructure including firewalls, MDM/MAM solutions and security monitoring tooling, ensuring continuous availability and security compliance.
- Supported vulnerability management programme and security risk assessments, contributing findings and remediation recommendations to the security risk register.
- Configured PAM controls for privileged accounts across cloud and on-premises infrastructure, reducing over-privileged access exposure.
- Managed MFA and SSO configuration, supporting secure identity and access management for internal and external users.

KEY ACHIEVEMENTS

- Achieved full CrowdStrike Falcon EDR deployment and policy optimisation across 8,000 endpoints at UAL, reducing malware dwell time and improving mean time to detect (MTTD) for endpoint threats.

- Successfully deployed Microsoft Defender for Endpoint, Defender for Identity and Microsoft 365 Defender across an 8,000-user enterprise environment, providing unified, integrated threat protection across identity, endpoint and cloud workloads.
- Implemented BeyondTrust PAM solution to enforce least-privilege access across all privileged accounts, materially reducing the organisation's privileged attack surface.
- Delivered SOAR automation playbooks within CrowdStrike Falcon and Microsoft Sentinel, reducing manual alert triage workload and accelerating response to high-volume, low-fidelity alerts.
- Reduced phishing click rates by implementing targeted security awareness training and KnowBe4-style phishing simulation campaigns, improving user resilience against social engineering attacks.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
