

PROSPER AWUNI

Senior Detection & Response Engineer | CrowdStrike Falcon EDR/XDR | Threat Hunting | SIEM/SOAR
| Endpoint Security

London, United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a CISSP-certified Senior Detection and Response Engineer with over five years of hands-on experience designing, deploying and operationalising detection-and-response capabilities across complex hybrid enterprise environments. I specialise in CrowdStrike Falcon EDR/XDR — covering policy configuration, detection rule tuning, proactive threat hunting and NG-SIEM content development — alongside Security Orchestration, Automation and Response (SOAR) and Microsoft Sentinel (KQL). In my current role at the University of the Arts London I protect an 8,000-endpoint environment, leading detection engineering, threat hunting, and incident response across CrowdStrike Falcon, Microsoft Defender, and Sentinel. I have a proven record of reducing mean time to detect (MTTD) and mean time to respond (MTTR) through automated playbooks and detection logic aligned to the MITRE ATT&CK framework. I am seeking a Senior Detection and Response Engineer role at eBay where I can bring my CrowdStrike expertise and detection-engineering mindset to protect a global consumer marketplace at scale.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, Spotlight) — policy management, detection rule tuning, proactive threat hunting, behavioural IOC creation
- **Detection Engineering:** MITRE ATT&CK-aligned detection content development; Sigma rule authoring; NG-SIEM query development; KQL in Microsoft Sentinel; SPL in Splunk
- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (KQL), Splunk (SPL); SOAR playbook automation reducing manual triage workload
- **Incident Response:** NIST 800-61 lifecycle; MITRE ATT&CK-guided investigation; containment, eradication and recovery coordination; post-incident review and lessons-learned
- **Threat Intelligence:** IOC and TTP correlation; threat actor profiling; integration of threat intelligence feeds into CrowdStrike and Sentinel
- **Identity and Access Management (IAM):** Entra ID / Azure Active Directory, Conditional Access, MFA, SSO; BeyondTrust PAM
- **Vulnerability Management:** Tenable.io, Pentera BAS, AppCheck, Nessus; risk-based prioritisation aligned to CVSS and business impact
- **Email Security:** Mimecast (anti-phishing, anti-spoofing, URL rewriting, DLP)
- **MDM/MAM:** Microsoft Intune; endpoint compliance policy management
- **Scripting and Automation:** PowerShell; SOAR playbook development; CrowdStrike RTR scripting
- **Security Frameworks:** MITRE ATT&CK, NIST CSF, NIST 800-61, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 to Present

Senior Cyber Security Analyst / Engineer

- Lead detection and response operations across an 8,000-endpoint environment, managing CrowdStrike Falcon EDR detection policies, prevention configurations and behavioural exclusions to maximise signal-to-noise ratio.
- Conduct proactive threat hunting campaigns using CrowdStrike Falcon Insight, building bespoke hunting queries aligned to current MITRE ATT&CK TTPs to identify advanced threats before they trigger automated alerts.
- Develop and tune SIEM detection content in CrowdStrike Falcon NG-SIEM and Microsoft Sentinel (KQL), iterating on detection logic to reduce false positives while maintaining coverage of critical threat vectors.

- Build and maintain SOAR automation playbooks that reduce manual alert triage workload, accelerating mean time to respond (MTTR) and enabling the team to scale detection operations without headcount growth.
- Lead incident response activities in line with NIST 800-61 and the MITRE ATT&CK framework, coordinating containment, eradication and full recovery across all incident types including ransomware, phishing, and credential-based attacks.
- Deploy and operate Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender, providing unified identity-endpoint-cloud threat protection across 8,000+ users.
- Manage BeyondTrust PAM and Entra ID Conditional Access to enforce Zero Trust and least-privilege access principles across the enterprise.
- Conduct vulnerability management using Tenable.io, Pentera BAS and AppCheck, translating scan findings into prioritised remediation actions with clear business-risk context for senior leadership.
- Leverage Tanium for real-time endpoint compliance monitoring and vulnerability management, using asset discovery, software inventory and patch compliance modules to maintain accurate endpoint visibility and enforce compliance baselines across the estate.

University of the Arts, London (UAL)

March 2022 to March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed daily alert triage and investigation across CrowdStrike Falcon, Microsoft Sentinel, and Mimecast, applying structured analysis and escalation procedures aligned to defined SLAs.
- Supported CrowdStrike Falcon EDR deployment, policy management and detection rule development across the university endpoint estate.
- Developed incident response playbooks and runbooks in line with NIST 800-61 and MITRE ATT&CK, improving detection and response consistency and reducing dwell time.
- Managed Entra ID / Azure AD lifecycle — Conditional Access policy review, MFA configuration, and identity governance controls.
- Conducted vulnerability scanning using Tenable.io and Nessus, reporting remediation compliance posture to senior management.
- Administered Mimecast email security configuration, managing quarantine, policy updates and threat intelligence feed ingestion.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 to March 2022

IT Engineer: Security, Quality and Infrastructure

- Administered endpoint security, email security and IAM across a cloud-first SaaS/FinTech environment, supporting detection and response across cloud and on-premises workloads.
- Supported vulnerability management and security risk assessments, contributing remediation recommendations to the security risk register.
- Configured PAM controls and MFA/SSO for privileged and standard accounts across cloud and on-premises infrastructure.

KEY ACHIEVEMENTS

- Achieved full CrowdStrike Falcon EDR deployment and policy optimisation across 8,000 endpoints at UAL, materially reducing malware dwell time and improving MTTD for endpoint threats.
- Delivered SOAR automation playbooks within CrowdStrike Falcon and Microsoft Sentinel, reducing manual alert triage workload by automating high-volume, low-fidelity alert handling.
- Built MITRE ATT&CK-aligned detection content and threat hunting queries that identified active adversary activity before automated alerts fired, enabling pre-emptive containment.
- Deployed Microsoft Defender for Endpoint, Defender for Identity and Microsoft 365 Defender across an 8,000-user estate, delivering unified cross-domain threat visibility.
- Reduced phishing click rates through KnowBe4-style simulation campaigns and targeted security awareness training programmes.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**

- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
