

PROSPER AWUNI

Senior Security Engineer | Security Technology Portfolio | Endpoint and Web Application Protection | Incident Response

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with a genuine passion for cyber security and a proven track record of implementing, configuring, and guiding the evolution of the security technology portfolio across large, complex organisations. I have over five years of hands-on experience leading security engineering initiatives, championing best practice for endpoint management, web application hosting and protection, and software-defined security controls. At the University of the Arts London (UAL), I have taken a leading role in post-incident reviews, proposing engineering resolutions that prevent recurrence and materially improve the organisation's security posture. I am experienced in managing technical escalations through to successful resolution, raising awareness of security policies, and developing the corresponding procedures that keep security controls effective and sustainable. I bring strong analytical and troubleshooting skills, a drive to learn new technologies, and a self-directed working style that makes me effective in fully remote environments. I am excited by the opportunity to bring this expertise to Admiral Group and contribute to an organisation that places security at the heart of its operations.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Endpoint Management:** CrowdStrike Falcon (Next-Generation SIEM (NG-SIEM), EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Tanium, Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Web Application and Perimeter Protection:** Check Point Harmony Firewall, web application firewall (WAF) principles, Mimecast email security
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel, CrowdStrike NG-SIEM, Splunk; Kusto Query Language (KQL), automated playbook development, detection rule engineering
- **Incident Response and Post-Incident Engineering:** NIST 800-61 incident response framework, MITRE ATT&CK framework, root cause analysis, lessons-learned reviews, engineering-led remediation
- **Identity and Access Management / Privileged Access Management (PAM):** BeyondTrust PAM, Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), role-based access control (RBAC)
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus
- **Scripting and Automation:** PowerShell, SOAR automation, KQL
- **Microsoft Security Stack:** Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Azure AD / Entra ID
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) | Senior Cyber Security Analyst (Eng)

March 2025 - Present

- Implement, configure, and guide the continuous evolution of the security technology portfolio, encompassing endpoint detection and response (EDR), Security Information and Event Management (SIEM), Privileged Access Management (PAM), vulnerability management, and identity security platforms across a hybrid environment.
- Take a leading role in post-incident reviews following the NIST 800-61 framework, conducting thorough root cause analysis and proposing engineering resolutions that prevent recurrence and improve results in any future similar incident.
- Champion best practice methods for web application hosting and protection, endpoint management, and software-defined security controls, producing practical guidance for infrastructure and development teams.

- Manage technical escalations from the security operations team through to successful resolution, drawing on strong analytical and troubleshooting skills to resolve complex, multi-vector security incidents.
- Raise awareness of security policies across the organisation and develop corresponding procedures that ensure controls are understood, implemented consistently, and auditable.
- Administer CrowdStrike Falcon EDR and NG-SIEM, including sensor deployment, detection tuning, and custom indicator of compromise (IOC) management for an 8,000-user estate.
- Lead the Microsoft Defender for Endpoint deployment and ongoing management across 8,000+ devices, configuring attack surface reduction (ASR) rules and automated investigation and remediation capabilities.
- Engineer detection rules and SOAR automation playbooks in Microsoft Sentinel using KQL, reducing mean time to detect by 35% and mean time to respond by 30%.
- Configure Azure AD / Entra ID Conditional Access, MFA, and SSO to protect remote and hybrid worker access and enforce identity-centric security controls.
- Manage the vulnerability management programme using Pentra BAS, Tenable.io, and AppCheck, communicating risk-prioritised findings to infrastructure teams and tracking remediation to closure.

University of the Arts, London (UAL) Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and investigated security alerts across SIEM, EDR, and email security platforms, escalating high-severity incidents and contributing to end-to-end incident resolution.
- Supported post-incident reviews, producing lessons-learned documentation and contributing to engineering improvements that reduced the likelihood and impact of recurring incident types.
- Maintained and tuned Check Point Harmony Firewall and Mimecast email security, reviewing rule sets and updating configurations to address emerging threats.
- Managed Intune MDM and MAM policies across staff and student devices, enforcing compliant and secure access and supporting the bring-your-own-device (BYOD) programme.
- Conducted vulnerability assessments using Nessus and coordinated remediation with infrastructure teams, maintaining measurable improvements in patching compliance.
- Contributed to Azure AD identity governance, conducting access reviews, managing RBAC assignments, and remediating stale accounts in line with least-privilege principles.
- Developed and maintained security runbooks, playbooks, and standard operating procedures to codify best practices and accelerate future incident response.

HEX Solutions Ltd (SaaS/FinTech) Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Maintained and hardened security controls across SaaS cloud and on-premises infrastructure, including endpoint protection, firewall configuration, and network segmentation.
- Managed user identity and access provisioning, enforcing role-based access controls to protect sensitive data within a regulated FinTech platform.
- Responded to security incidents, conducted root cause analysis, and implemented engineering corrections to prevent recurrence and strengthen the overall security posture.
- Supported patch management, system hardening, and security quality assurance activities to maintain a consistent, auditable security baseline.
- Contributed to infrastructure monitoring and alerting, improving visibility of security events across the technology estate.

KEY ACHIEVEMENTS

- Led post-incident engineering reviews that resulted in five material improvements to detection and containment capabilities across the UAL security technology portfolio.
- Deployed Microsoft Defender for Endpoint across 8,000+ devices, achieving full endpoint telemetry coverage and eliminating a class of undetected endpoint threats.
- Developed SOAR automation playbooks that reduced average incident triage time by approximately 30%, enabling faster containment and reduced analyst fatigue.
- Reduced SIEM false positive alert volume by over 40% through systematic detection tuning, improving analyst focus on genuine threats.
- Championed Cyber Essentials Plus certification renewal across the organisation, coordinating evidence collection and achieving recertification on schedule.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
