PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon and SIEM Specialist

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with expert-level CrowdStrike Falcon platform experience and a strong background in Security Information and Event Management (SIEM) engineering and security operations. Over five years of hands-on experience at University of the Arts London (UAL) have given me end-to-end ownership of CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Falcon Endpoint Detection and Response (EDR), Falcon Prevent, Falcon Insight, Falcon Discover and Falcon Spotlight, supporting an estate of 8,000 users. Alongside this, I engineer and operate Microsoft Sentinel, developing KQL (Kusto Query Language) detection rules, Security Orchestration, Automation and Response (SOAR) automation and analytical dashboards to drive efficient security operations. I am proficient in incident response, threat hunting, vulnerability management and identity security, and I am seeking a Senior Cyber Security Engineer role where I can apply deep CrowdStrike and SIEM expertise to protect a hybrid London organisation.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon Platform (Expert):** Falcon NG-SIEM, Falcon Prevent (Endpoint Protection Platform), Falcon Insight (Endpoint Detection and Response), Falcon Discover (asset management), Falcon Spotlight (vulnerability management), CrowdStrike Query Language (CQL), CrowdStrike Fusion SOAR
- **SIEM Engineering:** Microsoft Sentinel, KQL detection rule development, log source onboarding, SOAR playbooks, analytical workbooks and dashboards
- **Detection Engineering and Threat Hunting:** MITRE ATT&CK-based detection design, alert tuning, proactive threat hunting, Indicators of Compromise (IOC) analysis
- **Microsoft Security Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Azure Active Directory (Microsoft Entra ID), Conditional Access, Multi-Factor Authentication (MFA)
- **Incident Response:** NIST 800-61, end-to-end incident lifecycle management, SOAR-driven automation, post-incident review
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Privileged Access and Identity:** BeyondTrust Privileged Access Management (PAM), least-privilege access, just-in-time (JIT) provisioning, Entra ID governance
- **Perimeter and Email Security:** Check Point Harmony firewall, Mimecast, Intune MDM/MAM
- **Scripting and Automation:** PowerShell, KQL, SOAR playbook engineering
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Serve as the primary technical owner of the CrowdStrike Falcon platform across the 8,000-user estate, overseeing Falcon NG-SIEM, Falcon Prevent (endpoint protection), Falcon Insight (EDR), Falcon Discover (asset management) and Falcon Spotlight (vulnerability management).
- Engineer detection use cases within CrowdStrike Falcon NG-SIEM using CrowdStrike Query Language (CQL), creating high-fidelity alerts for ransomware, credential theft, lateral movement and privilege escalation aligned to MITRE ATT&CK.
- Operate and continuously improve Microsoft Sentinel as a complementary SIEM platform, authoring KQL detection rules, building analytical workbooks and developing SOAR playbooks to automate alert enrichment and response workflows.
- Lead proactive threat hunting across endpoint, identity and cloud environments using CrowdStrike Falcon Insight and Microsoft Defender for Identity (MDI), identifying attacker presence and undetected activity before escalation.

- Manage security incident response in line with NIST 800-61, coordinating cross-functional teams through triage, containment, eradication, recovery and post-incident review for critical incidents.
- Administer Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) alongside CrowdStrike, ensuring layered detection coverage across endpoint and identity attack surfaces.
- Govern Azure Active Directory (Microsoft Entra ID) including Conditional Access policies, MFA enforcement and SSO configuration for cloud and hybrid applications.
- Manage BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access controls and just-in-time provisioning for privileged accounts, reducing insider threat and lateral movement risk.
- Deliver vulnerability management using Tenable.io, Pentera BAS and AppCheck, correlating vulnerability data with CrowdStrike Falcon Spotlight findings to prioritise remediation effectively.
- Administer Check Point Harmony firewall and Mimecast email security, maintaining network perimeter controls and defending against phishing and business email compromise threats.

University of the Arts, London (UAL) - Cyber Security and Identity *March 2022 - March 2025*

Cyber Security Analyst

- Performed hands-on alert triage and threat investigation across CrowdStrike Falcon Insight and Microsoft Sentinel, working across tier-2 and tier-3 cases to investigate endpoint, identity and network threats.
- Developed Microsoft Sentinel KQL detection rules and dashboards, increasing detection fidelity for cloud account compromise, endpoint malware and lateral movement scenarios.
- Supported the phased deployment and configuration of Microsoft Defender for Endpoint (MDE) to 8,000 Windows and macOS endpoints, including policy tuning and alert exclusion management.
- Managed Azure Active Directory identity governance, delivering Conditional Access policy rollout, MFA enforcement and SSO integrations for hybrid identity environments.
- Conducted vulnerability assessments using Tenable.io and Nessus, generating risk-rated remediation reports and tracking closure with asset owners.
- Contributed to security incident response operations aligned with NIST 800-61 for incidents including phishing, malware, account takeover and insider threat.
- Administered Tanium endpoint management for real-time asset interrogation, patch compliance and software asset management.
- Maintained Intune MDM and MAM policies for Windows, iOS and Android devices, enforcing corporate data protection and application control policies.

HICX Solutions Ltd (SaaS/FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Delivered security and infrastructure engineering for a SaaS supplier management platform, supporting a cloud-hosted and on-premises environment for financial services clients.
- Configured and maintained firewall rules, VPN and network access controls to protect SaaS platform infrastructure from unauthorised access.
- Applied CIS Controls hardening to server and endpoint infrastructure, reducing the attack surface and improving compliance posture.
- Administered Microsoft 365 including Azure Active Directory, Exchange Online, Teams and SharePoint, managing user lifecycle and access permissions.
- Performed vulnerability identification and remediation coordination, working with development and infrastructure teams to resolve security deficiencies.
- Developed PowerShell scripts to automate security and infrastructure operations, improving consistency and reducing manual error.

KEY ACHIEVEMENTS

- Achieved expert-level CrowdStrike Falcon platform ownership, managing all Falcon modules (NG-SIEM, Prevent, Insight, Discover, Spotlight) at enterprise scale for an 8,000-user organisation.
- Built a comprehensive detection library in CrowdStrike Falcon NG-SIEM and Microsoft Sentinel covering over 50 MITRE ATT&CK-aligned use cases, materially improving mean time to detect (MTTD).
- Deployed Pentera Breach and Attack Simulation (BAS) to validate CrowdStrike and Sentinel detection coverage against real-world attack scenarios, enabling continuous detection improvement.

- Delivered SOAR automation in Microsoft Sentinel, automating repetitive alert triage workflows and reducing analyst workload significantly across high-volume SIEM alerts.
- Attained Certified Information Systems Security Professional (CISSP) certification while simultaneously holding senior security engineering responsibilities full-time.
- Supported organisation's Cyber Essentials Plus certification renewal, demonstrating compliance with UK government cyber security baseline requirements.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
