PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR) | Hybrid, London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, operating, and continuously improving enterprise security platforms. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) engineering, Endpoint Detection and Response (EDR) alert triage and response, and identity and access management using technologies such as Microsoft Entra ID and Okta. At the University of the Arts London I have led the deployment and optimisation of CrowdStrike Falcon across an estate of 8,000 users, built detection logic in Microsoft Sentinel using Kusto Query Language (KQL), and driven vulnerability remediation programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS). I am equally comfortable managing firewall policy, Web Application Firewall (WAF) rules, and email and web gateway controls as I am handling end-to-end incident response under the NIST 800-61 framework. I am looking for a permanent, hybrid Senior Cyber Security Engineer role in the City of London where I can contribute my depth of SIEM, EDR, and identity tooling expertise to a high-performing security team.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** Microsoft Sentinel (KQL), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk (SPL), detection rule development, alert tuning, and SOAR playbook automation
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, CrowdStrike Falcon Insight, CrowdStrike Falcon Discover, threat hunting, and EDR/XDR alert triage
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Okta, Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO)
- **Vulnerability Management:** Tenable.io, Nessus, Pentera BAS, AppCheck, vulnerability prioritisation and remediation tracking, penetration test finding remediation
- **Email and Web Security:** Mimecast, Check Point Harmony, web gateway management, and anti-phishing controls
- **Firewall and Network Security:** Check Point Harmony Firewall, Web Application Firewall (WAF), DDoS mitigation policy, firewall rule review and management
- **Privileged Access Management (PAM):** BeyondTrust PAM, privileged account lifecycle management
- **Endpoint and Device Management:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM)
- **Automation and Scripting:** PowerShell scripting, SOAR automation, API integrations
- **Incident Response:** NIST 800-61 Incident Response framework, MITRE ATT&CK framework, forensic investigation, containment and recovery
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) *March 2025 to Present*

Senior Cyber Security Analyst / Engineer

- Lead the engineering, optimisation, and continuous improvement of the CrowdStrike Falcon platform across an 8,000-user estate, encompassing Falcon Prevent (next-generation antivirus), Falcon Insight (EDR), Falcon Discover, and Falcon NG-SIEM
- Design, develop, and tune SIEM detection rules in Microsoft Sentinel using KQL to reduce false positives and improve fidelity of alerts across cloud and on-premises log sources

- Administer SOAR playbooks and automated response workflows, reducing mean time to respond (MTTR) to security incidents by integrating ticketing, alerting, and remediation actions
- Manage identity and access controls including Entra ID Conditional Access policies, MFA enforcement, and SSO integrations, ensuring least-privilege access for all user and service accounts
- Oversee firewall rule management and WAF policy reviews in Check Point Harmony, coordinating with network teams to enforce segmentation and perimeter controls
- Lead vulnerability remediation programmes using Tenable.io, AppCheck, and Pentera BAS, prioritising findings from penetration tests and risk assessments for timely remediation
- Perform threat hunting across the EDR and SIEM estate using MITRE ATT&CK tactics, techniques, and procedures (TTPs), proactively identifying threats that evade automated detection
- Drive incident response activity end to end under the NIST 800-61 framework, from detection and triage through containment, eradication, recovery, and post-incident review
- Manage email security controls in Mimecast, including anti-phishing policies, impersonation protection, and inbound/outbound email filtering
- Administer BeyondTrust Privileged Access Management (PAM), managing privileged account onboarding, session recording, and access reviews

University of the Arts, London (UAL) *March 2022 to March 2025*

Cyber Security Analyst, Cyber Security and Identity

- Deployed and configured Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the UAL estate, driving adoption across 8,000 users
- Triaged and investigated SIEM and EDR alerts, escalating incidents and performing root-cause analysis in alignment with the NIST 800-61 incident response lifecycle
- Conducted vulnerability scans using Nessus and Tenable.io, producing risk-rated reports and working with IT teams to track and verify remediation of critical and high-severity findings
- Administered Microsoft Entra ID (Azure Active Directory), managing Conditional Access policies, MFA rollout, and identity lifecycle processes for staff and students
- Supported the management of email and web gateway security controls in Mimecast and Check Point Harmony, reducing phishing and malware delivery rates
- Developed PowerShell scripts to automate security operations tasks including user account auditing, stale device remediation, and compliance reporting
- Contributed to the organisation's achievement and maintenance of Cyber Essentials Plus certification, mapping controls to the CIS Controls and NIST Cybersecurity Framework (CSF)
- Managed Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies, enforcing device compliance and data protection controls for mobile endpoints

HICX Solutions Ltd (Software as a Service / FinTech) *February 2021 to March 2022*

IT Engineer: Security, Quality and Infrastructure

- Administered cloud and on-premises infrastructure security controls, supporting the organisation's ISO 27001 information security management programme
- Performed security monitoring, alert triage, and vulnerability assessments across the SaaS platform, coordinating remediation with development and infrastructure teams
- Managed endpoint security tooling and identity controls, including Active Directory administration, MFA enforcement, and privileged access reviews
- Supported IT quality assurance processes, contributing to internal audits, risk assessments, and security incident documentation
- Deployed and maintained network security controls and endpoint protection, ensuring alignment with ISO 27001 and internal security policy requirements

KEY ACHIEVEMENTS

- Delivered full-estate CrowdStrike Falcon EDR deployment across 8,000 UAL users, becoming the in-house subject matter expert for Falcon Prevent, Insight, Discover, and NG-SIEM
- Reduced SIEM alert noise by over 40% through systematic detection rule tuning and false-positive reduction in Microsoft Sentinel and CrowdStrike NG-SIEM

- Automated repetitive security operations tasks via PowerShell and SOAR playbooks, saving the team an estimated 10+ hours per week in manual investigation and reporting effort
- Led penetration test remediation cycles for UAL, ensuring all critical and high-severity findings from external assessments were resolved within agreed Service Level Agreement (SLA) timescales
- Maintained UAL's Cyber Essentials Plus certification, demonstrating continuous compliance with the UK National Cyber Security Centre (NCSC) baseline controls framework
- Built and maintained comprehensive KQL-based detection content in Microsoft Sentinel aligned to MITRE ATT&CK, improving detection coverage across identity, endpoint, and cloud attack surfaces

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
