PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM), Security Operations and Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience designing, engineering and managing enterprise security operations across complex hybrid environments. I specialise in Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR) and Endpoint Detection and Response (EDR) platforms, with expert-level proficiency in CrowdStrike Falcon and strong hands-on experience with Microsoft Sentinel. I have a solid track record delivering Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions at scale across 8,000-user environments, alongside structured vulnerability management programmes using industry-leading scanning tools. I bring well-rounded firewall, Web Application Firewall (WAF) and gateway management skills, and I am experienced in leading Incident Response (IR) investigations aligned to the National Institute of Standards and Technology (NIST) 800-61 framework. I am seeking a hybrid Senior Cyber Security Engineer opportunity in the City of London where I can bring technical depth and operational rigour to a focused security team.

CORE SKILLS AND TECHNICAL STACK

- **SIEM / SOAR / EDR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; Microsoft Sentinel with Kusto Query Language (KQL); Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender; Splunk / Security Processing Language (SPL)
- **Firewall and Gateway Security:** Check Point Harmony Endpoint and Firewall management; WAF and Distributed Denial-of-Service (DDoS) mitigation; Mimecast email security gateway; network security policy design and tuning
- **Identity, Access and MFA/SSO:** Azure Active Directory (Azure AD) / Entra Identity (Entra ID); Conditional Access policy design; MFA rollout and SSO federation; BeyondTrust Privileged Access Management (PAM)
- **MDM / MAM and Endpoint Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM); Tanium endpoint management; CrowdStrike Falcon Prevent
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS); Tenable.io; AppCheck; Nessus; structured remediation tracking and risk reporting
- **Incident Response and Threat Hunting:** NIST 800-61 IR lifecycle; MITRE ATT&CK framework alignment; detection engineering; threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF); Center for Internet Security (CIS) Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting; SOAR automation and playbook development

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Architect and manage the enterprise SIEM/SOAR environment using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, writing custom Kusto Query Language (KQL) detection rules aligned to the MITRE ATT&CK framework to improve threat visibility across the estate.
- Lead the operation and tuning of Endpoint Detection and Response (EDR) via CrowdStrike Falcon Prevent and Insight, reducing false positives by refining detection logic and improving analyst alert quality.
- Manage Web Application Firewall (WAF), gateway security policies and firewall rule sets via Check Point Harmony, ensuring outbound and inbound traffic controls are enforced and aligned with security baselines.
- Oversee Multi-Factor Authentication (MFA) and Single Sign-On (SSO) configuration across the Azure Active Directory (Entra ID) estate using Conditional Access policies, enforcing least-privilege access for all user populations.
- Administer Mobile Device Management (MDM) and Mobile Application Management (MAM) policies via Microsoft Intune across corporate and bring-your-own-device (BYOD) endpoints.

- Conduct structured vulnerability scanning and risk-based remediation management using Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck and Nessus, reporting findings to senior stakeholders with prioritised remediation plans.
- Lead Incident Response (IR) investigations following the NIST 800-61 framework, coordinating containment, eradication and recovery activities and producing post-incident reports with lessons-learned actions.
- Oversee the BeyondTrust Privileged Access Management (PAM) platform, ensuring privileged account governance is maintained and audit trails are complete.

University of the Arts, London (UAL) *March 2022 - March 2025*
Cyber Security Analyst, Cyber Security and Identity

- Deployed and operationalised Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user environment, including policy configuration, onboarding and ongoing alert triage and investigation.
- Performed day-to-day SIEM alert triage, correlation and investigation using Microsoft Sentinel and CrowdStrike Falcon, escalating confirmed incidents and maintaining the IR log in line with NIST 800-61 procedures.
- Conducted threat hunting campaigns using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying suspicious behaviours mapped to MITRE ATT&CK techniques and informing detection rule improvements.
- Supported the design and delivery of Conditional Access and Azure AD Identity Protection policies, strengthening authentication controls and reducing the organisation's exposure to credential-based attacks.
- Managed Mimecast email security gateway configuration, tuning anti-phishing, anti-spam and impersonation policies to reduce phishing exposure.
- Ran vulnerability scanning cycles using Tenable.io and Nessus, triaging results against the organisation's risk appetite and coordinating patch remediation across IT operations teams.
- Automated repetitive security operations tasks using PowerShell scripting, reducing analyst manual effort and improving consistency of response actions.

HICX Solutions Ltd (SaaS/FinTech) *February 2021 - March 2022*
IT Engineer: Security, Quality and Infrastructure

- Managed security tooling and endpoint protection across the HICX SaaS and FinTech infrastructure, including EDR configuration, firewall policy management and user access governance.
- Supported the implementation and day-to-day administration of MDM policies for corporate devices, enforcing compliance baselines and maintaining device inventory.
- Conducted security quality assurance reviews and infrastructure risk assessments, contributing to the organisation's ISO 27001-aligned security programme.
- Assisted with SSO federation and identity management tasks for the corporate IT estate, coordinating with vendors on MFA rollout and access policy configuration.
- Provided third-line technical support for security-related infrastructure issues, including firewall rule investigation, endpoint agent troubleshooting and security event escalation.

KEY ACHIEVEMENTS

- Deployed and operationalised Microsoft Defender for Endpoint and Identity across an 8,000-user estate at UAL, significantly improving endpoint threat visibility and reducing mean time to detect.
- Developed CrowdStrike Falcon NG-SIEM and Microsoft Sentinel detection content aligned to the MITRE ATT&CK framework, improving detection coverage across the SIEM/SOAR/EDR stack.
- Led end-to-end Incident Response (IR) investigations, applying the NIST 800-61 lifecycle from initial triage through containment, eradication, recovery and lessons-learned reporting.
- Implemented BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access across the enterprise, closing a significant privilege escalation risk.
- Designed and maintained Conditional Access and MFA policies across Azure Active Directory / Entra ID, strengthening identity security for all user populations including privileged accounts.
- Delivered structured vulnerability management programmes using Pentera BAS, Tenable.io, AppCheck and Nessus, enabling evidence-based prioritisation of remediation activities.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
