

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Vulnerability Management | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of hands-on experience in security operations, endpoint security, and security engineering across enterprise environments. I have deep practical expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) platforms including Microsoft Sentinel, Security Orchestration, Automation and Response (SOAR) tooling, and vulnerability management. I am highly experienced in administering identity and access management (IAM) controls via Microsoft Entra ID (formerly Azure Active Directory), enforcing Multi-Factor Authentication (MFA) and Single Sign-On (SSO), managing Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and operating Privileged Access Management (PAM) solutions through BeyondTrust. I manage email security via Mimecast, firewall policy via Check Point Harmony, and have delivered security awareness training programmes at scale. I am seeking a Cyber Security Engineer opportunity in a hybrid London environment where I can apply my broad technical capabilities to protect critical business systems and data.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) and SIEM:** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, NG-SIEM), Microsoft Sentinel with KQL
- **SOAR and Automation:** SOAR playbook development, PowerShell scripting, automated alert triage and response
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory, Conditional Access, MFA, SSO, Group Policy
- **MDM/MAM:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Email Security:** Mimecast (anti-phishing, anti-malware, impersonation protection)
- **Firewall and Network Security:** Check Point Harmony, IDS/IPS monitoring and response, WAF concepts, network traffic analysis
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Incident Response:** NIST 800-61 methodology, MITRE ATT&CK framework, detection engineering, threat hunting
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Endpoint Management:** Tanium, Microsoft Intune
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Manage, optimise, and tune CrowdStrike Falcon EDR platform across the university's endpoint fleet, configuring prevention policies, custom detections, and hunting queries to identify and respond to threats in real time.
- Operate Microsoft Sentinel SIEM, writing KQL detection rules and building SOAR automation playbooks to accelerate alert triage, investigation, and response for common and advanced threat scenarios.
- Lead incident response activities from initial triage through to containment, eradication, and recovery, working in line with NIST 800-61 procedures and mapping adversary behaviour against the MITRE ATT&CK framework.

- Administer Microsoft Entra ID / Azure Active Directory, managing Conditional Access policies, MFA enforcement, SSO configuration, and Group Policy to protect user identities and access to critical systems.
- Manage MDM and MAM via Microsoft Intune, enforcing compliance and data protection policies across managed devices and ensuring endpoint security standards are consistently applied.
- Operate BeyondTrust Privileged Access Management (PAM) solution, governing privileged account usage, managing session recording, and reducing risk from credential misuse.
- Administer Mimecast email security platform, investigating email-borne threats and tuning anti-phishing, spoofing, and impersonation detection policies.
- Manage Check Point Harmony firewall, maintaining firewall rule sets, reviewing traffic logs, and responding to IDS/IPS alerts and anomalous network activity.
- Lead the vulnerability management programme, using Tenable.io, Nessus, and AppCheck to identify, prioritise, and track vulnerabilities through to remediation.
- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, ensuring comprehensive threat protection across cloud and on-premises infrastructure.
- Deliver security awareness training and phishing simulation campaigns to staff across the organisation.
- Produce technical and management-level security reports, communicating risk posture and trends clearly to stakeholders at all levels.

University of the Arts, London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Carried out daily alert triage and investigation across CrowdStrike Falcon, Microsoft Sentinel, and Mimecast, escalating confirmed incidents in line with the incident response process.
- Supported the deployment of Microsoft Defender for Endpoint (MDE) to an 8,000-user estate, contributing to improved endpoint visibility and reduced alert response times.
- Conducted threat hunting using CrowdStrike Falcon Insight and Discover, identifying anomalous behaviour and indicators of compromise aligned to MITRE ATT&CK techniques.
- Authored PowerShell scripts to automate security operations tasks including log parsing, alert enrichment, and reporting, reducing analyst toil and improving response consistency.
- Supported the administration of Entra ID / Azure Active Directory including Group Policy, Conditional Access, and MFA rollout.
- Managed Microsoft Intune MDM/MAM, maintaining device compliance and enforcing data protection controls.
- Performed vulnerability scanning using Nessus and AppCheck, triaging findings and working with system owners on risk-based remediation plans.
- Contributed to post-incident reviews, improving detection coverage, response playbooks, and team knowledge base documentation.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained security and infrastructure controls for a SaaS-based FinTech supply chain management platform used by global enterprise clients.
- Managed endpoint security, identity management, and network infrastructure, ensuring the availability, integrity, and confidentiality of business systems.
- Conducted vulnerability assessments and supported risk-based remediation, aligning activities with internal security policies and compliance obligations.
- Administered firewall configurations and monitored IDS/IPS alerts, responding promptly to network anomalies and potential intrusion activity.
- Contributed to IT quality assurance processes and security controls documentation, supporting the organisation's overall compliance posture.

KEY ACHIEVEMENTS

- Deployed and configured CrowdStrike Falcon EDR across UAL's entire endpoint estate, establishing real-time threat detection and automated prevention from the ground up.

- Led the rollout of Microsoft Defender for Endpoint (MDE) to 8,000 users, delivering a step-change in endpoint visibility and enabling automated remediation of high-severity threats.
- Built Microsoft Sentinel SOAR playbooks that automated high-volume, repetitive alert triage workflows, allowing the security team to focus analyst time on genuine threats.
- Strengthened identity security by implementing Entra ID Conditional Access and MFA policies, materially reducing the risk of account compromise from phishing and credential theft.
- Deployed Pentera Breach and Attack Simulation (BAS) to continuously validate the effectiveness of security controls, proactively identifying gaps before they could be exploited.
- Maintained a consistent security posture with no significant data breaches across the tenure at UAL through proactive threat hunting, tuning, and rapid incident response.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
