

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM | CrowdStrike | Incident Response | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of progressive experience in enterprise security operations and security engineering. I specialise in deploying, managing, and optimising Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, CrowdStrike Falcon Endpoint Detection and Response (EDR), and Microsoft Defender across complex, multi-site environments. In my current role at the University of the Arts, London, I lead the full security operations lifecycle: alert triage and investigation, threat hunting, SOAR automation, incident response, identity security, and vulnerability management. I have strong hands-on expertise in Multi-Factor Authentication (MFA) and Single Sign-On (SSO) enforcement via Microsoft Entra ID (formerly Azure Active Directory), Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Privileged Access Management (PAM) via BeyondTrust. I also manage email security through Mimecast and have delivered security awareness training to staff across a large organisation. I am seeking a Senior Cyber Security Engineer role in a hybrid London environment where I can apply this expertise to protect critical financial systems and infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and SOAR:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, SOAR automation and playbook development
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, EDR, Insight, Discover), Microsoft Defender for Endpoint (MDE)
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory, Conditional Access, MFA, SSO, Group Policy
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM
- **Privileged Access Management (PAM):** BeyondTrust
- **Email Security:** Mimecast
- **Firewall and Network Security:** Check Point Harmony, IDS/IPS management, network traffic analysis
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting, detection engineering
- **Microsoft Security:** Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Microsoft Defender for Cloud
- **Scripting and Automation:** PowerShell, KQL, SOAR playbook automation
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Endpoint Management:** Tanium, Microsoft Intune, Mobile Device Management (MDM)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Lead the engineering, deployment, and optimisation of CrowdStrike Falcon EDR across the university's entire endpoint estate, including configuration of prevention policies, detection rules, and threat hunting queries via Falcon Insight and Discover.
- Manage and tune the Microsoft Sentinel SIEM platform, authoring custom KQL detection rules and SOAR automation playbooks that have significantly reduced mean time to detect (MTTD) and mean time to respond (MTTR) for security incidents.
- Own the full incident response lifecycle in line with NIST 800-61, from initial triage and containment through to eradication, recovery, and post-incident review, leveraging the MITRE ATT&CK framework for

adversary classification.

- Administer Microsoft Entra ID (Azure Active Directory) including Conditional Access policies, MFA enforcement, SSO configuration, and identity governance, protecting a multi-thousand-user estate.
- Manage MDM and MAM via Microsoft Intune, enforcing device compliance policies, application controls, and data protection across managed and bring-your-own-device (BYOD) endpoints.
- Operate and maintain BeyondTrust Privileged Access Management (PAM) platform, governing privileged account access and reducing the attack surface from credential misuse.
- Manage Mimecast email security platform, tuning anti-phishing, anti-malware, and impersonation protection policies and investigating email-borne threats.
- Administer Check Point Harmony firewall, managing rule sets, monitoring traffic logs, and responding to network-based security alerts including intrusion detection and prevention events.
- Lead the vulnerability management programme using Tenable.io, Nessus, and AppCheck, coordinating remediation activities with infrastructure and development teams and tracking findings to closure.
- Develop and deliver security awareness training across the organisation, creating targeted campaigns to reduce phishing susceptibility and improve the overall security posture.
- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, maintaining advanced threat protection across cloud and on-premises environments.
- Produce executive-level and technical security reports, providing clear risk metrics and trend analysis to senior stakeholders.

University of the Arts, London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed daily alert triage, investigation, and escalation across SIEM, EDR, and email security platforms, maintaining a low false-positive rate through continuous detection tuning.
- Supported and later led the deployment of Microsoft Defender for Endpoint (MDE) to an 8,000-user estate, delivering significantly improved endpoint visibility and reduced incident dwell time.
- Conducted proactive threat hunting using CrowdStrike Falcon Insight, identifying indicators of compromise and adversary techniques aligned to the MITRE ATT&CK framework.
- Developed and maintained PowerShell automation scripts to streamline repetitive security operations tasks, reducing analyst toil and improving consistency of response activities.
- Supported the administration of Entra ID / Azure Active Directory, including Group Policy management, Conditional Access configuration, and MFA rollout across the user estate.
- Managed Microsoft Intune MDM/MAM policies, ensuring consistent device compliance and data protection across the endpoint fleet.
- Assisted with vulnerability scanning using Nessus and AppCheck, triaging findings and coordinating with system owners on prioritised remediation plans.
- Contributed to security incident investigations and after-action reviews, helping to improve detection rules, playbooks, and response procedures.
- Supported delivery of security awareness training content and phishing simulation campaigns.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained security controls and network infrastructure for a SaaS-based FinTech supply chain management platform serving enterprise clients.
- Managed endpoint security, identity and access management, and IT infrastructure, ensuring availability and integrity of business systems.
- Conducted vulnerability assessments and supported remediation activities, aligning work with internal security policies and compliance requirements.
- Supported security quality assurance processes, contributing to the improvement of security procedures and controls documentation.
- Administered network and system configurations, firewall rule management, and monitored IDS/IPS alerts to protect platform availability.

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment and configuration of CrowdStrike Falcon EDR across UAL's endpoint estate, establishing a mature threat detection capability from a greenfield state.
- Delivered the rollout of Microsoft Defender for Endpoint (MDE) to 8,000 users, dramatically improving endpoint security visibility and enabling automated response to high-severity threats.
- Engineered SOAR automation playbooks within Microsoft Sentinel that reduced alert triage time by automating repetitive investigation steps across common threat scenarios.
- Designed and deployed Conditional Access and MFA policies via Entra ID that significantly reduced identity-based attack success rates, including phishing-driven credential compromise.
- Maintained zero significant data breaches across the tenured period at UAL by establishing a proactive threat hunting practice and tightening EDR prevention policies.
- Implemented Pentera Breach and Attack Simulation (BAS) to continuously validate security controls, identifying and remediating gaps before they could be exploited.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
