

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, EDR and Endpoint Security Specialist

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience protecting complex enterprise environments using Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), and cloud identity platforms. I bring expert-level proficiency with CrowdStrike Falcon, covering Next-Generation SIEM (NG-SIEM), EDR (Falcon Prevent, Insight and Discover), alongside deep experience with Entra ID (formerly Azure Active Directory), Microsoft Intune, and Mimecast email security. My background spans alert triage, Security Orchestration, Automation and Response (SOAR), detection engineering, and vulnerability management using tools such as Rapid7 InsightVM and InsightIDR. I thrive in fast-paced, high-stakes environments and am adept at working hybrid shift patterns while maintaining high standards of incident response and security operations. I am a Certified Information Systems Security Professional (CISSP) and hold CompTIA Security+ alongside Microsoft and Google certifications.

CORE SKILLS AND TECHNICAL STACK

- **EDR and SIEM:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Microsoft Sentinel with Kusto Query Language (KQL), Splunk with Search Processing Language (SPL)
- **Endpoint and Email Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Mimecast, Intune / Mobile Device Management (MDM) / Mobile Application Management (MAM)
- **Identity and Access Management:** Entra ID / Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Okta, Duo, BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management and Pen Testing:** Rapid7 InsightVM and InsightIDR, Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Network and Infrastructure Security:** Palo Alto firewalls, Check Point Harmony, Tanium
- **Automation and Scripting:** PowerShell, SOAR playbook development
- **Frameworks:** NIST 800-61 Incident Response, MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead threat detection and alert triage operations using CrowdStrike Falcon NG-SIEM and EDR across an 8,000-user environment, reducing mean time to respond (MTTR) through SOAR automation and custom detection rules.
- Manage CrowdStrike Falcon Prevent and Insight to identify and block advanced persistent threats (APTs), leveraging MITRE ATT&CK mapping to prioritise response actions and close detection gaps.
- Administer and optimise Microsoft Sentinel with KQL-based detection rules, alerts and dashboards for continuous monitoring of identity, endpoint and cloud activity.
- Oversee enterprise-wide Entra ID, Conditional Access and MFA policies, protecting hybrid on-premises and Azure environments from identity-based threats.
- Conduct vulnerability management cycles using Tenable.io and Pentera BAS, coordinating remediation with IT teams and producing executive risk reports.
- Develop and tune SOAR playbooks in response to phishing, malware and data exfiltration scenarios, integrating Mimecast email security telemetry for faster triage.
- Mentor junior analysts in alert investigation workflows, SIEM query writing and structured incident handling aligned to NIST 800-61.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Performed day-to-day SIEM alert triage, incident investigation and response using CrowdStrike Falcon and Microsoft Defender for Endpoint, following NIST 800-61 and MITRE ATT&CK frameworks.
- Administered Entra ID, Conditional Access policies, MFA roll-out and Single Sign-On (SSO) integrations, supporting secure authentication for staff and students across the university.
- Managed endpoint security deployments through Intune MDM and MAM, enforcing device compliance and application control policies.
- Supported BeyondTrust PAM implementation to manage privileged account lifecycle and audit access to critical systems.
- Ran vulnerability scanning campaigns with Tenable.io and Nessus, triaging findings and tracking remediation to closure within agreed SLAs.
- Produced threat intelligence reports aligned to MITRE ATT&CK, supporting proactive threat hunting and detection engineering improvements.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / Financial Technology)

- Implemented and managed endpoint security tooling and network security controls across a SaaS FinTech environment, reducing the organisation's attack surface.
- Conducted access reviews and identity governance tasks, ensuring principle of least privilege across cloud and on-premises systems.
- Supported security quality assurance processes including vulnerability assessments, configuration reviews and security documentation aligned to ISO 27001.
- Maintained and monitored infrastructure security using PowerShell scripts and log analysis tools, providing early detection of anomalous activity.

KEY ACHIEVEMENTS

- Led the full deployment and configuration of CrowdStrike Falcon EDR and NG-SIEM across an 8,000-user estate at UAL, achieving complete endpoint visibility within the first 90 days.
- Authored and deployed over 40 custom SOAR playbooks, cutting average alert response time by 35% and freeing analyst capacity for proactive threat hunting.
- Designed a Rapid7 InsightIDR integration with existing SIEM tooling to correlate vulnerability findings with active exploitation data, enabling risk-prioritised patching.
- Delivered NIST CSF gap assessment and subsequent roadmap that achieved Cyber Essentials Plus recertification for UAL ahead of schedule.
- Reduced privileged account sprawl by 60% through BeyondTrust PAM governance programme, eliminating standing admin access across key server infrastructure.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
