

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike, SIEM/SOAR, EDR/XDR and Enterprise Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with more than five years of hands-on experience securing large-scale enterprise environments. My expertise centres on CrowdStrike Falcon, Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) platforms. I have a strong track record in managing enterprise firewalls, email and web security gateways including Mimecast, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) via Microsoft Entra ID, and Mobile Device and Mobile Application Management (MDM/MAM) through Microsoft Intune. I bring practical experience in vulnerability scanning and remediation, Privileged Access Management (PAM), penetration test finding remediation, and delivering security awareness training, making me well placed to take technical ownership in a focused, high-impact security team within a global financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Next-Generation SIEM (NG-SIEM), Insight, Discover) - Expert level; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, SOAR playbook development and automation; alert triage, detection engineering and correlation rule tuning
- **Email and Web Security:** Mimecast email security gateway; web gateway filtering and policy management
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA, SSO; Okta-adjacent federation and identity governance
- **MDM/MAM:** Microsoft Intune endpoint compliance, device enrolment, mobile application policies
- **Firewalls and Network Security:** Check Point Harmony firewall; Palo Alto Networks and Cisco firewall management; WAF/DDoS protection; IDS/IPS configuration and tuning
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS); scan-to-remediation lifecycle management
- **PAM:** BeyondTrust Privileged Access Management; least-privilege enforcement, session recording and privileged account audit
- **Incident Response:** NIST SP 800-61 incident response lifecycle; MITRE ATT&CK framework-aligned investigation and containment
- **Scripting and Automation:** PowerShell; Python; Logic Apps; SOAR playbook authoring
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead technical ownership of CrowdStrike Falcon across the enterprise, administering EDR, Prevent, NG-SIEM, Insight and Discover modules to deliver continuous threat visibility and automated prevention across a complex hybrid infrastructure.
- Manage and optimise SIEM/SOAR platforms including Microsoft Sentinel, authoring detection rules in KQL, building SOAR playbooks and tuning correlation rules to reduce alert noise and improve fidelity of security alerts.
- Oversee EDR/XDR alert response workflows, conducting alert triage, investigation and escalation in line with NIST SP 800-61 incident response procedures and MITRE ATT&CK-mapped threat intelligence.

- Administer enterprise email and web security gateways via Mimecast, configuring policies to block phishing campaigns, Business Email Compromise (BEC) and malware delivery.
- Manage Microsoft Entra ID (formerly Azure AD) and Conditional Access policies, enforcing MFA and SSO across more than 8,000 users to protect identity and reduce unauthorised access risk.
- Administer MDM/MAM solutions through Microsoft Intune, enforcing device compliance, controlling application access on managed and unmanaged devices and ensuring secure remote working configurations.
- Execute vulnerability scans using Tenable.io, Nessus and AppCheck, prioritise findings by risk and lead remediation in coordination with infrastructure teams; use Pentra BAS to validate control effectiveness continuously.
- Manage BeyondTrust PAM, enforcing least-privilege principles, auditing privileged session activity and controlling access to critical systems and service accounts.
- Manage enterprise firewall rules and perimeter security controls including WAF/DDoS and IDS/IPS, tuning policies to block threats while maintaining operational availability.
- Manage security certificate lifecycle, including renewal and monitoring of SSL/TLS certificates across internal and external systems.
- Remediate penetration test findings, coordinating with the security and infrastructure team to close identified vulnerabilities within agreed risk timelines.
- Design and deliver security awareness training programmes including phishing simulation campaigns to build a security-conscious culture across the organisation.
- Contribute to the NIST Cybersecurity Framework (CSF), CIS Controls and Cyber Essentials Plus compliance programmes, performing gap analysis and implementing compensating controls.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Monitored and investigated security alerts from SIEM and EDR platforms including CrowdStrike Falcon and Microsoft Sentinel, triaging incidents and conducting detailed investigation and containment activities.
- Supported CrowdStrike Falcon EDR policy management, host group configuration and threat hunting using Falcon Discover and Falcon Insight modules.
- Managed Mimecast policies and conducted email threat analysis, identifying and blocking malicious senders, spoofed domains and credential-harvesting campaigns.
- Administered Microsoft Entra ID and Azure AD, implementing Conditional Access policies and MFA rollout across user populations to strengthen identity security.
- Supported MDM/MAM configuration in Microsoft Intune, including device enrolment, compliance policy enforcement and mobile application management.
- Conducted vulnerability assessments using Nessus and AppCheck, tracking identified vulnerabilities and supporting remediation activities across Windows and Linux infrastructure.
- Assisted in BeyondTrust PAM administration, managing privileged account onboarding, session monitoring and access review processes.
- Contributed to incident response activities, supporting triage, root cause analysis and post-incident reporting in line with the organisation's security operations procedures.
- Supported Cyber Essentials Plus certification by gathering evidence of compliance controls and assisting with remediation of gaps identified during pre-assessment reviews.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software-as-a-Service / Financial Technology)

- Configured and maintained enterprise firewall rules and network security policies across cloud and on-premises infrastructure to protect sensitive supplier and financial data.
- Supported SIEM monitoring and log analysis for early detection of anomalous behaviour and potential security incidents across cloud environments.
- Administered endpoint security controls including EDR tooling and patch compliance processes to reduce attack surface across a cloud-first environment.
- Managed MFA and identity access controls, supporting SSO integration and access governance for internal and customer-facing systems.

- Contributed to vulnerability management and quality assurance activities, performing risk assessments and supporting remediation of identified weaknesses.
- Supported infrastructure security hardening and compliance with financial services data protection requirements.

KEY ACHIEVEMENTS

- Led the enterprise-wide CrowdStrike Falcon deployment and optimisation across a hybrid 8,000-user environment, delivering expert-level EDR, NG-SIEM and threat prevention capabilities that reduced mean time to detect (MTTD) and mean time to respond (MTTR) to security incidents.
- Deployed and configured Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across 8,000+ users, delivering comprehensive endpoint, identity and cloud application protection.
- Developed automated SOAR playbooks in Microsoft Sentinel, significantly reducing manual alert triage workload and accelerating incident containment timelines across the security operations function.
- Delivered the BeyondTrust PAM rollout organisation-wide, enforcing least-privilege access principles, auditing privileged sessions and eliminating uncontrolled service account usage.
- Achieved and maintained Cyber Essentials Plus certification through rigorous control implementation, vulnerability remediation and evidence-based assurance activities.
- Implemented Pentera Breach and Attack Simulation (BAS) to continuously validate the effectiveness of security controls, identifying and remediating gaps before adversaries could exploit them.

EDUCATION

- Master of Science (M.Sc.), Environmental and Resource Engineering
- Bachelor of Science (B.Sc.), Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
