

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, SOAR, EDR, Firewalls, PAM and Enterprise Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with more than five years of hands-on experience implementing and maintaining robust security across complex enterprise infrastructures. My work spans Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR), Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, email and web security gateways, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Mobile Device Management and Mobile Application Management (MDM/MAM). I hold deep expertise in CrowdStrike Falcon, Microsoft Entra ID, Azure Active Directory (Azure AD) and Group Policy, Microsoft Intune, Mimecast, BeyondTrust Privileged Access Management (PAM), and vulnerability scanning and remediation tools including Tenable.io, Nessus, AppCheck and Pentera Breach and Attack Simulation (BAS). I have a proven record of remediating penetration test findings, delivering security awareness programmes and driving measurable security improvements within a structured, high-pressure IT security team, making me well placed to join a focused financial services security function as a senior technical contributor.

CORE SKILLS AND TECHNICAL STACK

- **EDR/SIEM/SOAR:** CrowdStrike Falcon (EDR, Prevent, Next-Generation SIEM (NG-SIEM), Insight, Discover); Microsoft Sentinel with Kusto Query Language (KQL); SOAR automation playbooks; alert triage and detection rule engineering
- **Firewalls and Perimeter Security:** Check Point Harmony firewall; WAF/DDoS protection; Intrusion Detection and Prevention Systems (IDS/IPS); network security policy management
- **Email and Web Security Gateways:** Mimecast email security; web filtering and content gateway administration
- **Identity and Access Management:** Microsoft Entra ID / Azure AD / Group Policy; MFA and SSO implementation; Conditional Access policy engineering; Okta-adjacent federation
- **MDM/MAM:** Microsoft Intune; device enrolment, compliance policies, mobile application management
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera BAS; scan-to-remediation lifecycle; penetration test finding remediation
- **PAM:** BeyondTrust Privileged Access Management; least-privilege enforcement; privileged session recording and auditing
- **Incident Response:** NIST SP 800-61 incident response lifecycle; MITRE ATT&CK framework-aligned investigation, containment and eradication
- **Scripting and Automation:** PowerShell; Python; Microsoft Logic Apps
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Take technical ownership of enterprise SIEM/SOAR operations, managing Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, building KQL detection rules and automated SOAR playbooks to accelerate alert triage and incident response.
- Administer and optimise CrowdStrike Falcon EDR and Prevent across the enterprise, managing host groups, prevention policies and real-time response capabilities to protect endpoints against advanced threats.
- Manage WAF/DDoS protection and perimeter security controls, tuning policies and rules to block web-layer attacks while maintaining service availability.

- Oversee IDS/IPS infrastructure, reviewing and updating detection signatures and thresholds to maintain accurate and actionable alerting.
- Administer email and web security gateways via Mimecast, configuring anti-phishing, anti-spoofing and malware detection policies and investigating gateway alert incidents.
- Manage Microsoft Entra ID (formerly Azure AD) and Group Policy, enforcing Conditional Access policies, MFA and SSO across more than 8,000 users to strengthen identity security and reduce unauthorised access risk.
- Administer MDM/MAM solutions through Microsoft Intune, managing device enrolment, compliance profiles and mobile application policies for managed and Bring Your Own Device (BYOD) endpoints.
- Execute vulnerability scans using Tenable.io, Nessus and AppCheck; prioritise findings by risk and business impact; lead remediation in coordination with infrastructure teams and track progress to closure.
- Use Pentera BAS to continuously simulate adversary attack paths and validate the effectiveness of security controls, identifying and remediating gaps proactively.
- Manage BeyondTrust PAM, enforcing least-privilege access, auditing privileged sessions and controlling access to critical infrastructure and service accounts.
- Manage security certificate lifecycle including SSL/TLS certificate renewal, monitoring and replacement across internal and external-facing systems.
- Remediate penetration test findings, coordinating with infrastructure and application teams to close identified vulnerabilities within agreed risk timelines.
- Design and deliver security awareness training and phishing simulation campaigns, measuring engagement and improving security culture across the organisation.
- Contribute to ad-hoc security architecture projects, evaluating new tools, drafting security design proposals and supporting strategic control improvements.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Monitored SIEM and EDR platforms including Microsoft Sentinel and CrowdStrike Falcon, triaging and investigating security alerts and escalating incidents with clear, evidenced recommendations.
- Managed CrowdStrike Falcon EDR policies, host group configuration and alert investigation, identifying and remediating endpoint threats including ransomware precursors, lateral movement and credential theft.
- Administered Mimecast email security, managing anti-phishing and anti-spoofing policies, reviewing quarantine queues and investigating email-borne threats.
- Managed Microsoft Entra ID and Azure AD, implementing and maintaining Conditional Access policies and MFA across user populations to protect identity and reduce account compromise risk.
- Supported MDM/MAM deployment via Microsoft Intune, including device enrolment, compliance policy configuration and mobile application protection policies.
- Conducted vulnerability assessments using Nessus and AppCheck, tracking identified vulnerabilities and collaborating with infrastructure teams on prioritised remediation.
- Assisted in BeyondTrust PAM administration, managing privileged account onboarding, access reviews and session monitoring.
- Supported WAF, IDS/IPS and perimeter firewall management, reviewing alert logs and recommending policy adjustments.
- Contributed to penetration test remediation activities and supported delivery of security awareness training materials and simulated phishing campaigns.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software-as-a-Service / Financial Technology)

- Configured and maintained enterprise firewall rules and network security policies, protecting sensitive financial and supplier data across cloud and on-premises environments.
- Supported SIEM monitoring and log analysis, identifying anomalous behaviour and contributing to early detection and escalation of security incidents.
- Administered endpoint security controls including EDR tooling and patch compliance management to reduce attack surface across a cloud-first environment.

- Managed MFA and SSO identity controls, supporting access governance and secure authentication across internal and customer-facing systems.
- Conducted vulnerability assessments and supported remediation of identified weaknesses, contributing to risk reduction across infrastructure and application layers.
- Assisted with security quality assurance and infrastructure hardening initiatives in support of financial services data protection requirements.

KEY ACHIEVEMENTS

- Led enterprise-wide CrowdStrike Falcon deployment and ongoing optimisation across a hybrid 8,000-user environment, delivering expert-level EDR, NG-SIEM and automated prevention capabilities that measurably reduced mean time to detect (MTTD) and mean time to respond (MTTR).
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across more than 8,000 users, delivering integrated endpoint, identity and cloud application protection at scale.
- Developed automated SOAR playbooks in Microsoft Sentinel, reducing manual alert triage workload and accelerating incident containment across the security operations function.
- Delivered the BeyondTrust PAM rollout organisation-wide, eliminating uncontrolled service account usage and enforcing least-privilege access with full privileged session audit trails.
- Achieved and maintained Cyber Essentials Plus certification through rigorous control implementation, vulnerability remediation and evidence-based compliance assurance.
- Implemented Pentera BAS to continuously validate security control effectiveness, identifying and remediating exploitable attack paths before they could be leveraged by adversaries.

EDUCATION

- Master of Science (M.Sc.), Environmental and Resource Engineering
- Bachelor of Science (B.Sc.), Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
