

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike NG-SIEM | Detection Engineering | Security Operations
| CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with expert-level CrowdStrike Falcon capability and a strong track record of engineering and operating enterprise-grade security stacks at scale. In my current role at the University of the Arts, London, I own the security engineering function for an estate of over 8,000 users, leading the full lifecycle of CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation Security Information and Event Management (NG-SIEM), Microsoft Sentinel SIEM with Kusto Query Language (KQL) detection engineering, Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), BeyondTrust Privileged Access Management (PAM), Mimecast email security, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), and Microsoft Entra ID and Azure Active Directory (AD) identity governance. I bring deep experience in Security Orchestration, Automation and Response (SOAR) playbook development, threat hunting, incident response under the NIST 800-61 framework, vulnerability management, and detection rule engineering aligned to the MITRE ATT&CK framework. I hold the Certified Information Systems Security Professional (CISSP) certification and have the seniority, technical depth, and commercial awareness to operate as the senior security engineering resource in a demanding financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon Platform:** Falcon EDR, Falcon Prevent, Falcon Insight, Falcon Discover, Falcon NG-SIEM (expert-level)
- **SIEM Engineering and Detection:** Microsoft Sentinel, KQL, CrowdStrike NG-SIEM, Splunk, detection rule authoring, alert triage, SOAR automation
- **Threat Hunting:** Proactive threat hunting across endpoint, identity, and network telemetry using MITRE ATT&CK as a framework
- **Incident Response:** End-to-end Incident Response (IR) leadership under NIST 800-61, post-incident reviews, containment and eradication
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure AD, Conditional Access, MFA, SSO, access reviews, Group Policy
- **Privileged Access Management (PAM):** BeyondTrust (privileged session governance, password management, least-privilege enforcement)
- **Email Security:** Mimecast (anti-phishing, gateway, Data Loss Prevention (DLP))
- **Endpoint Protection:** MDE, MDI, Microsoft Defender for Microsoft 365
- **MDM and MAM:** Microsoft Intune, endpoint compliance baselines
- **Firewalls and Network Security:** Check Point Harmony, IDS/IPS, Web Application Firewall (WAF), DDoS protection, network segmentation
- **Scripting and Automation:** PowerShell, SOAR playbook development, KQL queries
- **Frameworks:** NIST CSF, NIST 800-61, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst (Engineer)

March 2025 - Present

- Own and engineer CrowdStrike Falcon EDR and NG-SIEM across an estate of over 8,000 endpoints: tuning detection policies, managing detection rule libraries, leading threat hunting exercises using Falcon Insight, and driving alert-to-closure incident workflows

- Engineer and maintain Microsoft Sentinel as the organisation's primary SIEM platform, authoring and maintaining a library of custom KQL detection rules, building workbooks, and orchestrating automated response via SOAR playbooks integrated with Microsoft Defender and CrowdStrike
- Lead cyber security incident response for all P1 and P2 security events, coordinating cross-functional teams through containment, eradication, and recovery phases in line with NIST 800-61, and producing post-incident reports with root cause analysis and improvement recommendations
- Conduct proactive threat hunting across endpoint, identity, email, and cloud telemetry, using the MITRE ATT&CK framework to identify undetected adversary activity and inform detection rule improvements
- Manage BeyondTrust PAM platform: governing privileged account lifecycle, enforcing least-privilege access, managing password rotation policies, and maintaining session recording audit trails for compliance
- Administer Microsoft Entra ID / Azure AD: designing and maintaining Conditional Access policies, managing MFA enforcement, governing SSO integrations, and conducting periodic access reviews across the full user population
- Oversee Microsoft Intune MDM and MAM estate, enforcing security configuration baselines, managing non-compliant device remediation, and maintaining mobile device and application policies
- Administer Mimecast email security gateway, tuning anti-phishing, anti-malware, and DLP policies, and responding to email-borne threat investigations
- Manage Check Point Harmony firewall, maintaining rule sets, access control policies, and network segmentation to protect organisational perimeters
- Own vulnerability management programme using Tenable.io, AppCheck, and Pentera BAS, producing risk-prioritised remediation plans and tracking closure through to verified resolution
- Develop and maintain PowerShell automation scripts and SOAR playbooks to reduce analyst toil and accelerate alert enrichment and response
- Deliver security awareness and phishing simulation programmes, measuring and improving security culture across the organisation
- Coordinate remediation of external penetration test findings, liaising with business and technology stakeholders to drive closure within agreed timeframes

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Triaged and investigated SIEM alerts across Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, escalating confirmed security incidents and supporting lead engineer through incident response and post-incident reviews
- Administered CrowdStrike Falcon Prevent, Insight, and Discover, identifying endpoint misconfigurations, unpatched vulnerabilities, and anomalous user and process behaviour
- Managed Azure AD / Entra ID identity controls including MFA rollout, Conditional Access policy design, account lifecycle management, and periodic privilege access reviews
- Operated BeyondTrust PAM platform for day-to-day privileged account requests, password rotation, and session monitoring
- Managed Mimecast email security and responded to phishing reports, conducting URL and attachment analysis and coordinating takedowns
- Conducted vulnerability scanning using Tenable.io and Nessus, producing prioritised vulnerability remediation reports for infrastructure teams
- Supported Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) deployment and ongoing operations

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

Hex Solutions Ltd (SaaS FinTech)

- Maintained network and infrastructure security including firewall rule management, vulnerability assessments, and system patching for a cloud-hosted FinTech SaaS platform
- Administered endpoint security and contributed to ISO 27001-aligned information security policies and procedures
- Managed access governance and cloud security controls across Azure-hosted services, supporting both internal operations and customer-facing platform security

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon EDR across over 8,000 endpoints, establishing comprehensive endpoint threat visibility and reducing mean time to detect and respond to security incidents
- Engineered a detection rule library of over 30 custom KQL queries in Microsoft Sentinel, materially improving alert fidelity and reducing analyst false-positive workload
- Implemented BeyondTrust PAM organisation-wide, eliminating shared administrator credential use and enforcing least-privilege governance across all privileged accounts
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the full 8,000-user estate, providing unified correlated threat detection and response capability
- Led a Pentera Breach and Attack Simulation (BAS) programme that identified critical security gaps and drove measurable remediation across network and endpoint environments
- Established a structured vulnerability management cadence using Tenable.io and AppCheck, achieving consistent quarter-on-quarter reduction in open critical and high findings

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
