

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike Falcon EDR | SIEM/SOAR | Vulnerability Management | IAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with expert-level proficiency in CrowdStrike Falcon Endpoint Detection and Response (EDR) and deep hands-on capability across Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms. In my current role at the University of the Arts, London, I manage security operations for over 8,000 users, handling the full security tooling stack including EDR alert triage and threat hunting, email security via Mimecast, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) controls, Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, Privileged Access Management (PAM) via BeyondTrust, vulnerability scanning and remediation, Intrusion Detection and Prevention Systems (IDS/IPS), firewall administration, and identity governance across Microsoft Entra ID and Azure Active Directory (AD). I hold the Certified Information Systems Security Professional (CISSP) certification and bring the technical rigour and communication skills to thrive as part of a small, focused security team in a financial services environment, working to a defined shift pattern and responding effectively to both routine and out-of-hours security events.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Falcon Insight, Falcon Discover, Falcon NG-SIEM
- **SIEM and SOAR:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike NG-SIEM, alert triage, rule tuning, playbook automation
- **Email Security:** Mimecast (anti-phishing, gateway controls, Data Loss Prevention (DLP), inbound/outbound filtering)
- **MFA and SSO:** Azure Active Directory (AD) MFA, Conditional Access, Single Sign-On integration, Microsoft Authenticator
- **MDM and MAM:** Microsoft Intune Mobile Device Management, Mobile Application Management, endpoint compliance policies
- **Privileged Access Management (PAM):** BeyondTrust (privileged account lifecycle, session recording, password rotation)
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure AD, Group Policy, Conditional Access, access reviews
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Endpoint Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365
- **Firewalls and Perimeter Security:** Check Point Harmony, IDS/IPS, Web Application Firewall (WAF), DDoS protection
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Security Frameworks:** NIST 800-61, NIST Cybersecurity Framework (CSF), MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst (Engineer)

March 2025 - Present

- Administer and maintain CrowdStrike Falcon EDR across an estate of over 8,000 endpoints, tuning detection policies, managing alert queues, and conducting threat hunting using Falcon Insight and Falcon NG-SIEM to identify and respond to advanced threats
- Operate Microsoft Sentinel as the primary SIEM platform, authoring KQL detection rules, investigating security incidents, and correlating alerts across endpoint, identity, email, and cloud telemetry sources

- Manage Mimecast email security gateway, configuring anti-phishing policies, inbound/outbound filtering rules, DLP controls, and investigating email-borne threats escalated by users or automated detection
- Administer MFA and SSO controls via Microsoft Entra ID and Azure AD, maintaining Conditional Access policies, reviewing access grants, and managing MFA enrolment organisation-wide
- Oversee Microsoft Intune MDM and MAM policies, enforcing security baselines and compliance configurations across Windows laptops, mobile devices, and corporate-managed applications
- Manage BeyondTrust PAM platform, governing privileged account provisioning, enforcing least-privilege access, rotating credentials, and monitoring privileged sessions via recorded audit trails
- Lead incident response activities end-to-end using the NIST 800-61 framework, coordinating containment, eradication, and recovery actions and producing post-incident review reports
- Conduct vulnerability scanning with Tenable.io and AppCheck, risk-prioritising findings, and coordinating with infrastructure and application teams to drive remediation within agreed timelines
- Manage Check Point Harmony firewall rule sets, access control policies, and network segmentation to protect organisational perimeters and internal segments
- Administer and monitor IDS/IPS systems, investigating anomalous network activity and tuning rules to minimise false positives while maintaining detection coverage
- Manage PKI and security certificates, ensuring continuous encryption coverage across internal and external services and coordinating certificate renewals proactively
- Deliver phishing simulation campaigns and security awareness training, reducing staff susceptibility to social engineering attacks across the organisation
- Coordinate remediation of penetration test findings, liaising with IT and application owners to track closure of critical and high-severity vulnerabilities
- Automate security operations tasks using PowerShell scripting and SOAR playbooks, reducing manual effort on repetitive alert handling and response workflows

Cyber Security Analyst, Cyber Security

March 2022 - March 2025

University of the Arts, London (UAL)

- Triaged and investigated SIEM alerts across Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, escalating confirmed incidents and supporting root cause analysis and post-incident reviews
- Administered CrowdStrike Falcon Prevent, Falcon Insight, and Falcon Discover, identifying endpoint misconfigurations, vulnerabilities, and anomalous behaviour patterns
- Managed Azure AD / Entra ID identity controls including MFA deployment, Conditional Access policy configuration, account provisioning and de-provisioning, and periodic access reviews
- Supported BeyondTrust PAM deployment, assisting with privileged account provisioning, password rotation schedules, and session monitoring
- Conducted vulnerability scanning using Tenable.io and Nessus, producing risk-prioritised remediation reports for infrastructure teams
- Managed Mimecast email security, investigating phishing reports submitted by users and coordinating response to confirmed email-borne threats
- Maintained Microsoft Intune MDM/MAM policies and responded to non-compliant device alerts
- Contributed to security awareness programmes including phishing simulations, induction briefings, and regular staff communications
- Supported the Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) deployment across the full estate

IT Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

Hexagon Ltd (SaaS FinTech)

- Maintained network and infrastructure security including firewall rule management, vulnerability assessments, and patch deployment across a SaaS-based FinTech environment
- Administered endpoint security tooling and contributed to the development and implementation of security policies aligned with ISO 27001 and Cyber Essentials requirements
- Managed cloud security controls across Azure-hosted services, supporting access governance and monitoring for a multi-tenant SaaS platform
- Maintained PKI and digital certificate infrastructure to ensure continuous encryption across customer-facing and internal services

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon EDR across an estate of over 8,000 users, significantly improving endpoint threat visibility and reducing mean time to detect and respond to security incidents
- Implemented BeyondTrust PAM organisation-wide, eliminating shared administrator credentials and establishing least-privilege access governance for all privileged accounts
- Authored over 30 custom KQL detection rules in Microsoft Sentinel, improving alert fidelity and reducing false positive volume to allow the security team to focus on genuine threats
- Led deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the full 8,000-user estate, providing unified and correlated threat detection
- Coordinated a Pentera Breach and Attack Simulation (BAS) programme that systematically identified and drove remediation of critical security gaps across network and endpoint environments
- Established a structured monthly vulnerability management cadence using Tenable.io and AppCheck, achieving consistent reduction in the volume of open critical and high-severity findings quarter-on-quarter

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
