

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | Azure AD | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience implementing and maintaining robust security across complex enterprise environments. I have deep expertise in Endpoint Detection and Response (EDR) using CrowdStrike Falcon, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations including alert triage and response, email security gateway management via Mimecast, Privileged Access Management (PAM) using BeyondTrust, and identity security with Microsoft Entra ID and Azure Active Directory (AD), covering Multi-Factor Authentication (MFA), Single Sign-On (SSO), Conditional Access and Group Policy administration. I have direct experience managing Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, conducting vulnerability scans and remediation using enterprise tooling, administering web and email security gateways, managing firewalls, and delivering security awareness training to end users. I am equally comfortable remediating penetration testing findings and contributing to ad hoc security projects in a small, focused team environment.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (Endpoint Detection and Response, Prevent, Insight, Next-Generation SIEM (NG-SIEM), Discover)
- **SIEM/SOAR:** Microsoft Sentinel (with Kusto Query Language (KQL)), CrowdStrike NG-SIEM, Splunk; automated playbook and alert response engineering
- **Endpoint Protection and MDM/MAM:** Microsoft Defender for Endpoint (MDE), Microsoft Intune (MDM/MAM), Tanium, CrowdStrike Falcon Prevent
- **Email and Web Security Gateways:** Mimecast email security gateway; web filtering and gateway policy management
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure AD, Conditional Access, MFA, SSO, Group Policy Objects (GPO)
- **Privileged Access Management (PAM):** BeyondTrust PAM platform
- **Firewall and Network Security:** Check Point Harmony firewall; Intrusion Detection and Prevention System (IDS/IPS) management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; vulnerability remediation and reporting
- **Incident Response:** NIST SP 800-61 and MITRE ATT&CK framework-aligned investigation, containment, eradication and recovery
- **Security Awareness:** End-user security awareness training programme design and delivery
- **Scripting and Automation:** PowerShell, SOAR automation; detection rule and use-case engineering
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) – Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Lead day-to-day management of the CrowdStrike Falcon platform, including Endpoint Detection and Response (EDR), Prevent, Insight and Discover modules, across the enterprise environment.
- Manage SIEM/SOAR/EDR alert response using Microsoft Sentinel with KQL-based detection rules; triage, investigate and escalate security events end-to-end.
- Administer the Mimecast email security gateway, including policy tuning, threat intelligence feeds and incident investigation for phishing and malware campaigns.

- Oversee MFA, SSO and Conditional Access policies in Microsoft Entra ID and Azure AD, enforcing least-privilege principles across an 8,000-user environment.
- Manage MDM and MAM through Microsoft Intune, including device compliance policies, application deployment and mobile threat management.
- Lead vulnerability scanning and remediation programmes using Tenable.io, Pentera BAS and AppCheck; track and report on remediation progress to the security leadership team.
- Administer and tune the BeyondTrust PAM platform, controlling privileged access for administrative accounts and third-party vendors.
- Manage web and email security gateway policies and firewall rules on the Check Point Harmony platform; maintain IDS/IPS signature sets.
- Remediate findings from penetration testing engagements and coordinate technical remediation with the infrastructure team.
- Deliver security awareness training sessions to staff and support the phishing simulation programme.
- Contribute to ad hoc security projects including threat modelling, policy reviews and security architecture assessments.

University of the Arts, London (UAL) – Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Performed SIEM alert triage and investigation using Microsoft Sentinel; responded to and escalated security incidents in line with the incident response playbook.
- Supported the management of Entra ID and Azure AD, including user provisioning, access reviews and Conditional Access policy updates.
- Assisted with vulnerability assessment using Nessus and AppCheck; tracked open findings and coordinated remediation with asset owners.
- Managed CrowdStrike Falcon policies and reviewed EDR detections; tuned alerts to reduce false positives.
- Supported deployment and management of MFA and SSO across university systems, contributing to the identity security roadmap.
- Administered Mimecast email policies including anti-spam, anti-phishing and data loss prevention (DLP) rules.
- Contributed to PAM administration using BeyondTrust; reviewed privileged session recordings and access requests.
- Produced weekly security metrics reports for the security leadership team covering incidents, vulnerabilities and endpoint compliance.

HICX Solutions Ltd (SaaS/FinTech) – IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Delivered security engineering across a Software as a Service (SaaS) FinTech environment, covering endpoint security, identity management, vulnerability assessment and access control.
- Supported the implementation of MDM policies and managed device enrolment for remote and hybrid staff.
- Maintained MFA and SSO configurations for internal and external user access to cloud-hosted applications.
- Conducted vulnerability assessments and produced remediation recommendations aligned to industry best practice.
- Assisted with ISO 27001-aligned security controls documentation and audit preparation.

KEY ACHIEVEMENTS

- Drove the enterprise-wide deployment of CrowdStrike Falcon EDR across 8,000+ endpoints, improving threat visibility and significantly reducing mean time to detect (MTTD) and mean time to respond (MTTR).
- Led SIEM/SOAR alert response engineering in Microsoft Sentinel, authoring KQL detection rules that cut false-positive alert volume by over 40%, enabling the security team to focus on genuine threats.
- Implemented a structured PAM programme using BeyondTrust, removing standing administrative access for privileged accounts and enforcing just-in-time (JIT) access controls.
- Deployed and tuned Mimecast email gateway policies resulting in a measurable reduction in phishing emails reaching end users.

- Remediated critical and high-severity findings from external penetration testing engagements within agreed SLA timescales, reducing the organisation's overall attack surface.
- Designed and delivered a security awareness training programme that increased staff phishing simulation pass rates across the university.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
