

# PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR)

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

## PROFESSIONAL PROFILE

I am a senior cyber security engineer with over five years of hands-on experience implementing and managing enterprise security controls across complex, regulated environments. I bring deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), email security gateways, web application firewalls, Privileged Access Management (PAM), and identity technologies including Microsoft Entra ID (formerly Azure Active Directory), Multifactor Authentication (MFA), and Single Sign-On (SSO). I have a proven track record managing vulnerability scanning and remediation, incident response, Intrusion Detection and Prevention Systems (IDS/IPS), Mobile Device Management (MDM) and Mobile Application Management (MAM), and delivering security awareness training. I hold the Certified Information Systems Security Professional (CISSP) certification and thrive in lean, collaborative security teams where hands-on technical ownership and proactive risk reduction are valued.

## CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon NG-SIEM, alert triage, detection tuning, playbook automation
- **Email and Web Security:** Mimecast email security gateway, web application firewall (WAF) and DDoS management, Check Point Harmony firewall
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, MFA, SSO, Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM administration and operations
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM
- **Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus - vulnerability scanning, remediation tracking, penetration test finding management
- **Endpoint Management:** Tanium endpoint management platform
- **Incident Response:** NIST 800-61 and MITRE ATT&CK framework-aligned incident response lifecycle
- **Scripting and Automation:** PowerShell scripting for security automation and SOAR workflows
- **Security Awareness:** Security awareness training programme design and delivery
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK
- **Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+

## PROFESSIONAL EXPERIENCE

### University of the Arts, London (UAL)

#### Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Operate and maintain CrowdStrike Falcon EDR across the enterprise estate, managing alert triage, detection tuning, threat prevention policies, and endpoint visibility via Falcon Insight and Discover modules.
- Manage SIEM operations using Microsoft Sentinel and CrowdStrike NG-SIEM, writing Kusto Query Language (KQL) detection rules, fine-tuning alerts, and reducing false-positive rates to improve analyst efficiency.
- Administer Mimecast email security gateway, configuring anti-phishing, anti-spoofing, and malware detection policies to protect the organisation from email-borne threats.

- Maintain Intrusion Detection and Prevention System (IDS/IPS) rules and firewall policies, collaborating with infrastructure and networking teams to ensure robust perimeter and internal network security controls.
- Manage Microsoft Entra ID (Azure Active Directory) identity controls including Conditional Access policies, MFA enforcement, and Single Sign-On (SSO) integrations to strengthen identity and access management.
- Administer BeyondTrust Privileged Access Management (PAM) platform, governing privileged account lifecycles, enforcing least-privilege principles, and generating audit-ready access reports.
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) deployment, enforcing device compliance policies and securing managed endpoints across corporate and bring-your-own-device environments.
- Lead vulnerability scanning and remediation programmes using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), tracking findings through to closure and providing risk-prioritised remediation guidance to engineering teams.
- Conduct incident response activities aligned to NIST 800-61, leading containment, eradication, recovery, and lessons-learned phases for security incidents across the organisation.
- Deliver security awareness training sessions and phishing simulation campaigns to reduce human risk across a diverse staff population.
- Automate repetitive security tasks using PowerShell scripting, reducing manual effort in alert handling, user account lifecycle management, and compliance reporting workflows.

### **University of the Arts, London (UAL)**

#### **Cyber Security Analyst, Cyber Security and Identity**

*March 2022 - March 2025*

- Deployed and operationalised Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, coordinating the rollout with infrastructure teams and configuring detection policies, attack surface reduction rules, and automated response actions.
- Performed daily SIEM alert triage in Microsoft Sentinel, investigating security events using KQL queries, correlating log sources including Windows Security Event Logs, firewall logs, and endpoint telemetry to identify and respond to threats.
- Monitored and responded to CrowdStrike Falcon EDR detections, escalating confirmed incidents through the incident response lifecycle and maintaining detailed investigation records.
- Managed Mimecast email security gateway policies to address phishing campaigns, business email compromise attempts, and malware delivery threats targeting the university.
- Configured and maintained Check Point Harmony firewall rules and web gateway security policies, collaborating with network teams to segment and protect the environment.
- Administered Azure Active Directory (now Entra ID) including Conditional Access policy design, MFA rollout, and privileged identity management to reduce identity-based attack surface.
- Conducted vulnerability assessments using Nessus, Tenable.io, and AppCheck, producing detailed risk reports and working with system owners to track remediation to completion.
- Supported the deployment and administration of BeyondTrust PAM to manage privileged accounts and enforce least-privilege access across on-premises and cloud environments.
- Maintained Tanium endpoint management to enforce software patching, configuration compliance baselines, and real-time endpoint visibility across the managed estate.
- Contributed to security policy development aligned to ISO 27001, CIS Controls, NIST Cybersecurity Framework (CSF), and Cyber Essentials+ certification requirements.

### **HICX Solutions Ltd (Software as a Service / Financial Technology)**

#### **IT Engineer: Security, Quality and Infrastructure**

*February 2021 - March 2022*

- Implemented and maintained security controls across SaaS and cloud infrastructure environments, supporting secure-by-design principles for the company's FinTech platform.
- Configured and managed identity and access management controls including MFA and role-based access controls across Microsoft 365 and cloud infrastructure.
- Managed endpoint security tooling, supporting patch management, vulnerability remediation, and security baseline enforcement across corporate devices.
- Conducted security quality assurance activities, reviewing infrastructure configurations against security best practices and producing risk-based remediation plans.

- Supported IT infrastructure operations including network configuration, server management, and service desk escalations relating to security and access issues.

## KEY ACHIEVEMENTS

---

- Deployed Microsoft Defender for Endpoint (MDE) to an 8,000-user estate at UAL, delivering full endpoint visibility and automated threat response capability across a complex, distributed environment.
- Operationalised CrowdStrike Falcon EDR and NG-SIEM at enterprise scale, reducing mean time to detect (MTTD) and mean time to respond (MTTR) for endpoint-based threats through proactive detection tuning and alert enrichment.
- Implemented BeyondTrust Privileged Access Management (PAM) from the ground up, eliminating uncontrolled privileged access and establishing a fully auditable privileged session management capability.
- Designed and automated PowerShell-based SOAR workflows to streamline alert handling and incident ticket creation, reducing analyst workload on repetitive triage tasks by a significant margin.
- Maintained Cyber Essentials+ certification for UAL through ongoing vulnerability management, access control governance, and patch management oversight, underpinning the university's security compliance posture.
- Delivered organisation-wide security awareness training and phishing simulation campaigns that measurably reduced phishing click rates across the staff population.

## EDUCATION

---

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
