

PROSPER AWUNI

Senior Cyber Security Engineer | EDR | DLP | Email Security | Cloud Security | Security Engineering

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience delivering end-to-end security engineering projects across enterprise and cloud environments. I bring deep hands-on expertise in Endpoint Detection and Response (EDR), Data Loss Prevention (DLP), Secure Web Gateway management, Email Security architecture, Privileged Access Management (PAM), and Secrets Management within Microsoft Azure and Microsoft 365 ecosystems. I have a proven record of leading security tooling deployments and improvements across an 8,000-user estate, designing and implementing controls that reduce risk while enabling business productivity. I am adept at working autonomously as a senior security engineer within a growing security function, taking end-to-end ownership of projects from requirements definition through to delivery and ongoing optimisation, and communicating outcomes clearly to both technical and business stakeholders.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-Security Information and Event Management (SIEM)) - expert level; Microsoft Defender for Endpoint (MDE) - enterprise deployment across 8,000 users
- **Data Loss Prevention (DLP):** Microsoft Purview DLP policy design, configuration, and tuning; monitoring and investigation of DLP alerts across Microsoft 365 workloads
- **Email Security:** Mimecast - anti-phishing, URL rewriting, attachment sandboxing, transport rule management; Microsoft Defender for Office 365
- **Secure Web Gateway:** Policy enforcement, category-based filtering, SSL inspection, and traffic monitoring
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Identity Governance
- **Secrets Management and Privileged Access Management (PAM):** BeyondTrust - least-privilege enforcement, session recording, and vaulted credentials management
- **Cloud Security:** Microsoft Azure security controls, Azure Policy, Defender for Cloud, Microsoft 365 compliance and security posture management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **SIEM / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL); detection engineering, automated playbooks, data connector integration
- **Endpoint and Device Management:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM), Tanium
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK alignment, end-to-end containment and recovery
- **Scripting and Automation:** PowerShell scripting for security task automation and reporting
- **Frameworks:** NIST Cyber Security Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UoA) - Senior Cyber Security Analyst / Engineer, DLP policy** March 2025 - Present
- expansion, and email security enhancements, taking ownership from requirements through delivery and post-implementation review.
 - Manage and optimise the CrowdStrike Falcon EDR deployment across an 8,000-user estate, including device control policies, sensor configuration, and threat hunting via CrowdStrike Insight and Discover modules.
 - Design and enforce Microsoft Purview DLP policies across Microsoft 365 workloads, preventing unauthorised data movement and ensuring compliance with data protection regulations including the UK General Data Protection Regulation (UK GDPR).

- Administer and improve Mimecast email security controls, including anti-phishing campaigns, URL protection, attachment sandboxing, and domain-based message authentication, reducing phishing delivery rates by over 60%.
- Manage Microsoft Entra ID identity security including Conditional Access policies, MFA enforcement for 8,000 users, SSO application integrations, and Identity Governance access reviews.
- Administer BeyondTrust PAM to enforce least-privilege access, vault credentials, manage just-in-time access, and maintain session recordings for audit and regulatory purposes.
- Oversee Microsoft Sentinel SIEM platform engineering, writing and maintaining detection rules in KQL, integrating data sources, and building automated response playbooks to reduce mean time to respond (MTTR).
- Lead vulnerability management using Tenable.io and Pentera BAS, coordinating remediation across infrastructure and application teams and reporting risk posture to senior leadership.
- Maintain Microsoft Intune MDM/MAM controls, enforcing device compliance policies and managing application protection policies for remote and hybrid working staff.
- Collaborate with the Microsoft Defender for Cloud team to improve cloud security posture, reviewing security recommendations and driving remediation of high-priority findings.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Oversee the deployment and configuration of CrowdStrike Falcon across the enterprise, supporting rollout planning, policy configuration, and early-stage operational tuning. *March 2022 - March 2025*

- Implemented and maintained Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), achieving full coverage across domain-joined and cloud-managed devices.
- Managed DLP policies within Microsoft 365, investigating policy violations, refining sensitivity label configurations, and liaising with data owners on appropriate data handling controls.
- Administered Mimecast email security policies, onboarding new domains, maintaining allow and block lists, and investigating email-borne threats.
- Managed Microsoft Entra ID Conditional Access and MFA controls, supporting the organisation's Zero Trust identity posture and SSO integrations with third-party applications.
- Performed regular vulnerability scanning using Tenable.io and AppCheck, triaging findings, preparing remediation reports, and tracking closure against Service Level Agreement (SLA) targets.
- Supported Microsoft Sentinel SIEM operations, performing alert triage, investigating anomalies mapped to MITRE ATT&CK tactics, and escalating confirmed incidents.
- Delivered security awareness training and phishing simulation campaigns, tracking completion rates and reporting metrics to management.
- Maintained Microsoft Intune device compliance policies, supporting both corporate-owned and Bring Your Own Device (BYOD) mobile device management.

HCC Solutions Ltd (SaaS/FinTech) - IT Engineer, Security, Quality and Infrastructure
 Implemented and maintained endpoint security controls, email security policies, and identity access management for a Software as a Service (SaaS) FinTech environment. *February 2021 - March 2022*

- Managed cloud infrastructure security within Microsoft Azure, including access control reviews, policy enforcement, and security hardening of cloud workloads.
- Supported DLP and email security tooling configuration, ensuring data protection controls met regulatory and contractual requirements.
- Conducted internal vulnerability assessments, tracked remediation activities, and reported findings to management with clear risk prioritisation.
- Maintained MDM policies for a distributed remote workforce, enforcing device compliance and application security standards.
- Delivered IT security awareness training and supported the development and maintenance of information security policies and procedures.

KEY ACHIEVEMENTS

- Delivered end-to-end deployment and optimisation of CrowdStrike Falcon EDR/Extended Detection and Response (XDR) across an 8,000-user estate, achieving full endpoint visibility and reducing mean time to detect (MTTD) by 40%.

- Designed and implemented Microsoft Purview DLP policies across Microsoft 365 workloads, achieving measurable reduction in data exfiltration risk and supporting UK GDPR compliance obligations.
- Reduced phishing delivery rates by over 60% through a combination of Mimecast policy engineering and targeted security awareness training programmes.
- Built automated SOAR playbooks in Microsoft Sentinel, cutting MTTR to high-severity security events by 55% through automated enrichment, containment, and notification workflows.
- Rolled out Microsoft Entra ID Conditional Access and MFA to 8,000 users, achieving 99% adoption and a significant reduction in identity-based attack success rates.
- Led a vulnerability management programme using Tenable.io and Pentera BAS, reducing critical and high-severity exposures by 70% within the first year of the programme.
- Implemented BeyondTrust PAM across all privileged accounts, achieving zero standing privileged access and full session recording coverage for audit and regulatory compliance.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
