

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience protecting enterprise environments through the deployment, management, and optimisation of market-leading security technologies. I bring deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, and Microsoft Entra ID (formerly Azure Active Directory) including Multi-Factor Authentication (MFA) and Single Sign-On (SSO). I have a strong record of managing vulnerability scanning and remediation programmes, responding to and containing security incidents, maintaining Privileged Access Management (PAM) solutions, and delivering security awareness training to user communities of over 8,000 staff. I am comfortable working as a senior contributor within small, focused security teams and thrive in fast-paced environments where operational rigour and continuous improvement are equally valued.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - expert level
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL); alert triage, detection rule engineering, and automated response playbooks
- **Email Security:** Mimecast - configuration, policy management, threat intelligence integration
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA, SSO
- **Mobile Device Management / Mobile Application Management (MDM/MAM):** Microsoft Intune, Endpoint Manager
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus - scanning, prioritisation, and remediation tracking
- **Firewall and Perimeter Security:** Check Point Harmony; experience with Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) mitigation
- **Intrusion Detection System / Intrusion Prevention System (IDS/IPS):** Alert monitoring, tuning, and incident response
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Endpoint Management:** Tanium, Microsoft Intune
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK mapping, containment, eradication, and recovery
- **Scripting and Automation:** PowerShell, SOAR playbooks
- **Frameworks and Standards:** NIST Cyber Security Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer**, 2020 - March 2025 - Present
- University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer, 2020 - March 2025 - Present
- including alert triage within the SIEM/SOAR stack, threat hunting via CrowdStrike Insight, and device control policy enforcement through Falcon Prevent.
- Manage the Microsoft Sentinel SIEM platform, authoring and refining detection rules in KQL, building automated response playbooks, and integrating data connectors to ensure comprehensive telemetry coverage.

- Oversee vulnerability management using Tenable.io and Pentera BAS, prioritising findings by risk, assigning remediation tasks, and tracking closure against Service Level Agreement (SLA) targets.
- Administer BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access, manage session recording, and audit privileged account activity.
- Configure and maintain Mimecast email security policies, including anti-phishing, URL rewriting, and attachment sandboxing, reducing successful phishing delivery by over 60%.
- Manage Microsoft Entra ID Conditional Access policies, MFA enforcement, and SSO integrations, supporting identity security for hybrid on-premises and cloud environments.
- Lead incident response activities in line with NIST 800-61, coordinating containment, forensic evidence collection, eradication, and post-incident review across cross-functional teams.
- Maintain Mobile Device Management / Mobile Application Management (MDM/MAM) controls via Microsoft Intune, enforcing compliance policies across a managed device fleet.
- Deliver security awareness training sessions and phishing simulation campaigns, tracking engagement metrics and reporting outcomes to senior leadership.
- Support penetration test engagements, tracking and remediating findings within agreed timescales and reporting progress to the Chief Information Security Officer (CISO).

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Implemented and maintained security controls across a 50,000-user estate at UAL, investigating security events, escalating confirmed incidents, and documenting findings in the ticketing system.
March 2022 - March 2025

- Contributed to SIEM rule development and tuning in Microsoft Sentinel, reducing false positive rates and improving signal quality for the Security Operations Centre (SOC) team.
- Conducted vulnerability scans using Tenable.io and AppCheck, producing remediation reports and working with system owners to close critical exposures within SLA.
- Supported the deployment and configuration of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the enterprise environment.
- Managed Intrusion Detection System / Intrusion Prevention System (IDS/IPS) alert queues, tuning rules to reduce noise while maintaining detection fidelity.
- Administered identity and access controls in Microsoft Entra ID / Azure AD, including Conditional Access policy review, MFA rollout, and SSO application onboarding.
- Maintained and monitored firewall rulesets via Check Point Harmony, reviewing change requests and ensuring compliance with network security policy.
- Collaborated with IT infrastructure teams to apply security patches, enforce Group Policy, and harden endpoint configurations in line with CIS Controls.
- Produced monthly security metrics dashboards for management, covering threat detection volumes, vulnerability remediation rates, and identity access review outcomes.

HGX Solutions Ltd (SanS/FinTech) - IT Engineer, Security, Quality and Infrastructure
 Implemented and maintained security controls across a 50,000-user estate at SanS/FinTech, covering endpoint protection, access management, and network security.
February 2021 - March 2022

- Managed IT infrastructure security including firewall configuration, web gateway security policies, and email security controls.
- Conducted internal vulnerability assessments, tracked remediation activities, and reported findings to management.
- Supported MFA and SSO rollout across the organisation, improving identity security posture for a growing distributed workforce.
- Maintained MDM policies to enforce device compliance standards for remote working staff.
- Delivered IT security awareness training and supported the development of security policies and procedures.

KEY ACHIEVEMENTS

- Led deployment and optimisation of CrowdStrike Falcon EDR/XDR across an 8,000-user estate at UAL, achieving full endpoint visibility and reducing mean time to detect (MTTD) by 40%.
- Engineered automated SOAR playbooks in Microsoft Sentinel, reducing mean time to respond (MTTR) to high-severity alerts by 55% through automated containment and enrichment workflows.

- Delivered a vulnerability management programme using Tenable.io and Pentera BAS, reducing critical and high-severity exposures by 70% within the first year.
- Implemented BeyondTrust PAM across all privileged accounts, achieving zero standing privileged access and full session recording for audit compliance.
- Reduced phishing delivery rates by over 60% through optimised Mimecast policy tuning and targeted security awareness training campaigns.
- Rolled out Microsoft Entra ID Conditional Access and MFA to 8,000 users, achieving 99% MFA adoption and significantly reducing identity-based attack success rates.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
