

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience managing endpoint security, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, identity and access management, and vulnerability remediation programmes across large hybrid environments. I bring expert-level command of CrowdStrike Falcon, including Endpoint Detection and Response (EDR), Falcon Prevent, NG-SIEM, Insight, and Discover, alongside proven experience with Mimecast email security gateways, Microsoft Entra ID and Azure Active Directory (AD), Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), and BeyondTrust Privileged Access Management (PAM). I excel at triaging and responding to SIEM, SOAR, and EDR alerts in structured security team environments, remediating penetration test findings, delivering security awareness training, and driving continuous improvement of security controls across infrastructure and cloud estates. I am a strong communicator who works effectively within small, focused security teams reporting directly to senior stakeholders.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI)
- **SIEM and SOAR:** CrowdStrike NG-SIEM; Microsoft Sentinel with Kusto Query Language (KQL); alert triage, detection rule development, and SOAR playbook automation
- **Identity and Access Management (IAM):** Azure Active Directory (AD) / Microsoft Entra ID; Conditional Access policies; Multi-Factor Authentication (MFA); Single Sign-On (SSO); Group Policy management
- **Privileged Access Management (PAM):** BeyondTrust PAM - least-privilege enforcement, privileged session monitoring
- **Email and Web Security Gateways:** Mimecast - policy administration, threat filtering, anti-phishing, and data loss prevention
- **Mobile Device and Application Management:** Microsoft Intune MDM and MAM - device enrolment, compliance policy, and application deployment
- **Vulnerability Management:** Tenable.io; AppCheck; Pentera Breach and Attack Simulation (BAS); vulnerability scan scheduling, prioritisation, and remediation tracking
- **Firewalls and Perimeter Security:** Check Point Harmony; firewall policy management, IDS/IPS rule configuration, network segmentation
- **Incident Response:** NIST SP 800-61; MITRE ATT&CK framework; detection, containment, eradication, and recovery
- **Threat Hunting and Detection Engineering:** proactive hunting using CrowdStrike Insight and Sentinel KQL; use case development and tuning
- **Security Frameworks and Compliance:** ISO 27001; CIS Controls; Cyber Essentials Plus; NIST Cybersecurity Framework (CSF)
- **Scripting and Automation:** PowerShell for security task automation and reporting

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

- Lead Security Operations Centre (SOC) functions for an 8,000-user hybrid environment, acting as the senior technical authority for endpoint security, SIEM/SOAR alert response, and incident management.

- Own and administer the CrowdStrike Falcon platform (EDR, Prevent, NG-SIEM, Insight, and Discover), including policy configuration, detection rule tuning, and alert triage across Windows, macOS, and Linux endpoints.
- Triage and investigate SIEM, SOAR, and EDR alerts, leading incident detection, containment, and remediation processes end-to-end, with formal documentation aligned to NIST SP 800-61.
- Manage Mimecast email security gateway, enforcing anti-phishing, anti-spam, data loss prevention (DLP), and impersonation protection policies for 8,000 mailboxes.
- Administer Azure Active Directory (AD) / Microsoft Entra ID, including Conditional Access policies, MFA enforcement, SSO configuration, and Group Policy management for the full user population.
- Manage Microsoft Intune for MDM and MAM, maintaining device compliance policies and application deployment across university-owned and BYOD endpoints.
- Oversee BeyondTrust Privileged Access Management (PAM) implementation, enforcing least-privilege controls, privileged session monitoring, and password vaulting for all privileged accounts.
- Run the vulnerability management programme using Tenable.io and AppCheck, scheduling scans, prioritising findings by severity, and tracking remediation to closure with system owners.
- Coordinate penetration test remediation cycles, working directly with third-party assessors to triage findings and drive closure within agreed SLAs.
- Deliver security awareness training and phishing simulation campaigns to reduce human-factor risk across the university.
- Administer Check Point Harmony firewall, managing access control lists, IDS/IPS rule sets, and network segmentation policies.
- Maintain Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) configurations, including alert triage and response in the Microsoft 365 Defender portal.

University of the Arts, London (UoA)

March 2022 - March 2025

- Monitored and investigated security events across CrowdStrike Falcon, Microsoft Sentinel, and Microsoft Defender, performing structured alert triage and incident response in line with NIST 800-61 and MITRE ATT&CK frameworks.
- Developed, tuned, and maintained SIEM detection rules and analytics in Microsoft Sentinel using Kusto Query Language (KQL), reducing false-positive alert volumes and improving detection fidelity.
- Built and maintained SOAR playbooks to automate repetitive alert triage and response steps, reducing mean time to respond (MTTR) across high-volume, low-severity alert categories.
- Performed proactive threat hunting using CrowdStrike Insight and Microsoft Sentinel to identify indicators of compromise (IOCs) and attacker techniques not surfaced by automated alerting.
- Managed Azure AD / Entra ID user provisioning, de-provisioning, MFA registration, and Conditional Access policy administration.
- Administered Mimecast and Intune MDM/MAM policies, contributing to endpoint compliance and secure email hygiene.
- Supported vulnerability scanning and remediation using Tenable.io and AppCheck, liaising with infrastructure and application teams to schedule patching.
- Contributed to Cyber Essentials Plus certification and ISO 27001 compliance activities, maintaining policy documentation and control evidence.
- Managed Tanium for endpoint visibility and patch management across the server estate.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Designed and implemented security controls for a SaaS/FinTech platform, aligning configuration and policy to regulatory and compliance requirements in a structured, process-driven environment.
- Administered Azure Active Directory (AD) identity and access management policies, enforcing MFA and role-based access control (RBAC) for internal and customer-facing systems.
- Conducted security quality assurance reviews of infrastructure changes, flagging risks and recommending mitigations before deployment.
- Monitored security posture of cloud and on-premises infrastructure, applying patch management and vulnerability remediation processes.

- Supported security incident escalation and response procedures, maintaining accurate records and communication with stakeholders.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon across the full 8,000-user UAL estate, delivering comprehensive EDR coverage and significantly reducing mean time to detect (MTTD) threats across all endpoint platforms.
- Implemented BeyondTrust Privileged Access Management (PAM), bringing all privileged accounts under centralised control and enforcing least-privilege access across critical systems.
- Developed and tuned over 40 Microsoft Sentinel KQL detection rules, reducing false-positive alert rates and enabling analysts to focus on high-fidelity, actionable alerts.
- Led penetration test remediation programmes across multiple annual assessments, achieving full critical and high-severity finding closure within agreed timescales.
- Delivered Cyber Essentials Plus certification for UAL, evidencing robust technical controls across firewalls, patching, access control, malware protection, and secure configuration.
- Automated security alert triage using SOAR playbooks integrated with CrowdStrike and Microsoft Sentinel, reducing manual analyst workload for common alert types by over 60 percent.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
