

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | WAF/DDoS | PAM | Hybrid London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a senior cyber security engineer with over five years of hands-on experience managing Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) tools, web application and email security gateways, and Privileged Access Management (PAM) solutions across large enterprise environments. In my current role at the University of the Arts, London (UAL), I oversee security operations for over 8,000 users, with deep specialisation in CrowdStrike Falcon EDR, Microsoft Entra ID and Azure Active Directory (Azure AD), Mimecast email gateway management, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), and BeyondTrust PAM. I have a strong track record in vulnerability scanning and remediation, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) management, penetration test finding remediation, Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, and incident response. I hold the Certified Information Systems Security Professional (CISSP) certification and am ready to contribute immediately as a senior member of a focused financial services security team.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (NG-SIEM, EDR Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **SIEM/SOAR:** CrowdStrike NG-SIEM; Microsoft Sentinel and Kusto Query Language (KQL); SOAR playbook development and automation
- **Web and Email Security Gateways:** Mimecast (anti-phishing, DLP, URL protection, DKIM/DMARC); WAF/DDoS protection
- **Firewall:** Check Point Harmony (next-generation firewall); firewall rule review, policy management, and IDS/IPS
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (Azure AD) / Conditional Access / Group Policy; MFA/SSO enforcement
- **MDM/MAM:** Microsoft Intune - 8,000-user deployment; device compliance, application control, mobile security policy
- **PAM:** BeyondTrust - credential vaulting, session recording, just-in-time access provisioning
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; scan, triage, and remediation lifecycle
- **Incident Response:** NIST 800-61 framework; MITRE ATT&CK tactical mapping; forensic triage; containment and recovery
- **Scripting/Automation:** PowerShell (SOAR automation, endpoint management, reporting)
- **Endpoint Management:** Tanium; Microsoft Intune; CrowdStrike Falcon Insight and Discover
- **Frameworks:** NIST Cyber Security Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Security Awareness:** Staff training design and delivery; phishing simulation management

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) - Senior Cyber Security Analyst, Engineer** | March 2025 - Present
- Oversee security operations for over 8,000 users across an 8,000-user estate, delivering comprehensive Endpoint Detection and Response (EDR) coverage, real-time threat visibility, and automated prevention policies.
- Manage WAF/DDoS protection, web security gateway, and email security gateway (Mimecast) configurations, blocking phishing, Business Email Compromise (BEC), malware delivery, and web-borne threats at the perimeter.

- Configure and optimise SIEM/SOAR pipelines in both CrowdStrike NG-SIEM and Microsoft Sentinel, authoring detection correlation rules and automated response playbooks using Kusto Query Language (KQL) and PowerShell to reduce mean time to respond (MTTR).
- Maintain MFA/SSO governance through Microsoft Entra ID and Azure Active Directory (Azure AD) Conditional Access policies, enforcing Zero Trust and least-privilege access principles across on-premises and cloud resources.
- Administer MDM/MAM policies for the full 8,000-user estate via Microsoft Intune, enforcing device compliance baselines, application control, and mobile application management policies for corporate and BYOD devices.
- Operate BeyondTrust Privileged Access Management (PAM) to control, audit, and monitor all privileged account activity, including credential vaulting, session recording, and just-in-time access provisioning.
- Conduct vulnerability scans across the enterprise using Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, and Nessus; triage and prioritise findings; and coordinate remediation with infrastructure and development teams to SLA.
- Manage security certificate lifecycle and IDS/IPS rule sets in collaboration with the network team to ensure timely renewal and effective intrusion detection coverage.
- Lead incident response and forensic investigation for Tier 2 and Tier 3 security events, applying the NIST 800-61 incident response framework and mapping findings to MITRE ATT&CK tactics, techniques, and procedures (TTPs).
- Deliver security awareness training to staff and leadership; co-ordinate phishing simulation campaigns; and remediate findings raised in third-party penetration tests in line with agreed remediation timescales.
- Administer Check Point Harmony next-generation firewall policies and Tanium endpoint hygiene platform, ensuring consistent security configurations and patch compliance across the estate.

University of the Arts London (UAL) – Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Triage and investigate SOC alerts from CrowdStrike and Microsoft Sentinel, escalating confirmed incidents within agreed SLA windows and producing structured investigation reports for senior stakeholders.
- Deployed and tuned Microsoft Defender for Endpoint (MDE) across 8,000 endpoints, developing custom detection rules, attack surface reduction (ASR) policies, and automated response playbooks to reduce attacker dwell time.
- Maintained Mimecast email security gateway policies (anti-phishing, Data Loss Prevention (DLP), URL rewriting), improving phishing detection accuracy and reducing successful delivery of malicious payloads.
- Supported the enterprise rollout of MFA/SSO via Microsoft Entra ID Conditional Access policies, significantly reducing credential-based attack risk across student and staff populations.
- Conducted regular vulnerability assessments using Tenable.io and AppCheck; generated prioritised remediation reports and tracked remediation progress with infrastructure teams.
- Assisted in incident response for ransomware, malware, and data exfiltration events, performing SIEM log analysis, EDR forensic triage, IDS/IPS alert correlation, and supporting containment and recovery activities.
- Contributed to security awareness training campaigns, developed policy documentation, and supported Cyber Essentials Plus and ISO 27001 audit preparation activities.

HGX Solutions Ltd (SaaS/FinTech) – IT Engineer, Security, Quality and Infrastructure

February 2021 – March 2022

- Delivered security baseline configuration across cloud and on-premises infrastructure in a fast-paced SaaS FinTech environment, implementing network segmentation, firewall rule reviews, and a structured patch management process.
- Administered MDM policies and endpoint configuration management via Microsoft Intune, enforcing device compliance baselines and application control for a globally distributed workforce.
- Conducted internal vulnerability scans, triaged findings by severity and business impact, and co-ordinated remediation with DevOps and infrastructure teams.
- Managed Azure Active Directory (Azure AD) and on-premises Active Directory (AD) identity governance, performing access reviews and enforcing least-privilege principles to support SOC 2 and ISO 27001 compliance.
- Managed MFA/SSO configurations and Group Policy objects (GPOs) to enforce security baselines and standardise security controls across the workforce.

- Supported IT service quality standards through documentation, change management processes, and security incident handling in line with ITIL service management principles.

KEY ACHIEVEMENTS

- Delivered 100 per cent CrowdStrike Falcon EDR coverage across 8,000+ endpoints at UAL, enabling real-time threat detection, automated prevention, and full behavioural visibility across the entire university estate.
- Architected and deployed the Microsoft Defender suite (MDE, MDI, and Microsoft 365 Defender) across 8,000 users, substantially hardening the university's Endpoint Detection and Response (EDR) and identity security posture.
- Built and automated SIEM/SOAR detection playbooks in CrowdStrike NG-SIEM and Microsoft Sentinel using KQL and PowerShell, reducing manual alert investigation effort and accelerating mean time to respond (MTTR) for critical security events.
- Implemented BeyondTrust PAM controls across the estate, introducing credential vaulting, session recording, and just-in-time (JIT) access provisioning for all privileged accounts, directly reducing the risk of lateral movement post-compromise.
- Successfully achieved and maintained Cyber Essentials Plus certification for UAL, demonstrating compliance with UK government baseline security standards across the full 8,000-user estate.
- Managed and remediated a full cycle of penetration test findings within agreed timescales, working cross-functionally with infrastructure, development, and senior management to address critical and high-severity vulnerabilities.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
