

PROSPER AWUNI

Senior Cyber Security Engineer | Azure Security | Hybrid Infrastructure Protection | Prevention and Protection | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with strong Azure security engineering capability and a proven record of embedding security controls across hybrid on-premises and cloud environments. At the University of the Arts, London, I lead the cyber security engineering function across an estate of over 8,000 users, working firmly within the prevent and protect security pillars: designing and operating security controls across Microsoft Azure Active Directory (AD) / Entra ID, Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), Microsoft Sentinel Security Information and Event Management (SIEM) with Kusto Query Language (KQL) detection engineering, CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation SIEM (NG-SIEM), BeyondTrust Privileged Access Management (PAM), Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), and vulnerability management platforms including Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS). I work closely with infrastructure, cloud, and application teams to embed security into platforms and services at design and build stage, not just at detection. I hold the Certified Information Systems Security Professional (CISSP) certification, am experienced operating autonomously in a senior remote capacity, and bring the technical breadth and communication skills to partner with a cyber leadership team in a complex, hybrid-cloud environment.

CORE SKILLS AND TECHNICAL STACK

- **Azure Security:** Microsoft Entra ID, Azure Active Directory (AD), Conditional Access, Azure AD Identity Protection, Microsoft Defender for Cloud
- **Microsoft 365 Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365, Microsoft Purview DLP
- **SIEM and Detection Engineering:** Microsoft Sentinel (KQL), CrowdStrike NG-SIEM, detection rule authoring, alert triage, threat hunting
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Falcon Insight, Falcon Discover, Falcon NG-SIEM (expert-level)
- **Hybrid Infrastructure Security:** Security controls across on-premises and Azure/cloud-hosted platforms, network segmentation, perimeter security
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera BAS, risk-prioritised remediation tracking
- **Privileged Access Management (PAM):** BeyondTrust, least-privilege enforcement, privileged account lifecycle governance
- **Identity and Access Management (IAM):** Entra ID, Azure AD, Group Policy, MFA, SSO, access reviews, identity governance
- **MDM and MAM:** Microsoft Intune, endpoint compliance baseline management
- **Scripting and Automation:** PowerShell, Security Orchestration, Automation and Response (SOAR) playbook development, KQL
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, NIST 800-61
- **Email Security:** Mimecast (anti-phishing, gateway, Data Loss Prevention (DLP))
- **Firewalls and Network Security:** Check Point Harmony, IDS/IPS, Web Application Firewall (WAF)

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead security engineering across a hybrid on-premises and Azure cloud environment of over 8,000 users, embedding security controls into platforms, projects, and cloud services from design through to operation, working in partnership with infrastructure, cloud, and application delivery teams
- Design and maintain Azure Active Directory / Entra ID security controls including Conditional Access policies, MFA enforcement, SSO integrations, identity governance, and Azure AD Identity Protection risk policies to protect identity as the primary security perimeter in a hybrid environment
- Engineer and operate Microsoft Sentinel as the primary SIEM platform, authoring a comprehensive library of KQL-based detection rules mapped to the MITRE ATT&CK framework, building dashboards and workbooks, and integrating automated response workflows via SOAR playbooks
- Administer and optimise CrowdStrike Falcon EDR and NG-SIEM across the full endpoint estate, tuning threat detection policies, leading threat hunting exercises, and managing alert-to-resolution workflows
- Own the organisation's vulnerability management programme using Tenable.io, AppCheck, and Pentera BAS, risk-prioritising findings and coordinating with infrastructure teams to drive timely remediation in line with risk appetite
- Manage BeyondTrust PAM platform, enforcing least-privilege access, governing privileged account lifecycle, and maintaining session audit trails to meet compliance requirements
- Oversee Microsoft Intune MDM and MAM policies across the device estate, enforcing security configuration baselines and managing non-compliant device remediation
- Lead incident response activities end-to-end using NIST 800-61, coordinating containment, eradication, and recovery across technology and business stakeholders, and producing post-incident reports with root cause analysis
- Develop and maintain PowerShell automation scripts and SOAR playbooks to reduce analyst toil, accelerate alert enrichment, and improve response consistency
- Manage Check Point Harmony firewall rules and network access controls, protecting hybrid infrastructure perimeters and internal network segments
- Administer Mimecast email security gateway, tuning anti-phishing and DLP policies to reduce email-borne threats across the organisation
- Deliver security awareness training and phishing simulation campaigns, building security culture across the organisation

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Supported security engineering and operations across the hybrid cloud estate, contributing to the design and implementation of security controls across Azure and on-premises infrastructure
- Administered Azure AD / Entra ID including Conditional Access policies, MFA deployment, SSO integration, and identity governance controls
- Operated CrowdStrike Falcon EDR and Microsoft Sentinel SIEM, triaging alerts, investigating incidents, and supporting incident response activities
- Managed Microsoft Intune MDM/MAM policies and contributed to the Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) enterprise deployment
- Conducted vulnerability scanning using Tenable.io and Nessus, producing remediation reports and tracking closure of findings with infrastructure and application owners
- Supported BeyondTrust PAM operations and assisted with privilege access reviews and account governance

IT Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Maintained security controls across Azure-hosted SaaS infrastructure, contributing to cloud security configuration, access governance, and vulnerability management for a FinTech platform
- Administered endpoint security, network security, and patch management, and contributed to ISO 27001 and Cyber Essentials-aligned security policies and procedures
- Supported security operations and worked autonomously across security, infrastructure, and quality functions in a lean, remote-friendly environment

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon EDR and NG-SIEM across over 8,000 endpoints, delivering comprehensive endpoint threat visibility within a complex hybrid environment
- Engineered a library of over 30 custom KQL detection rules in Microsoft Sentinel, aligned to the MITRE ATT&CK framework and significantly improving alert fidelity and detection coverage across Azure and on-premises telemetry
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the full 8,000-user estate, providing unified correlated threat detection across hybrid infrastructure
- Implemented BeyondTrust PAM organisation-wide, eliminating shared administrator credentials and establishing least-privilege access governance across hybrid cloud and on-premises systems
- Led a Pentera Breach and Attack Simulation (BAS) programme that identified and drove measurable remediation of critical security gaps, strengthening the prevent and protect security posture across the hybrid environment
- Established a structured vulnerability management cadence using Tenable.io and AppCheck, achieving consistent reduction in open critical and high-severity findings and demonstrating measurable improvement in overall security posture quarter-on-quarter

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
