

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM/SOAR | CrowdStrike | EDR/XDR | Entra ID

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience operating and maturing enterprise security functions. I bring deep expertise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) alert response, and the full Microsoft Defender and CrowdStrike Falcon suite. I have protected complex, regulated environments of 8,000-plus users, managing email and web security gateways, Privileged Access Management (PAM) platforms, and Multi-Factor Authentication (MFA)/Single Sign-On (SSO) across hybrid infrastructures. I am comfortable operating in focused, high-impact security teams within regulated financial and corporate environments, and I consistently deliver measurable improvements to detection fidelity and response times.

CORE SKILLS AND TECHNICAL STACK

- **SIEM/SOAR:** CrowdStrike Falcon Next-Gen SIEM (NG-SIEM), Microsoft Sentinel (KQL), SOAR automation, detection engineering, alert triage
- **EDR/XDR:** CrowdStrike Falcon (Prevent, Insight, Discover, EDR), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, MFA/SSO, Privileged Identity Management
- **Email and Web Security:** Mimecast, anti-phishing, URL filtering, data loss prevention (DLP)
- **Privileged Access Management:** BeyondTrust PAM
- **Mobile Device Management / Mobile Application Management:** Microsoft Intune (MDM/MAM)
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus
- **Firewall and Network Security:** Check Point Harmony, Intrusion Detection/Prevention System (IDS/IPS)
- **Threat Intelligence and Hunting:** MITRE ATT&CK framework, IOC correlation, threat hunting via CrowdStrike Falcon Insight
- **Incident Response:** NIST 800-61 framework, playbook development, digital forensics triage
- **Scripting and Automation:** PowerShell, KQL
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead SIEM/SOAR operations using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, authoring KQL detection rules, tuning alert logic, and reducing false positive rates to improve security signal fidelity across an 8,000-user environment.
- Manage EDR/XDR alert response through CrowdStrike Falcon Prevent and Insight, triaging endpoint telemetry, investigating detections, and driving the full incident response lifecycle in accordance with NIST 800-61 and the MITRE ATT&CK framework.
- Administer the Microsoft Defender suite including Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender, overseeing coverage, policy configuration, and alert management for 8,000 users.
- Configure and maintain email and web security gateway controls via Mimecast, enforcing anti-phishing, URL filtering, and attachment sandboxing policies to protect the organisation from inbound threats.
- Manage Microsoft Entra ID (Azure Active Directory) Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) controls, enforcing Zero Trust principles across cloud and

hybrid access paths.

- Administer BeyondTrust Privileged Access Management (PAM) platform, governing privileged account access, session recording, and credential vaulting to reduce insider risk and lateral movement exposure.
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, enforcing device compliance policies and application protection controls across the entire estate.
- Conduct proactive threat hunting exercises using CrowdStrike Falcon Insight, correlating endpoint data with SIEM telemetry to identify threats that evade automated detection.
- Automate security workflows and incident response playbooks via PowerShell scripting and SOAR integrations, reducing mean time to respond (MTTR) to confirmed incidents.
- Operate the vulnerability management programme using Pentra BAS, Tenable.io, AppCheck, and Nessus, prioritising findings by risk and coordinating with IT teams to meet remediation service level agreements (SLAs).

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and triaged security alerts across Microsoft Sentinel and CrowdStrike Falcon platforms, identifying and escalating incidents in line with defined response procedures.
- Performed incident detection, containment, analysis, and recovery for a broad range of security events, applying NIST 800-61 methodology and MITRE ATT&CK-aligned playbooks.
- Supported deployment and configuration of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), contributing to a university-wide security uplift programme.
- Administered Mimecast email security controls and supported Entra ID (Azure Active Directory) Conditional Access, MFA, and identity governance policy management.
- Carried out vulnerability scanning and remediation tracking using Tenable.io and Nessus, working cross-functionally with infrastructure teams to close findings against agreed SLAs.
- Administered BeyondTrust PAM controls, onboarding privileged accounts and maintaining least-privilege access across server and cloud infrastructure.
- Developed and delivered security awareness training and phishing simulation campaigns, measurably improving staff reporting rates over a 12-month period.
- Contributed to ISO 27001, Cyber Essentials Plus, and NIST Cybersecurity Framework (CSF) compliance activities, supporting audit readiness and risk register maintenance.
- Managed Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing compliance policies for mobile endpoints.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security, quality, and infrastructure engineering for a SaaS/FinTech business, implementing endpoint protection, identity, and network security controls across cloud and on-premise systems.
- Configured Microsoft Azure Active Directory (Azure AD) identity policies, Conditional Access rules, and Multi-Factor Authentication (MFA) for a fully remote workforce.
- Managed Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), ensuring consistent device compliance and data protection across the organisation.
- Performed security hardening, patch management, and vulnerability assessments, maintaining a strong security baseline across the IT estate.
- Supported incident triage and response activities, coordinating with external security partners to investigate and contain emerging threats.

KEY ACHIEVEMENTS

- **CrowdStrike Falcon Operations:** Established and continuously matured CrowdStrike Falcon EDR/XDR and NG-SIEM operations across an 8,000-user estate, achieving measurable reductions in mean time to detect (MTTD) through detection rule tuning and SOAR automation.
- **Microsoft Defender Suite Deployment:** Delivered the full Microsoft Defender suite (MDE, MDI, M365 Defender) deployment across 8,000 users, providing unified endpoint, identity, and cloud workload visibility.

- **SOAR Automation:** Designed and implemented SOAR playbooks integrated with PowerShell scripting, automating high-volume alert triage workflows and reducing analyst workload on repetitive tasks.
- **Vulnerability Management Programme:** Built and operated a continuous vulnerability management programme using Pentera BAS, Tenable.io, AppCheck, and Nessus, improving remediation SLA compliance and reducing the organisation's attack surface.
- **SIEM Detection Engineering:** Authored and tuned KQL-based detection rules in Microsoft Sentinel, improving signal quality, reducing false positives, and enabling faster detection of threat actor techniques mapped to MITRE ATT&CK.
- **Zero Trust Identity Controls:** Implemented Entra ID Conditional Access policies and MFA across hybrid and cloud environments, significantly reducing the risk of identity-based attack paths.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
