

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Vulnerability Management | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience managing the full security technology stack across endpoint, network, identity, and cloud domains. I have deep hands-on expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM)/Security Orchestration, Automation and Response (SOAR) operations, email and web security gateways including Mimecast, Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, Privileged Access Management (PAM) via BeyondTrust, and vulnerability scanning and remediation across enterprise environments. I am experienced in managing Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing Entra ID (Azure Active Directory) Conditional Access and Group Policy, and remediating penetration test findings. I thrive in lean, high-impact security teams and bring a hands-on, ownership-led approach to every area of the security function.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR and SIEM/SOAR:** CrowdStrike Falcon (EDR, Prevent, Insight, NG-SIEM, Discover), Microsoft Sentinel, SOAR automation, alert triage, detection engineering
- **Email and Web Security Gateways:** Mimecast, anti-phishing, URL filtering, attachment sandboxing, data loss prevention (DLP)
- **Identity and Access Management (IAM):** Microsoft Entra ID (Azure Active Directory), Azure AD Group Policy, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust PAM, credential vaulting, session recording, least-privilege enforcement
- **Mobile Device and Application Management:** Microsoft Intune (MDM/MAM), device compliance, application protection policies
- **Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; penetration test remediation tracking
- **Network Security:** Check Point Harmony Firewall, Intrusion Detection System (IDS)/Intrusion Prevention System (IPS), WAF/DDoS mitigation
- **Endpoint Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, Tanium
- **Scripting and Automation:** PowerShell, KQL (Kusto Query Language)
- **Incident Response:** NIST 800-61, MITRE ATT&CK, playbook development, threat hunting
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials+

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Manage CrowdStrike Falcon EDR operations end-to-end, including alert triage, investigation, and response across an 8,000-user estate, integrating CrowdStrike NG-SIEM with SOAR automation to streamline detection and response workflows.
- Administer SIEM/SOAR platforms including Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, authoring KQL detection rules, tuning alert fidelity, and managing SOAR playbook automation to reduce mean time to respond (MTTR).
- Configure and maintain email and web security gateway controls via Mimecast, enforcing anti-phishing, URL rewriting, attachment sandboxing, and data loss prevention (DLP) policies across the organisation.
- Manage Web Application Firewall (WAF), firewall policy (Check Point Harmony), and Intrusion Detection/Prevention System (IDS/IPS) rules, protecting perimeter and application layer infrastructure from

inbound attacks including Distributed Denial of Service (DDoS) threats.

- Administer Microsoft Entra ID (Azure Active Directory) Conditional Access policies, Group Policy, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) to enforce least-privilege and Zero Trust access controls.
- Operate BeyondTrust Privileged Access Management (PAM), governing privileged account access, enforcing session recording, and managing credential vaulting to reduce insider risk and limit lateral movement.
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, applying device compliance baselines and application protection policies across mobile and desktop endpoints.
- Manage the vulnerability management programme using Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus, prioritising findings by criticality and tracking penetration test remediation to closure.
- Automate security workflows using PowerShell scripting and SOAR integrations, reducing analyst time on repetitive triage tasks and enabling faster response to high-priority incidents.
- Design and deliver security awareness training and phishing simulation exercises, improving end-user threat recognition and reducing successful phishing rates across the organisation.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and triaged alerts across CrowdStrike Falcon EDR and Microsoft Sentinel SIEM platforms, identifying and escalating security events in accordance with incident response playbooks.
- Performed end-to-end incident response for security events including malware, phishing, and identity-based attacks, applying NIST 800-61 methodology and MITRE ATT&CK-aligned investigation procedures.
- Administered Mimecast email security gateway and Entra ID (Azure Active Directory) identity controls, maintaining Conditional Access policy configurations and MFA enforcement.
- Managed Microsoft Intune MDM/MAM policies, ensuring device compliance and enforcing application protection controls for mobile endpoints across the estate.
- Administered BeyondTrust PAM, onboarding privileged accounts and enforcing least-privilege access controls across server, network, and cloud environments.
- Conducted vulnerability scanning using Tenable.io and Nessus, working with infrastructure teams to track and remediate findings against agreed service level agreements (SLAs).
- Tracked and coordinated remediation of penetration test findings, liaising between security and IT operations teams to ensure timely closure of identified risk areas.
- Delivered security awareness training programmes and phishing simulation campaigns, improving staff reporting behaviour and reducing click rates over successive campaign cycles.
- Supported ISO 27001, Cyber Essentials Plus, and NIST Cybersecurity Framework (CSF) compliance activities, contributing to risk register updates and audit preparation.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security and infrastructure engineering for a SaaS/FinTech organisation, implementing endpoint protection, identity access controls, and network security across cloud and on-premise environments.
- Configured Microsoft Entra ID (Azure Active Directory) Conditional Access policies, Group Policy settings, and Multi-Factor Authentication (MFA) for a distributed remote workforce.
- Managed Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), ensuring device compliance and application data protection across the company estate.
- Conducted vulnerability assessments and security hardening across cloud and on-premise systems, documenting findings and tracking remediation activities.
- Administered firewall rules, IDS/IPS configurations, and certificate management to maintain network security controls across the IT estate.
- Provided first and second-line security incident support, triaging and responding to endpoint and identity-related security events.

KEY ACHIEVEMENTS

- **CrowdStrike Falcon EDR Programme:** Operated and continually matured CrowdStrike Falcon EDR/XDR operations across an 8,000-user estate, tuning detection policies and integrating SOAR automation to reduce mean time to detect (MTTD) and mean time to respond (MTTR).
- **Mimecast Email Security:** Managed and optimised Mimecast email security gateway controls, significantly reducing successful phishing attempts and improving attachment and URL threat prevention across the organisation.
- **Vulnerability Management Programme:** Built and operated a continuous vulnerability management programme using Pentera BAS, Tenable.io, AppCheck, and Nessus, improving penetration test remediation tracking and reducing the overall attack surface.
- **SOAR and PowerShell Automation:** Developed SOAR-integrated PowerShell automation playbooks that reduced manual alert triage workload, freeing analyst capacity for higher-value threat hunting and investigation activities.
- **PAM Implementation:** Deployed and managed BeyondTrust Privileged Access Management (PAM) controls, reducing exposure from over-privileged accounts and improving auditability of privileged session activity.
- **Security Awareness:** Designed and delivered recurring security awareness training and phishing simulation programmes that measurably reduced end-user susceptibility to social engineering attacks.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
