

PROSPER AWUNI

Senior IT Security Analyst | CrowdStrike Falcon | Vulnerability Management | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior IT Security Analyst with over five years of enterprise security experience. I have strong hands-on experience administering, tuning and operationalising CrowdStrike Falcon, including Falcon Prevent (endpoint protection), Falcon Endpoint Detection and Response (EDR), Falcon Insight, and Falcon Discover, with proven delivery of detection analysis and response workflows at scale. I lead vulnerability and exposure management programmes with a threat-informed approach, applying risk-based prioritisation, remediation tracking, and validation of control effectiveness across complex enterprise estates. I have substantial experience conducting security investigations and incident response activities including alert triage, root-cause analysis, containment, remediation, and lessons learned, and I administer enterprise web and email security solutions to reduce the organisation's attack surface. I bring a methodical, risk-focused mindset to every engagement and consistently operate effectively in hybrid working environments with lean, high-performing security teams.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon:** Administering, tuning and operationalising Prevent, EDR, Insight, Discover, NG-SIEM; detection analysis and response workflows
- **EDR Investigations:** Endpoint, process, network, and file-level telemetry analysis; EDR alert triage and root-cause analysis
- **Vulnerability and Exposure Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk-based prioritisation, remediation tracking, control effectiveness validation
- **Web and Email Security:** Mimecast, Check Point Harmony (web filtering, DNS protection), Secure Web Gateway (SWG) administration
- **Incident Response:** NIST 800-61 lifecycle; alert triage, root-cause analysis, containment, remediation, and lessons learned
- **SIEM/SOAR:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM; SOAR playbook development and alert automation
- **Threat Intelligence and Hunting:** MITRE ATT&CK framework, threat-informed remediation, proactive threat hunting using KQL and Falcon Insight
- **Microsoft Security:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for M365
- **Identity and Access:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **PAM:** BeyondTrust Privileged Access Management (PAM)
- **Scripting and Automation:** PowerShell, KQL; SOAR automation for alert enrichment and triage
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Administer, tune and operationalise CrowdStrike Falcon across an enterprise endpoint estate of 8,000+ devices, covering Falcon Prevent, Endpoint Detection and Response (EDR), Insight, and Discover modules, ensuring detection analysis and response workflows are optimised and consistently maintained
- Conduct advanced EDR investigations using CrowdStrike Falcon, analysing endpoint, process, network, and file telemetry to detect, investigate, and contain threats, delivering full root-cause analysis and remediation guidance
- Lead the vulnerability and exposure management programme using Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, and Nessus, applying risk-based prioritisation and threat-informed

remediation to reduce the organisation's attack surface

- Track and validate remediation of identified vulnerabilities, coordinating with infrastructure and engineering teams to confirm control effectiveness and maintain accurate exposure dashboards
- Administer enterprise email security (Mimecast) and web security gateways (Check Point Harmony), applying threat-informed configurations to detect and block phishing, malware, command-and-control (C2) traffic, and web-based threats
- Lead incident response activities across the full NIST 800-61 lifecycle, performing alert triage, root-cause analysis, containment, remediation, and producing comprehensive lessons-learned reports
- Conduct proactive threat hunts using CrowdStrike Falcon Insight and Microsoft Sentinel KQL queries based on MITRE ATT&CK gap analysis and current threat intelligence, surfacing indicators of compromise (IoCs) before escalation
- Manage BeyondTrust Privileged Access Management (PAM) to enforce least-privilege principles and provide audit trails for privileged account activity
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Defender for M365, maintaining high-quality XDR signal integration into Microsoft Sentinel

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Administered and tuned CrowdStrike Falcon EDR and Prevent policies across 8,000 endpoints, managing detection analysis and response workflows and supporting security operations maturity improvements
- Conducted EDR investigations using CrowdStrike Falcon telemetry, performing alert triage, process-level analysis, and root-cause identification for threats escalated from the Security Operations Centre (SOC)
- Led vulnerability management cycles using Tenable.io and Nessus, tracking remediation progress, validating control effectiveness, and reporting risk posture to management with threat-informed context
- Administered Mimecast email security gateway, tuning anti-phishing, business email compromise (BEC), and malware detection policies based on threat intelligence and observed attack patterns
- Managed web security gateway (Check Point Harmony) controls, administering filtering policies and DNS protection to reduce web-based threat exposure
- Delivered Level 2/3 SOC alert triage and incident response, performing containment, remediation, and lessons-learned documentation in line with NIST 800-61 procedures
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, establishing baseline detection and response capability and significantly reducing mean time to detect (MTTD)
- Administered Azure Active Directory (Entra ID) including Conditional Access policies, MFA rollout, and SSO configuration across the enterprise
- Contributed to BeyondTrust PAM administration, managing privileged account policies and access reviews to enforce least-privilege principles

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Administered endpoint protection and EDR tooling within a SaaS/FinTech cloud environment, managing detection policies and investigating alerts through to resolution and remediation
- Managed email security and web security gateway controls, applying threat-informed configurations to detect and block phishing, malware, and web-borne threats
- Conducted vulnerability assessments and produced risk-based remediation reports, communicating threat-informed priorities to infrastructure and development teams
- Implemented identity and access management controls including Multi-Factor Authentication (MFA), access management policies, and Privileged Access Management (PAM) procedures
- Supported incident response activities including alert triage, containment coordination, and post-incident reporting across the organisation's cloud and hybrid environment

KEY ACHIEVEMENTS

- Administered, tuned and operationalised CrowdStrike Falcon (Prevent, EDR, Insight, Discover) across 8,000+ enterprise endpoints at UAL, establishing mature detection analysis and response workflows and

measurably reducing attacker dwell time

- Delivered Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) deployment across 8,000 users, establishing high-fidelity XDR detection coverage and significantly improving MTTR for endpoint and identity threats
- Led vulnerability and exposure management programme using Tenable.io and Pentra BAS, implementing risk-based prioritisation and threat-informed remediation that achieved consistent reduction in the organisation's critical vulnerability exposure
- Tuned Mimecast email gateway policies based on observed attack patterns, successfully blocking advanced phishing campaigns, business email compromise (BEC) attempts, and malware delivery targeting the organisation
- Developed SOAR playbooks to automate alert enrichment and triage workflows, reducing manual handling time for routine detections and allowing the security team to focus on higher-complexity investigations
- Led incident response activities for multiple high-severity security events, applying NIST 800-61 procedures and MITRE ATT&CK-aligned analysis to achieve rapid containment and full root-cause resolution

EDUCATION

- **M.Sc.** Environmental and Resource Engineering
- **B.Sc.** Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
