

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Incident Response |
Infrastructure Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

A Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience implementing and maintaining robust security across complex enterprise infrastructures. Specialist in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, identity security, vulnerability management, and structured incident response. Adept at working within small, focused security teams to deliver pragmatic, high-impact security controls across hybrid on-premises and cloud environments. Holds a proven track record managing Mimecast, Microsoft Intune, Entra ID and Azure Active Directory (Azure AD), Mobile Device Management (MDM), Mobile Application Management (MAM), and Multi-Factor Authentication (MFA) and Single Sign-On (SSO) solutions at scale.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (Kusto Query Language (KQL)), Splunk (Search Processing Language (SPL)), SOAR playbook automation (PowerShell)
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA/SSO, Group Policy, BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security:** Mimecast email security; WAF/DDoS management; Check Point Harmony firewall; security gateway administration
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM, Tanium, CrowdStrike Falcon Prevent
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus, vulnerability scanning and remediation tracking
- **Incident Response:** NIST 800-61 Incident Response lifecycle, MITRE ATT&CK framework, alert triage, threat hunting, forensic investigation
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Implement and maintain robust security across UAL's hybrid on-premises and cloud infrastructure, protecting systems and data for an organisation of approximately 20,000 staff and students.
- Administer and optimise the CrowdStrike Falcon EDR platform (including Prevent, Insight, Discover and NG-SIEM), managing detection policies, threat hunting queries, and behavioural analytics to protect the entire endpoint estate.
- Manage SIEM operations using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, writing KQL detection rules, correlation queries and dashboards to identify advanced threats and reduce alert fatigue.
- Develop and maintain SOAR playbooks using PowerShell scripting to automate alert enrichment, containment actions, and repetitive incident response tasks, reducing Mean Time to Respond (MTTR).
- Administer Mimecast email security platform, tuning anti-phishing, sandboxing, and Data Loss Prevention (DLP) policies to protect against email-borne threats.
- Manage WAF/DDoS protection and security gateway policies, working with network and infrastructure teams to enforce perimeter security controls.
- Administer Microsoft Entra ID (Azure AD) Conditional Access policies, MFA enforcement, SSO integrations, and Group Policy Objects (GPOs) to strengthen identity security across the organisation.

- Oversee MDM/MAM controls via Microsoft Intune, enforcing device compliance policies, application protection policies, and remote wipe capability across managed and Bring Your Own Device (BYOD) endpoints.
- Lead vulnerability management programme using Pentra BAS, Tenable.io, AppCheck and Nessus, coordinating with IT teams to prioritise and track remediation of identified weaknesses.
- Manage incident response operations in alignment with the NIST 800-61 framework, leading investigations, root cause analysis and post-incident reviews, mapping threat actor activity to the MITRE ATT&CK framework.
- Administer BeyondTrust PAM to manage and audit privileged accounts, enforce least privilege principles, and reduce the attack surface associated with administrative credentials.
- Manage Check Point Harmony firewall rule sets, conducting periodic rule base reviews to remove redundant rules and improve security posture.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed alert triage and in-depth investigation of security incidents raised via SIEM, EDR, and email security platforms, escalating threats to senior stakeholders with clear, concise reporting.
- Supported the organisation-wide deployment of Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, coordinating onboarding, policy configuration and exclusion management.
- Conducted identity and access management reviews in Azure AD, identifying and remediating over-privileged accounts, stale accounts, and misconfigured permissions.
- Performed vulnerability scanning using Nessus and AppCheck across on-premises and cloud environments, producing remediation reports and tracking risk closure in line with SLA targets.
- Wrote and tuned SIEM detection rules and correlation alerts to reduce false positive rates and surface genuine threats more effectively.
- Maintained and improved MFA and SSO configurations, supporting rollout of Conditional Access policies in Microsoft Entra ID to enforce phishing-resistant authentication.
- Managed Mimecast email security settings, investigating phishing campaigns, business email compromise (BEC) attempts, and malware delivery via email.
- Contributed to Cyber Essentials Plus certification, documenting controls, supporting assessor evidence requests, and coordinating remediation across technical teams.
- Administered Microsoft Intune MDM/MAM policies for mobile and laptop endpoints, ensuring devices met security baselines before accessing corporate resources.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed IT security, quality assurance and infrastructure operations for a SaaS and Financial Technology (FinTech) vendor, including endpoint management, network security, and cloud platform administration.
- Deployed and maintained endpoint security tooling, firewall policies, and identity management controls across the company's hybrid cloud and on-premises infrastructure.
- Conducted security assessments and risk reviews, identifying vulnerabilities and recommending remediation actions aligned with ISO 27001 and industry best practice.
- Supported security incident triage, change management, and IT service management processes using ITIL-aligned procedures.
- Administered Azure AD identity controls including user provisioning, group policies, and MFA enforcement for internal and external users accessing cloud-hosted platforms.

KEY ACHIEVEMENTS

- Delivered the full deployment of Microsoft Defender for Endpoint (MDE) across an 8,000-user estate at UAL, significantly improving endpoint visibility and reducing the organisation's exposure to commodity malware and advanced threats.
- Architected and implemented CrowdStrike Falcon EDR across UAL's entire endpoint estate, establishing a comprehensive Endpoint Detection and Response capability with real-time threat visibility and automated containment.

- Built a library of SOAR automation playbooks in PowerShell that reduced analyst manual effort on repetitive triage tasks by automating alert enrichment, IOC lookups and initial containment actions.
- Deployed BeyondTrust PAM across the organisation, eliminating shared administrative credentials, enforcing just-in-time privileged access, and providing a full audit trail of all privileged sessions.
- Integrated Pentera BAS into the vulnerability management programme, enabling continuous automated attack simulation to validate security control effectiveness and prioritise remediation effort.
- Led UAL's successful Cyber Essentials Plus certification, coordinating evidence collection across multiple IT and security domains and achieving certification with zero high-severity findings.
- Developed a suite of KQL detection rules in Microsoft Sentinel targeting MITRE ATT&CK tactics, improving high-fidelity alerting and reducing Mean Time to Detect (MTTD) for priority threat scenarios.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
