

PROSPER AWUNI

Senior Cyber Security Engineer | Cloud and Hybrid Infrastructure Security | Microsoft Azure | CrowdStrike | Remote-First

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

A Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience strengthening security across hybrid on-premises and Microsoft Azure cloud environments. Experienced in securing large, distributed organisations with complex hybrid infrastructure, bringing deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Sentinel Security Information and Event Management (SIEM), Microsoft Defender for Endpoint (MDE), Azure Active Directory (Azure AD) and Microsoft Entra ID, vulnerability management, and structured incident response. Proven ability to operate effectively as a remote-first security professional, collaborating across distributed teams, managing critical security operations autonomously, and delivering consistent improvements to security posture without the need for constant physical presence. Committed to protecting business systems, customer data and brand reputation through proactive threat detection, robust endpoint controls, and continuous improvement of security capabilities.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Hybrid Security:** Microsoft Azure security, Microsoft Entra ID (Azure AD) Conditional Access, hybrid infrastructure security, cloud workload protection, Azure security best practice
- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon NG-SIEM, Splunk (Search Processing Language (SPL)), Security Orchestration, Automation and Response (SOAR) via PowerShell automation and Logic Apps
- **Identity and Access Management:** Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), Tanium, CrowdStrike Falcon Prevent, remote endpoint security management
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus, continuous vulnerability assessment and remediation tracking
- **Incident Response:** NIST 800-61 Incident Response lifecycle, MITRE ATT&CK framework, threat hunting, forensic investigation, post-incident review
- **Email and Perimeter Security:** Mimecast, Check Point Harmony firewall, Web Application Firewall (WAF), Data Loss Prevention (DLP)
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Strengthen security across a large hybrid on-premises and Azure cloud infrastructure serving approximately 20,000 staff and students, operating as a key member of the central Cyber Security team with significant remote-working flexibility.
- Manage the CrowdStrike Falcon platform across UAL's entire endpoint estate (including Falcon EDR, Prevent, NG-SIEM, Insight and Discover), configuring detection policies, automated response actions, and hunting queries to protect hybrid infrastructure against advanced threats.
- Administer Microsoft Sentinel as the organisation's primary SIEM, writing KQL detection analytics, hunting queries, and workbooks to provide unified threat visibility across Azure cloud, on-premises, and Microsoft 365 (M365) environments.

- Manage Microsoft Entra ID (Azure AD) security, administering Conditional Access policies, MFA, SSO integrations, and privileged identity management to enforce Zero Trust principles across hybrid infrastructure.
- Develop and maintain SOAR automation workflows using PowerShell and Logic Apps, automating alert enrichment, IOC lookups, Indicator of Compromise (IOC) blocking, and containment actions to reduce analyst manual effort and improve response speed.
- Lead vulnerability management using Pentera BAS, Tenable.io, AppCheck and Nessus, running continuous assessments across hybrid cloud and on-premises assets and coordinating remediation with infrastructure and development teams.
- Manage Microsoft Intune MDM/MAM to enforce device compliance, application protection and remote management capability across managed laptops, mobile devices, and Bring Your Own Device (BYOD) endpoints connecting to the Azure-hosted environment.
- Lead incident response in alignment with the NIST 800-61 framework, coordinating remotely with infrastructure and IT teams to contain, eradicate and recover from security incidents and delivering post-incident reports with MITRE ATT&CK-mapped findings.
- Administer BeyondTrust PAM, Mimecast email security, Check Point Harmony firewall, and Tanium endpoint management, maintaining a layered defence across hybrid cloud and on-premises systems.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Delivered security operations across UAL's hybrid environment, triaging and investigating security alerts from SIEM, EDR, and email security platforms and escalating confirmed incidents with clear risk-based recommendations.
- Played a central role in deploying Microsoft Defender for Endpoint (MDE) across an 8,000-user estate, managing endpoint onboarding, policy configuration and integration with Microsoft Sentinel to strengthen threat detection across the hybrid infrastructure.
- Managed Azure AD identity controls, conducting access reviews, enforcing Conditional Access and MFA policies, and remediating misconfigured permissions to reduce identity-based attack surface.
- Ran vulnerability assessments using Nessus and AppCheck across both Azure-hosted and on-premises systems, producing remediation reports and tracking risk closure with IT and infrastructure owners.
- Wrote and tuned SIEM detection rules, improving alert quality and reducing false positive volumes to focus security team capacity on genuine threat indicators.
- Managed Mimecast email security controls and investigated phishing, malware delivery and business email compromise (BEC) incidents, implementing email authentication improvements including Sender Policy Framework (SPF), DomainKeys Identified Mail (DKIM), and Domain-based Message Authentication, Reporting and Conformance (DMARC).
- Administered Microsoft Intune MDM/MAM policies for remote and on-site employees, maintaining consistent device security posture across geographically distributed endpoints.
- Supported Cyber Essentials Plus certification, producing evidence for cloud and hybrid security controls and working with the assessor to achieve certification.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed security, quality and infrastructure for a cloud-first SaaS and Financial Technology (FinTech) organisation, securing hybrid Azure cloud and on-premises infrastructure for a globally distributed team.
- Deployed and maintained endpoint security, firewall, and identity management controls, including Azure AD configuration, MFA rollout, and endpoint protection tooling across remote and office-based staff.
- Conducted security risk assessments aligned to ISO 27001, identifying gaps in cloud security controls and producing remediation plans to reduce organisational risk exposure.
- Administered Azure cloud services and on-premises systems, ensuring security configurations met internal policy standards and relevant compliance requirements.
- Supported security incident identification, triage and resolution, collaborating remotely with technical teams across multiple time zones.

KEY ACHIEVEMENTS

- Led the deployment of Microsoft Defender for Endpoint (MDE) across an 8,000-user hybrid estate, delivering complete endpoint threat detection capability and full integration with Microsoft Sentinel for unified cloud-native security operations.
- Implemented CrowdStrike Falcon EDR across UAL's full endpoint estate, bringing consistent threat detection and automated response capability to a geographically distributed hybrid infrastructure.
- Built and deployed a suite of SOAR automation playbooks that automated alert enrichment, IOC lookups and containment actions, reducing Mean Time to Respond (MTTR) and enabling the security team to scale operations without increasing headcount.
- Deployed BeyondTrust PAM to eliminate unmanaged shared administrative credentials, replacing them with fully audited just-in-time privileged access sessions and reducing the risk of credential-based lateral movement across the hybrid environment.
- Integrated Pentera BAS into the vulnerability management programme, enabling automated attack path simulation across hybrid cloud and on-premises assets to continuously validate and improve security control effectiveness.
- Led UAL's Cyber Essentials Plus certification, coordinating evidence gathering across cloud, endpoint, and network security domains and achieving certification with no outstanding high-severity findings.
- Authored MITRE ATT&CK-aligned KQL detection analytics in Microsoft Sentinel targeting the most relevant threat actor techniques for the sector, materially improving the fidelity and speed of threat detection across Azure and hybrid environments.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
