

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, CrowdStrike EDR, PAM, Vulnerability Management

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience implementing and managing enterprise security controls across complex, multi-thousand-user environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) via CrowdStrike Falcon, email security gateways including Mimecast, firewall management, Intrusion Detection and Prevention Systems (IDS/IPS), Privileged Access Management (PAM), and Mobile Device Management (MDM) and Mobile Application Management (MAM). I have deep experience administering Entra ID and Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), as well as running structured vulnerability management programmes and remediating penetration test findings. I am comfortable working within a small, focused security team reporting directly to a security officer, delivering measurable improvements to an organisation's overall security posture.

CORE SKILLS AND TECHNICAL STACK

- **EDR / SIEM / SOAR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Microsoft Sentinel, SOAR automation, alert triage, playbook development
- **Email and Web Security:** Mimecast (email security gateway), WAF (Web Application Firewall), DDoS (Distributed Denial of Service) protection, web proxy management
- **Firewall and Network Security:** Check Point Harmony Firewall, IDS (Intrusion Detection System) / IPS (Intrusion Prevention System), network segmentation
- **Identity and Access Management:** Entra ID / Azure Active Directory, Conditional Access, MFA, SSO, BeyondTrust PAM (Privileged Access Management)
- **Endpoint and Device Management:** Microsoft Intune, MDM, MAM, Tanium
- **Vulnerability Management:** Tenable.io, Pentra BAS (Breach and Attack Simulation), Nessus, AppCheck; penetration test remediation tracking
- **Detection and Response:** KQL (Kusto Query Language), MITRE ATT&CK Framework, NIST 800-61 Incident Response, threat hunting
- **Frameworks and Standards:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell, SOAR playbooks
- **Certifications:** CISSP, CompTIA Security Plus, MCSA, CompTIA A Plus, Google IT Support Professional Certificate

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Managed and optimised CrowdStrike Falcon EDR, Prevent, Insight and Discover across an 8,000-user estate, delivering improved threat detection coverage and reduced endpoint threat dwell time
- Administered the SIEM (Microsoft Sentinel) and SOAR platform, developing and tuning KQL-based detection rules, configuring alert triage workflows and building automated response playbooks
- Managed Web Application Firewall (WAF), DDoS protection, the Mimecast email security gateway, and web proxy configurations to defend against external threats
- Maintained Check Point Harmony Firewall rulesets and IDS/IPS policies; managed security certificates across enterprise systems
- Administered Entra ID and Azure Active Directory, Conditional Access policies, MFA, SSO, MDM (Intune) and MAM for 8,000 users across the organisation

- Led the university's vulnerability management programme using Tenable.io, Pentra BAS, Nessus and AppCheck; tracked penetration test findings through to remediation and sign-off
- Administered BeyondTrust PAM (Privileged Access Management), enforcing least-privilege principles and managing privileged session recording
- Delivered security awareness training and phishing simulation campaigns to reduce human risk across the institution
- Managed the full incident response lifecycle in line with NIST 800-61 and the MITRE ATT&CK Framework, from initial detection through containment, eradication and recovery

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed SIEM alert triage and investigation, escalating threats and tuning detection rules in CrowdStrike Falcon to reduce false positives and improve signal quality
- Managed Mimecast email security gateway policies including anti-spam, anti-phishing and URL protection configurations
- Supported Entra ID and Azure AD administration, MFA roll-out and SSO integration for university identity management
- Executed scheduled vulnerability scans using Tenable.io and Nessus; tracked remediation activities through to closure
- Maintained Check Point Harmony Firewall policies and supported IDS/IPS monitoring and tuning
- Managed MDM (Intune) and MAM policies for university mobile device and application management
- Contributed to the Cyber Essentials Plus certification process and supported ongoing compliance with NIST CSF and ISO 27001 controls

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed security tooling and infrastructure in a SaaS and FinTech environment, including endpoint protection, access management and vulnerability assessments
- Supported incident triage, firewall configuration and security event monitoring
- Maintained quality and compliance standards, contributing to audit readiness and policy documentation

KEY ACHIEVEMENTS

- Deployed and managed CrowdStrike Falcon EDR and Prevent for 8,000 users at UAL, significantly improving endpoint threat detection and response capabilities
- Built and tuned Microsoft Sentinel detection rules using KQL, reducing false positive rates and improving mean time to detect (MTTD) across the SOC (Security Operations Centre)
- Administered BeyondTrust PAM across the UAL enterprise, enforcing least-privilege access and reducing the privileged account attack surface
- Led the remediation of penetration test findings, working across infrastructure teams to close vulnerabilities within agreed SLAs (Service Level Agreements)
- Delivered Cyber Essentials Plus certification for UAL, strengthening the organisation's foundational security posture and demonstrating compliance to stakeholders
- Automated SOAR response playbooks for common alert types, reducing analyst response time and enabling consistent, repeatable incident handling

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security Plus (Security+)
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A Plus (A+)

- Google IT Support Professional Certificate
