

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM | Infrastructure Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience in enterprise security operations, specialising in endpoint detection and response (EDR), Security Information and Event Management (SIEM), infrastructure hardening, and threat detection and response across complex multi-site environments. At the University of the Arts London (UAL), I hold direct technical ownership of the CrowdStrike Falcon platform, Microsoft Defender for Endpoint (MDE), and the organisation's SIEM/Security Orchestration, Automation and Response (SOAR) capability, protecting an estate of 8,000 users. I bring hands-on expertise in Privileged Access Management (PAM), vulnerability management, email and web security gateways including Mimecast, and identity and access management using Entra ID and Azure Active Directory (Azure AD). I thrive within focused, high-impact security teams where I can take broad technical ownership, drive continuous improvement, and safeguard critical enterprise infrastructure. I hold the Certified Information Systems Security Professional (CISSP) certification.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft 365 Defender, Microsoft Defender for Identity (MDI)
- **SIEM / SOAR:** Microsoft Sentinel, CrowdStrike NG-SIEM, Kusto Query Language (KQL), SOAR automation, playbook development, detection rule engineering
- **Infrastructure Security:** Check Point Harmony firewall, enterprise firewall management, Imperva Web Application Firewall (WAF), intrusion detection and prevention (IDS/IPS), Microsoft Gateways
- **Email and Web Security:** Mimecast, anti-phishing and anti-spoofing policy management, Data Loss Prevention (DLP), URL protection
- **Identity and Access Management (IAM):** Entra ID, Azure AD, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Scripting and Automation:** PowerShell, SOAR playbook automation
- **Frameworks:** NIST 800-61, NIST Cybersecurity Framework (CSF), MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 to Present

Senior Cyber Security Analyst / Engineer

- Lead the engineering, deployment, and ongoing optimisation of the CrowdStrike Falcon platform across the enterprise environment, managing EDR, endpoint prevention policies, threat detection, and the NG-SIEM capability
- Manage and maintain the SIEM/SOAR platform, including data source onboarding, detection rule creation, alert triage, and automated response playbook development to reduce mean time to respond
- Oversee EDR/XDR alert response and proactive threat hunting using CrowdStrike Falcon Insight, Discover, and OverWatch intelligence to identify and contain advanced threats
- Administer Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across an 8,000-user estate, including conditional access, identity protection, and endpoint compliance configuration
- Manage email and web security gateway infrastructure using Mimecast, enforcing anti-phishing, anti-spoofing, URL protection, and Data Loss Prevention (DLP) policies to protect the organisation against

email-borne threats

- Maintain Entra ID (formerly Azure AD), Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Conditional Access policies to enforce zero-trust identity governance across cloud and on-premise environments
- Manage the BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege principles, controlling privileged account access, and maintaining session recording for audit compliance
- Lead vulnerability management using Tenable.io and Pentera Breach and Attack Simulation (BAS), conducting vulnerability scanning, risk prioritisation, and coordinating remediation across IT and infrastructure teams
- Remediate penetration test findings and coordinate with stakeholders to address identified security gaps, tracking remediation to completion against defined SLAs
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), ensuring endpoint compliance across iOS and Android mobile device estates
- Deliver security awareness training programmes to staff, raising the organisational security culture and reducing human-factor risk
- Administer Check Point Harmony endpoint security and enterprise firewall policies, maintaining intrusion detection and prevention (IDS/IPS) rules and access control lists

University of the Arts London (UAL)

March 2022 to March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed security monitoring and incident response using Microsoft Sentinel as the primary SIEM platform, leveraging Kusto Query Language (KQL) to build detection queries, investigate alerts, and conduct threat hunting across the estate
- Deployed and managed CrowdStrike Falcon EDR across the endpoint estate, configuring prevention policies, detection rules, and response actions to protect against malware and advanced persistent threats
- Conducted vulnerability assessments using Tenable.io and Nessus, producing risk-rated reports and working with IT teams to prioritise and track remediation
- Managed Azure Active Directory (Azure AD, now Entra ID), implementing Conditional Access policies and Multi-Factor Authentication (MFA) controls to enforce identity governance standards
- Administered Mimecast email security, tuning anti-phishing, anti-spam, and URL protection filters to reduce email-based attack surface
- Supported the deployment and configuration of BeyondTrust Privileged Access Management (PAM) controls to govern privileged account usage across the organisation
- Participated in incident response activities following the NIST 800-61 incident response framework, documenting investigation timelines, evidence, and lessons-learned reports
- Managed Microsoft Intune Mobile Device Management (MDM) policies, enforcing device compliance standards and managing mobile application deployment
- Contributed to the design and implementation of security policies aligned to ISO 27001, Cyber Essentials Plus, and NIST Cybersecurity Framework (CSF)
- Supported threat intelligence analysis using the MITRE ATT&CK framework to map adversary techniques to detection and response use cases

HICX Solutions Ltd (SaaS/FinTech)

February 2021 to March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed endpoint security tooling, maintained security policies, and ensured platform hardening across the SaaS product infrastructure
- Supported network security monitoring, access control configuration, and firewall rule management
- Contributed to the Quality Management System (QMS) and maintained documentation aligned to ISO security frameworks
- Assisted with IT infrastructure build, patching cycles, and vulnerability assessment activities to support a secure software delivery pipeline
- Supported identity and access management provisioning, ensuring appropriate role-based access controls were maintained across systems

KEY ACHIEVEMENTS

- Led the end-to-end deployment of Microsoft Defender for Endpoint (MDE) and Microsoft 365 Defender across an 8,000-user estate at UAL, delivering a unified endpoint detection and response capability and significantly improving threat visibility
- Engineered and optimised the CrowdStrike Falcon platform including NG-SIEM, Prevent, Insight, and Discover modules, reducing mean time to detect and mean time to respond to endpoint threats across the enterprise
- Developed and implemented automated SOAR playbooks that streamlined incident response workflows, reducing manual analyst effort and accelerating containment actions
- Successfully remediated multiple critical penetration test findings across infrastructure and web application layers, working cross-functionally to reduce the organisation's attack surface within defined SLA timeframes
- Established and maintained BeyondTrust Privileged Access Management (PAM) controls across sensitive systems, eliminating uncontrolled privileged access and providing full session audit trails for compliance reporting
- Reduced the organisation's vulnerability exposure through structured Tenable.io and Pentera Breach and Attack Simulation (BAS) programmes, enabling risk-based prioritisation and faster remediation cycles

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
