

PROSPER AWUNI

Senior Cyber Security Engineer | CISSP | Incident Response | Threat Monitoring | Vulnerability Management | Azure

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience in enterprise security operations, security architecture, incident response, threat monitoring, and vulnerability management. I have designed and implemented robust security controls across large, complex environments, combining deep technical expertise with a strong command of information security governance, risk management, and regulatory compliance. My experience spans Security Information and Event Management (SIEM), endpoint detection and response (EDR), Microsoft Azure cloud security, identity and access management, privileged access management (PAM), and security framework implementation across NIST CSF, ISO 27001, CIS Controls, and Cyber Essentials Plus. I bring a methodical, risk-based approach to protecting sensitive information assets and am equally at ease leading technical investigations and communicating complex security risks to executive and non-technical stakeholders. I am well suited to professional services environments where data sensitivity, regulatory compliance, and trust are paramount.

CORE SKILLS AND TECHNICAL STACK

- **Certifications:** Certified Information Systems Security Professional (CISSP), CompTIA Security+, Microsoft Certified Solutions Associate (MCSA)
- **Threat Monitoring and Detection:** Microsoft Sentinel, CrowdStrike Falcon NG-SIEM, KQL (Kusto Query Language), detection use case engineering, threat intelligence integration
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE)
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat containment, eradication, recovery, post-incident review and lessons learned
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus, risk-based remediation prioritisation
- **Security Architecture:** Zero Trust design, network segmentation, defence in depth, security control framework design and implementation
- **Microsoft Azure and Cloud Security:** Azure Active Directory / Microsoft Entra ID, Conditional Access, identity protection, Azure security controls, cloud governance
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory), MFA, SSO, Group Policy, Conditional Access policies
- **Privileged Access Management (PAM):** BeyondTrust PAM platform
- **Microsoft Security Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Endpoint and Infrastructure Security:** Microsoft Intune MDM/MAM, Tanium, Check Point Harmony firewall, Mimecast email security
- **Security Frameworks and Compliance:** NIST CSF, ISO 27001, CIS Controls, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell, Security Orchestration, Automation and Response (SOAR) playbook development
- **Windows Server Infrastructure:** Active Directory, Group Policy, Windows Server administration and hardening

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer March 2025 - Present

- Lead threat monitoring and security operations across an 8,000-user estate, overseeing SIEM and EDR platforms including Microsoft Sentinel and CrowdStrike Falcon, engineering custom KQL detection rules

aligned to MITRE ATT&CK, and performing continuous threat hunting to detect advanced adversary techniques.

- Lead incident response activities under the NIST 800-61 framework, acting as the primary responder for confirmed security incidents, conducting root-cause analysis, driving containment and eradication, and producing detailed post-incident reports with recommendations for control improvement.
- Lead the organisation's vulnerability management programme, using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS) to identify, prioritise, and track the remediation of vulnerabilities across infrastructure, cloud, and application layers.
- Contribute to security architecture decisions across IT and digital transformation projects, embedding security controls and Zero Trust principles from design through to deployment and ensuring alignment with NIST CSF, ISO 27001, and Cyber Essentials Plus frameworks.
- Administer Microsoft Azure and Microsoft Entra ID (formerly Azure Active Directory), including Conditional Access policies, identity protection, MFA, and SSO, enforcing robust access controls across cloud and hybrid environments.
- Manage Microsoft Intune MDM and MAM policies, BeyondTrust PAM, and CrowdStrike Falcon EDR deployment, maintaining a layered security posture across endpoints and privileged access pathways.
- Oversee email and web security gateway management using Mimecast, investigating and remediating email-borne threats and maintaining anti-phishing, anti-spoofing, and data loss prevention configurations.
- Manage firewall and perimeter security controls using Check Point Harmony, maintaining IDS/IPS rulesets and monitoring network traffic for indicators of compromise.
- Produce security risk reports, metrics dashboards, and board-level summaries, translating complex technical findings into business risk language for senior stakeholders and governance committees.
- Design and deliver security awareness training and phishing simulation programmes across the organisation, improving compliance with security policies and reducing social engineering susceptibility.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and responded to security alerts from Microsoft Sentinel SIEM and CrowdStrike Falcon EDR, conducting structured threat investigations and escalating confirmed incidents for response.
- Supported incident response activities under NIST 800-61, assisting in containment, evidence gathering, and post-incident reporting for security events across the organisation.
- Administered Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access, MFA deployment, and identity protection across cloud and hybrid infrastructure environments running Microsoft Azure and Windows Server.
- Performed vulnerability assessments using Tenable.io and Nessus, producing risk-prioritised remediation reports and working with infrastructure teams to close identified vulnerabilities.
- Supported BeyondTrust PAM administration, managing privileged account onboarding, session recording, and credential vault governance.
- Contributed to the Cyber Essentials Plus certification programme, performing gap analysis, remediating control failures, and documenting security evidence across patching, access control, firewall management, and endpoint protection domains.
- Assisted in developing and enforcing security policies, procedures, and standards aligned to ISO 27001 and the NIST Cybersecurity Framework (CSF).
- Supported Microsoft Intune MDM rollout, configuring device compliance baselines and conditional access integration for remote and mobile endpoint security.
- Assisted with Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) administration across the 8,000-user estate, maintaining coverage and responding to Defender alerts.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed IT security and infrastructure across a SaaS and FinTech environment, implementing security controls aligned to ISO 27001 and industry best practice across Windows Server and cloud-hosted systems.
- Administered Active Directory, Group Policy, and user access controls, maintaining least-privilege access principles and supporting identity governance across corporate systems.

- Supported vulnerability identification and remediation, conducting internal assessments and working with development and infrastructure teams to mitigate identified risks.
- Contributed to quality assurance activities and security policy development, ensuring operational security standards were maintained across infrastructure and software delivery pipelines.
- Managed endpoint protection and system hardening, monitoring for security threats and maintaining baseline configurations across Windows server and endpoint environments.

KEY ACHIEVEMENTS

- Deployed and operationalised Microsoft Sentinel SIEM across an 8,000-user estate, engineering a library of custom KQL detection rules mapped to MITRE ATT&CK, significantly improving threat detection coverage across cloud and hybrid environments.
- Led the organisation to Cyber Essentials Plus certification, conducting gap assessments, remediating control failures, and establishing repeatable security hardening processes across endpoints, access management, patching, and network controls.
- Integrated Pentra Breach and Attack Simulation (BAS) alongside Tenable.io and AppCheck, enabling continuous validation of security controls and providing risk-based, actionable vulnerability prioritisation for remediation teams.
- Led CrowdStrike Falcon EDR deployment across 8,000 endpoints, achieving full visibility into endpoint activity and reducing mean time to detect (MTTD) threats through continuous threat hunting and alert tuning.
- Developed automated SOAR playbooks that accelerated incident response workflows, reducing manual handling time for repetitive alert categories and freeing the security team to focus on complex threat investigation.
- Produced executive-level security risk reports and metrics that supported informed governance decision-making and demonstrated measurable improvement in the organisation's security maturity over time.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
