

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | Endpoint and Cloud Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience in enterprise security operations, specialising in endpoint detection and response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), and advanced threat management. I am a Certified Information Systems Security Professional (CISSP) with a strong record of deploying and managing CrowdStrike Falcon across large-scale environments, overseeing email and web security gateway operations including Mimecast, administering multi-factor authentication (MFA) and single sign-on (SSO) via Microsoft Entra ID (formerly Azure Active Directory), and managing mobile device management (MDM) and mobile application management (MAM) programmes through Microsoft Intune. I have led vulnerability management programmes, managed BeyondTrust Privileged Access Management (PAM) platforms, and coordinated incident response activities grounded in NIST 800-61 and MITRE ATT&CK. I thrive in focused, hands-on security teams where I can take direct ownership of security tooling, alert triage, threat hunting, and continuous improvement of the security posture.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Falcon Insight, Falcon Discover, CrowdStrike NG-SIEM - Expert level
- **SIEM and SOAR:** Microsoft Sentinel, CrowdStrike NG-SIEM, KQL (Kusto Query Language), detection use case engineering, alert triage, automated playbook development
- **Email and Web Security Gateways:** Mimecast (email threat investigation, anti-phishing, anti-spoofing, quarantine management), web content filtering
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Group Policy, MFA, SSO
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune, BYOD security, device compliance baselines, application protection policies
- **Privileged Access Management (PAM):** BeyondTrust PAM platform, least-privilege enforcement, privileged session management
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus
- **Microsoft Security Stack:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Incident Response:** NIST 800-61, MITRE ATT&CK, containment, eradication, recovery, post-incident review
- **Firewall and Perimeter Security:** Check Point Harmony, IDS/IPS management, network traffic analysis, WAF/DDoS concepts
- **Scripting and Automation:** PowerShell, SOAR automation, detection playbook engineering
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Additional Tools:** Tanium endpoint management, Microsoft Intune/MDM/MAM, Splunk/SPL (moderate)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead deployment, configuration, and ongoing management of CrowdStrike Falcon EDR (Prevent, Insight, Discover) across an 8,000-user estate, performing continuous alert triage, threat hunting, and endpoint telemetry analysis to detect, contain, and remediate advanced threats.
- Manage and optimise the SIEM and SOAR platform, engineering custom detection use cases using KQL, tuning alert thresholds to minimise false positives, and developing automated playbooks that reduce mean

time to detect and respond across the security operations function.

- Oversee email and web security gateway operations using Mimecast, investigating and remediating email-borne threats, configuring anti-phishing and anti-spoofing policies, and managing allow/block lists to protect the organisation from business email compromise and malware delivery.
- Administer Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, Group Policy, MFA, and SSO, enforcing Zero Trust identity controls across cloud and on-premises environments for an 8,000-user base.
- Manage Microsoft Intune MDM and MAM policies, enforcing device compliance baselines, configuring application protection policies for BYOD scenarios, and restricting corporate data access on non-compliant endpoints.
- Administer BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege access for privileged and service accounts, auditing privileged sessions, and reducing standing privilege exposure across the IT estate.
- Lead the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising remediation based on exploitability and business risk, and providing executive-level risk metrics and reporting.
- Manage IDS/IPS and firewall policies using Check Point Harmony, monitoring perimeter traffic, responding to network-based indicators of compromise, and maintaining network security controls.
- Lead and coordinate incident response activities under the NIST 800-61 framework, carrying out root-cause analysis, driving containment and eradication, and producing post-incident reports with remediation recommendations.
- Design and deliver security awareness training programmes and phishing simulation campaigns, improving staff vigilance and measurably reducing susceptibility to social engineering across the organisation.
- Provide security advisory input to IT and digital projects, ensuring security requirements and controls are embedded from design through to deployment.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and triaged security alerts across SIEM, EDR (CrowdStrike Falcon), and email security (Mimecast) platforms, investigating incidents and escalating confirmed threats through a structured incident response process.
- Supported deployment and administration of CrowdStrike Falcon EDR, onboarding endpoints, configuring detection and prevention policies, and contributing to custom detection rule development aligned to MITRE ATT&CK.
- Administered Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, MFA rollout, and identity protection, supporting a Zero Trust access model across cloud and hybrid resources.
- Performed regular vulnerability scans using Tenable.io and Nessus, collaborating with IT infrastructure teams to remediate identified vulnerabilities within agreed service level timelines.
- Supported BeyondTrust PAM administration, onboarding privileged accounts, maintaining session recording capabilities, and enforcing credential vault policies.
- Assisted in managing Mimecast email security, reviewing quarantine queues, releasing legitimate mail, and tuning anti-phishing policies to reduce user-reported phishing incidents.
- Contributed to the Cyber Essentials Plus certification process, conducting internal assessments and remediating control gaps across patching, access control, firewall management, and endpoint protection.
- Supported the Microsoft Intune MDM rollout, configuring compliance policies and conditional access integration to secure mobile and remote endpoints accessing corporate resources.
- Assisted with the deployment and management of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the organisation's 8,000-user estate.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed IT security and infrastructure across a SaaS and FinTech environment, implementing and maintaining security controls aligned to ISO 27001 and industry best practice.

- Administered endpoint protection tools, monitored for threats, and maintained system hardening baselines across Windows and cloud-based systems.
- Supported vulnerability identification and remediation, performing internal assessments and working with development and infrastructure teams to address identified security risks.
- Managed user identity and access controls, administering Active Directory and enforcing least-privilege access policies across corporate systems and applications.
- Contributed to quality assurance processes and security policy development, ensuring operational standards were met across infrastructure and software delivery.

KEY ACHIEVEMENTS

- Led CrowdStrike Falcon EDR deployment across an 8,000-user estate, achieving full endpoint visibility and substantially reducing mean time to detect (MTTD) endpoint-based threats through continuous tuning and threat hunting.
- Engineered a suite of automated SOAR playbooks that streamlined alert triage, initial containment, and evidence collection steps, reducing manual incident handling workload for high-volume alert categories.
- Built a library of custom KQL detection rules in Microsoft Sentinel aligned to MITRE ATT&CK tactics and techniques, improving threat detection coverage across cloud and hybrid environments.
- Drove the organisation to Cyber Essentials Plus certification, remediating control gaps and establishing repeatable security hardening processes across endpoints, network controls, access management, and patch management.
- Integrated Pentera Breach and Attack Simulation (BAS) into the vulnerability management programme, enabling continuous validation of security controls and risk-based prioritisation of remediation efforts.
- Improved phishing resilience across the organisation through targeted security awareness training and quarterly phishing simulation campaigns, achieving year-on-year improvement in staff reporting rates.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
