

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Entra ID | EDR/XDR |
Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience designing, implementing, and hardening enterprise cyber security infrastructure across large, multi-site organisations. I have deep expertise in CrowdStrike Falcon, covering endpoint detection and response (EDR), next-generation Security Information and Event Management (NG-SIEM), threat prevention, and threat hunting. I bring strong practical skills in Security Orchestration, Automation and Response (SOAR), Microsoft Defender (Endpoint, Identity, and Microsoft 365), and Microsoft Entra ID, including Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO). My experience spans enterprise vulnerability management using Tenable.io, Nessus, and breach and attack simulation (BAS) tooling, as well as email security gateway administration through Mimecast and endpoint management via Microsoft Intune. I am passionate about taking technical ownership of security platforms, driving continuous improvement, and enabling organisations to operate securely at scale within hybrid and cloud-first environments.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** CrowdStrike NG-SIEM, Microsoft Sentinel with KQL; SOAR playbook development and automation
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory), Conditional Access, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security:** Mimecast email security gateway; Menlo Security web filtering
- **Mobile Device Management (MDM/MAM):** Microsoft Intune; Endpoint policies and compliance
- **Firewall and Network Security:** Check Point Harmony; Cisco and next-generation firewall technologies
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentra BAS (Breach and Attack Simulation)
- **Incident Response:** NIST SP 800-61 Incident Response framework; MITRE ATT&CK framework; end-to-end investigation and containment
- **Scripting and Automation:** PowerShell; SOAR automation workflows; KQL query authoring
- **Compliance and Governance Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Microsoft Security Suite:** Microsoft Defender for Identity (MDI), Microsoft 365 Defender (M365); Tanium endpoint management

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Act as the primary technical owner for CrowdStrike Falcon across the full platform suite (EDR, NG-SIEM, Prevent, Insight, Discover), maintaining optimised configuration, threat prevention policies, and platform health for over 8,000 users.
- Design, implement, and continuously refine detection rules and SOAR automation playbooks within Microsoft Sentinel and CrowdStrike NG-SIEM, reducing mean time to detect (MTTD) and mean time to respond (MTTR) across the organisation.
- Administer Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, MFA enforcement, and SSO integrations, ensuring secure identity governance across hybrid cloud and on-premises environments.

- Oversee the email security gateway (Mimecast) and web security controls, reviewing threat intelligence and adjusting configurations in response to evolving phishing and Business Email Compromise (BEC) campaigns.
- Manage Microsoft Intune (MDM/MAM) endpoint compliance policies, enforcing device configuration baselines and restricting access to corporate resources from non-compliant endpoints.
- Lead vulnerability management cycles using Tenable.io and Pentra BAS, coordinating remediation with infrastructure and application teams, tracking closure rates, and reporting risk posture to senior leadership.
- Execute incident response activities end-to-end in accordance with NIST SP 800-61, performing containment, eradication, forensic triage, and post-incident review for security events escalated from the Security Operations Centre (SOC).
- Conduct proactive threat hunting using CrowdStrike Falcon Insight, KQL queries in Microsoft Sentinel, and MITRE ATT&CK technique mapping to identify adversarial activity before alerts are triggered.
- Administer BeyondTrust Privileged Access Management (PAM), managing privileged account controls, session recording, and least-privilege enforcement across critical administrative systems.
- Deliver security awareness training and produce executive-level reporting on cyber risk posture, supporting the organisation's alignment with CIS Controls and ISO 27001 requirements.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Led the enterprise-wide deployment and configuration of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user estate, covering onboarding, policy configuration, and integration with Microsoft Sentinel.
- Managed SIEM alert triage and investigation, developing KQL-based detection rules in Microsoft Sentinel aligned with the MITRE ATT&CK framework to improve signal-to-noise ratio and detection fidelity.
- Administered CrowdStrike Falcon Prevent and EDR policies, investigating endpoint detections, performing threat hunting using Falcon Insight, and coordinating incident response workflows with IT and infrastructure teams.
- Configured and maintained Check Point Harmony firewall rules and access control policies, reviewing logs for anomalous traffic and working with network teams to remediate identified risks.
- Managed Mimecast email security platform including anti-phishing, anti-spoofing, and attachment sandboxing policies, improving the organisation's email security posture.
- Conducted vulnerability assessments using Nessus and AppCheck, prioritising findings using Common Vulnerability Scoring System (CVSS) and business risk context, and driving remediation through structured tracking.
- Supported the implementation of Conditional Access and MFA policies in Azure Active Directory (now Microsoft Entra ID), reducing account compromise risk across the user population.
- Contributed to Cyber Essentials Plus certification activities and ISO 27001 compliance efforts, preparing evidence and supporting internal audit processes.
- Authored PowerShell scripts to automate routine security operations tasks, including account lifecycle management, log collection, and compliance reporting, reducing manual effort significantly.
- Managed Tanium endpoint management platform for real-time asset discovery, patch compliance reporting, and rapid threat hunting across the endpoint estate.

HICX Solutions Ltd (Software as a Service / FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Implemented and managed security controls across cloud-hosted infrastructure in a Software as a Service (SaaS) / FinTech environment, including identity and access management, endpoint protection, and network security policy enforcement.
- Monitored security alerts and events using SIEM tooling, triaging incidents and escalating findings in line with defined incident response procedures.
- Administered endpoint protection platforms and ensured security patching compliance across Windows and cloud workloads, reducing the organisation's attack surface.
- Supported information security governance activities, contributing to internal risk assessments and security policy development aligned with industry best practice.

- Collaborated with development and infrastructure teams to integrate security requirements into infrastructure provisioning and change management processes.

KEY ACHIEVEMENTS

- Delivered enterprise-wide Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) deployment across 8,000 users, significantly improving endpoint visibility and identity threat detection capability.
- Implemented CrowdStrike Falcon NG-SIEM and EDR across the UAL estate, taking full technical ownership of platform configuration, detection rule development, and threat hunting operations.
- Designed and deployed Microsoft Sentinel detection analytics using KQL, including custom watchlists and automation rules, reducing MTTD by materially improving alert fidelity and correlation.
- Led Pentera Breach and Attack Simulation (BAS) and Tenable.io vulnerability management programmes, driving measurable improvements in remediation closure rates and organisational risk posture.
- Automated security operations workflows using PowerShell and SOAR playbooks, reducing manual investigation and response times for high-frequency alert categories.
- Supported successful Cyber Essentials Plus certification and ISO 27001 compliance activities, providing technical evidence and assurance to internal and external auditors.
- Administered BeyondTrust PAM, strengthening privileged access controls across critical administrative accounts and reducing the risk of lateral movement following credential compromise.

EDUCATION

M.Sc. Environmental and Resource Engineering

B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
