

PROSPER AWUNI

Senior Cyber Security Analyst | Threat Hunting | SIEM/EDR/XDR | Incident Response | Detection Engineering | Azure Cloud

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Analyst with over five years of experience protecting enterprise-scale organisations against sophisticated cyber threats. I specialise in threat hunting, detection engineering, Security Information and Event Management (SIEM) operations, and end-to-end incident response within complex hybrid and cloud environments. My hands-on expertise spans CrowdStrike Falcon (including next-generation SIEM, Endpoint Detection and Response (EDR), and threat hunting via Insight), Microsoft Sentinel with KQL, and Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender. I have a strong track record of maturing Security Operations Centre (SOC) capabilities by designing detection analytics, building Security Orchestration, Automation and Response (SOAR) workflows, and driving continuous improvement of cyber operations programmes. I am equally comfortable leading incident response activities, shaping Data Loss Prevention (DLP) controls, and engaging with global stakeholders to align cyber operations with business risk. I am looking to bring this expertise to a forward-thinking international professional services organisation seeking to mature its cyber defence function.

CORE SKILLS AND TECHNICAL STACK

- **Threat Hunting and Detection Engineering:** CrowdStrike Falcon Insight; Microsoft Sentinel KQL analytics; MITRE ATT&CK technique mapping; hypothesis-driven threat hunting across endpoint, identity, and network data
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** CrowdStrike NG-SIEM; Microsoft Sentinel; SOAR playbook development and automation; alert triage and enrichment workflows
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, Discover); Microsoft Defender for Endpoint (MDE); CrowdStrike NG-SIEM
- **Incident Response:** NIST SP 800-61 framework; MITRE ATT&CK; containment, eradication, forensic triage, and post-incident review; SOC escalation management
- **Identity and Cloud Security:** Microsoft Entra ID (Azure Active Directory); Conditional Access; Multi-Factor Authentication (MFA); Single Sign-On (SSO); Microsoft Defender for Identity (MDI)
- **Data Loss Prevention (DLP) and Email Security:** Microsoft Purview DLP; Mimecast; anti-phishing and Business Email Compromise (BEC) defence
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Privileged Access Management (PAM):** BeyondTrust PAM; least-privilege enforcement; session recording
- **Scripting and Automation:** PowerShell; KQL; SOAR workflow automation
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead proactive threat hunting operations across endpoint, identity, and network telemetry using CrowdStrike Falcon Insight and Microsoft Sentinel KQL, applying MITRE ATT&CK technique-based hypotheses to identify adversarial activity before automated alerts trigger.
- Own the design and continuous refinement of detection analytics within Microsoft Sentinel and CrowdStrike NG-SIEM, authoring custom KQL detection rules, correlation queries, and threat intelligence watchlists to improve signal fidelity and reduce false positive rates.

- Lead and co-ordinate incident response activities end-to-end in line with NIST SP 800-61, performing containment, eradication, forensic triage, root cause analysis, and post-incident review for security events across the UAL estate.
- Manage and optimise Security Orchestration, Automation and Response (SOAR) playbooks within Microsoft Sentinel, automating enrichment, alert triage, and response actions for high-frequency incident categories, significantly reducing mean time to respond (MTTR).
- Administer the CrowdStrike Falcon suite (EDR, Prevent, NG-SIEM, Insight, Discover) across an 8,000-user estate, maintaining platform health, policy configuration, and detection coverage aligned to evolving threat landscapes.
- Monitor and investigate security alerts and incidents from SIEM, EDR/XDR, and email security platforms, escalating appropriately and co-ordinating remediation with infrastructure, identity, and end-user teams.
- Oversee Data Loss Prevention (DLP) controls, reviewing policies for data exfiltration risk and adjusting rules to balance security effectiveness with operational impact.
- Administer Microsoft Entra ID (Azure Active Directory) Conditional Access, MFA, and SSO policies, ensuring secure and frictionless access management across hybrid cloud environments.
- Manage vulnerability management operations using Tenable.io and Pentera BAS, working with asset owners to prioritise and close findings based on exploitability and business impact.
- Produce threat intelligence reports and executive-level risk briefings, communicating complex cyber threats and security posture in clear business terms to senior stakeholders.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and configured Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user enterprise estate, establishing detection baselines and integration with Microsoft Sentinel for centralised SIEM correlation.
- Developed and maintained KQL-based detection rules in Microsoft Sentinel, reducing mean time to detect (MTTD) and improving detection coverage aligned with the MITRE ATT&CK framework across initial access, lateral movement, and exfiltration tactics.
- Administered CrowdStrike Falcon Prevent and EDR policies, investigating endpoint detections and conducting threat hunting using Falcon Insight to identify threats not captured by automated alerting.
- Triageed, investigated, and responded to security alerts from SIEM, EDR, and email security platforms, performing structured analysis in line with defined runbooks and escalation procedures.
- Managed Mimecast email security gateway, configuring anti-phishing, anti-spoofing, URL rewriting, and attachment sandboxing policies to mitigate email-borne threats at scale.
- Conducted vulnerability assessments using Nessus and AppCheck, applying Common Vulnerability Scoring System (CVSS)-based prioritisation and co-ordinating remediation activities with infrastructure and application teams.
- Implemented Conditional Access and MFA policies within Azure Active Directory (now Microsoft Entra ID) to enforce identity-centric security controls and reduce credential compromise risk.
- Authored PowerShell scripts to automate repetitive security operations tasks including account hygiene, log collection, and compliance reporting, improving team efficiency and reducing manual error.
- Managed Tanium endpoint platform for real-time asset discovery, patch compliance visibility, and targeted threat hunting across the endpoint estate.
- Contributed to Cyber Essentials Plus certification and ISO 27001 compliance activities, preparing technical evidence and supporting internal and external audit engagements.

HICX Solutions Ltd (Software as a Service / FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Monitored and triaged security events and alerts using SIEM tooling within a cloud-first SaaS and FinTech environment, applying incident response procedures and escalating confirmed incidents in a timely and structured manner.
- Managed endpoint protection and security patching compliance across Windows servers and workstations, reducing the attack surface and maintaining audit-ready patch reporting.

- Implemented and enforced identity and access management controls, supporting the principle of least privilege across cloud-hosted and on-premises systems.
- Contributed to internal risk assessments, security policy development, and governance activities aligned with information security best practice standards.
- Collaborated cross-functionally with software engineering and infrastructure teams to embed security requirements within the system development lifecycle and change management processes.

KEY ACHIEVEMENTS

- Led enterprise-wide deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, transforming endpoint and identity threat visibility at UAL.
- Built a mature threat hunting programme using CrowdStrike Falcon Insight and Microsoft Sentinel KQL, enabling proactive identification of advanced threats beyond automated alert coverage.
- Designed and implemented custom Microsoft Sentinel detection analytics aligned to MITRE ATT&CK, materially improving mean time to detect (MTTD) and reducing alert fatigue through high-fidelity correlation rules.
- Developed SOAR automation playbooks to automate alert triage, enrichment, and response actions, significantly reducing mean time to respond (MTTR) for common incident categories.
- Managed Pentra Breach and Attack Simulation (BAS) and Tenable.io vulnerability management programmes, driving measurable improvements in remediation closure rates and risk posture reporting.
- Administered BeyondTrust Privileged Access Management (PAM), strengthening least-privilege controls and session recording across high-risk administrative accounts.
- Supported successful Cyber Essentials Plus certification and ISO 27001 compliance engagements, producing technical evidence packs and supporting auditor interactions.

EDUCATION

M.Sc. Environmental and Resource Engineering

B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
