PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | CrowdStrike | Hybrid, London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience protecting enterprise environments through hands-on Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR), and incident response. I have deep expertise with CrowdStrike Falcon across its full suite of modules including Next-Generation SIEM (NG-SIEM), Prevent, Insight, and Discover, as well as Microsoft Sentinel with Kusto Query Language (KQL)-based detection engineering. In my current role at the University of the Arts, London (UAL), I manage security operations for a complex estate of over 8,000 users, overseeing SIEM/SOAR/EDR alert triage, vulnerability management, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) infrastructure, Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and Privileged Access Management (PAM) using BeyondTrust. I thrive in lean, high-impact security teams where I can take broad ownership of tooling, detection content, and operational response, and I am now seeking a permanent senior engineering position in a hybrid London-based environment where I can apply this breadth of technical skill.

CORE SKILLS AND TECHNICAL STACK

- **SIEM/SOAR/EDR:** CrowdStrike Falcon NG-SIEM, EDR, Prevent, Insight, Discover; Microsoft Sentinel with KQL; alert triage and automated playbook development; detection content engineering
- **Endpoint Security:** CrowdStrike Falcon EDR; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft Defender XDR
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)); Conditional Access; MFA / SSO; Group Policy; BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security:** Mimecast email security gateway; web security filtering; anti-phishing and anti-spam policies
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; vulnerability remediation tracking and reporting
- **Firewall and Network Security:** Check Point Harmony firewall; Intrusion Detection and Prevention System (IDS/IPS); Web Application Firewall (WAF) management; Distributed Denial of Service (DDoS) mitigation
- **Device and Application Management:** Microsoft Intune; MDM / MAM policy management; Tanium endpoint management
- **Incident Response:** NIST SP 800-61 incident response framework; MITRE ATT&CK threat-informed detection; full-lifecycle incident handling; post-incident review
- **Scripting and Automation:** PowerShell scripting; SOAR playbook automation; KQL queries
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF); Center for Internet Security (CIS) Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Certifications:** CISSP; CompTIA Security+; Microsoft Certified Solutions Associate (MCSA); CompTIA A+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)
Senior Cyber Security Engineer *March 2025 - Present*

- Lead SIEM/SOAR/EDR alert triage and incident response across UAL's enterprise estate of over 8,000 users, using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel with KQL-based detection rules aligned to MITRE ATT&CK tactics and techniques
- Manage and tune CrowdStrike Falcon EDR policies (Prevent, Insight, Discover) to reduce false positives, improve threat visibility, and accelerate mean time to detect and respond

- Develop and maintain SOAR automation playbooks to streamline alert enrichment, threat containment, and post-incident remediation workflows, reducing manual analyst effort by over 40%
- Oversee MFA and SSO configuration and enforcement via Microsoft Entra ID and Conditional Access, ensuring role-based access control (RBAC) and least-privilege principles across the organisation
- Administer BeyondTrust Privileged Access Management (PAM) solution, governing privileged account lifecycle, session recording, and just-in-time access provisioning
- Manage Mimecast email security gateway including anti-phishing policies, safe URLs, impersonation protection, and email archiving
- Deliver vulnerability management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), prioritising remediation based on business risk and exploitability
- Administer Microsoft Intune MDM / MAM policy framework across managed and Bring Your Own Device (BYOD) endpoints, supporting compliance enforcement and conditional access integration
- Configure and manage Check Point Harmony firewall policies including WAF rules, IDS/IPS tuning, and DDoS mitigation configurations
- Conduct proactive threat hunting using CrowdStrike Falcon Insight and KQL queries in Microsoft Sentinel, identifying indicators of compromise (IOC) and anomalous user behaviour
- Maintain incident response procedures in line with NIST SP 800-61 and report findings to the Chief Information Security Officer (CISO) and senior leadership

University of the Arts, London (UAL)
Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Performed daily SIEM alert triage and investigation using CrowdStrike Falcon and Microsoft Sentinel, handling phishing, malware, credential abuse, and insider threat alerts
- Supported migration and deployment of CrowdStrike Falcon EDR across the 8,000-user estate, developing sensor deployment procedures, exclusion policies, and on-boarding documentation
- Wrote and tuned KQL detection rules in Microsoft Sentinel, reducing alert noise by mapping detections to MITRE ATT&CK framework and retiring low-fidelity legacy rules
- Conducted vulnerability scans using Tenable.io and Nessus, producing risk-rated remediation reports for IT infrastructure and application teams
- Managed identity lifecycle processes in Microsoft Entra ID (Azure AD) including user provisioning, Conditional Access policy updates, MFA enrolment, and privileged role reviews
- Supported BeyondTrust PAM administration including onboarding of privileged accounts, session monitoring, and access request approvals
- Administered Mimecast mail security policies, responded to email-borne threats, and conducted targeted security awareness campaigns
- Collaborated with IT infrastructure teams to integrate security controls into Microsoft 365, Azure, Intune MDM / MAM, and on-premises Active Directory environments
- Contributed to security incident response exercises and tabletop scenarios aligned to NIST SP 800-61 and the MITRE ATT&CK framework

HICX Solutions Ltd (SaaS / FinTech)
IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Implemented and maintained endpoint security controls, firewall policies, and patch management processes across a cloud-first SaaS environment
- Configured and managed MFA and SSO solutions to enforce identity security controls across corporate and cloud applications
- Conducted internal security assessments and supported external penetration testing activities, tracking findings through to remediation
- Administered IT infrastructure including servers, network devices, and cloud services, applying security hardening standards based on CIS Controls
- Managed MDM policies for mobile and remote devices, ensuring secure access to corporate applications in line with company security policy

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment of CrowdStrike Falcon EDR across 8,000+ endpoints at UAL, achieving full coverage and reducing mean time to detect (MTTD) through optimised policy configuration and detection content tuning
- Built a SOAR automation framework using Microsoft Sentinel and Power Automate that reduced manual alert handling time by over 40%, enabling the security team to focus on high-fidelity threats
- Delivered a comprehensive vulnerability management programme using Tenable.io and Pentera BAS, resulting in a measurable reduction in critical vulnerabilities across UAL's estate
- Implemented BeyondTrust PAM for privileged account governance, significantly reducing the attack surface from uncontrolled administrative access
- Achieved and maintained Cyber Essentials Plus certification for UAL through structured control implementation and internal security assurance reviews
- Designed and delivered targeted security awareness training programme reducing phishing click-through rate across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
