

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience protecting complex enterprise environments through hands-on security engineering and continuous operational improvement. I have deep expertise managing CrowdStrike Falcon for Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), and Security Orchestration, Automation and Response (SOAR) platforms, and I have administered a broad enterprise security toolchain spanning email and web security gateways, identity and access management, Privileged Access Management (PAM), Mobile Device Management (MDM), and vulnerability management across an 8,000-user organisation. I am experienced in remediating penetration test findings, delivering security awareness training, and managing security certificates and firewall policies. I combine strong technical depth with clear communication of risk and security posture to both technical and non-technical stakeholders.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert
- **SIEM and SOAR:** Microsoft Sentinel (KQL), playbook development, automated alert triage and incident response workflows
- **Email and Web Security Gateways:** Mimecast (email security, URL protection, impersonation defence)
- **Identity and Access Management (IAM):** Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Endpoint and Server Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium
- **Firewall and Network Security:** Check Point Harmony; policy management, IDS/IPS oversight
- **Scripting and Automation:** PowerShell
- **Incident Response Frameworks:** NIST SP 800-61, MITRE ATT&CK
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead management and optimisation of the CrowdStrike Falcon platform, including Endpoint Detection and Response (EDR), NG-SIEM, Prevent, Insight, and Discover modules, across an 8,000-user enterprise environment, delivering consistent endpoint protection and threat visibility
- Administer and optimise Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) capabilities in Microsoft Sentinel, developing KQL detection rules and automated playbooks to accelerate alert triage and incident response
- Manage email and web security gateways including Mimecast, protecting the organisation against phishing, business email compromise, malware delivery, and data exfiltration threats
- Administer Entra ID (Azure Active Directory), Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) integrations, maintaining strong identity security across the enterprise
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, enforcing device compliance policies and securing application access on managed and unmanaged devices

- Manage BeyondTrust Privileged Access Management (PAM) to control, monitor, and audit privileged account sessions, reducing the attack surface presented by standing privileged credentials
- Plan and execute vulnerability scans using Tenable.io, AppCheck, Nessus, and Pentera Breach and Attack Simulation (BAS), prioritising remediation by risk severity in collaboration with infrastructure teams
- Lead end-to-end incident response activities following the NIST SP 800-61 framework, including triage, containment, eradication, recovery, and structured lessons-learned reviews
- Manage and renew security certificates across organisational systems, ensuring encryption standards and trust chains remain current
- Remediate findings from external penetration tests, coordinating with technical owners to close vulnerabilities within agreed remediation timelines
- Deliver security awareness training and phishing simulation campaigns for staff, measurably improving the organisation's human-layer security posture
- Manage Intrusion Detection and Prevention Systems (IDS/IPS) alerting and tuning to reduce false positives while maintaining threat detection fidelity
- Administer Check Point Harmony firewall rules, reviewing and updating policies in response to infrastructure changes and threat intelligence
- Support security assurance activities aligned to ISO 27001, Cyber Essentials Plus, and CIS Controls frameworks

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed daily Security Information and Event Management (SIEM) alert triage in Microsoft Sentinel, investigating, prioritising, and escalating security events in line with incident response playbooks
- Supported the enterprise-wide deployment of CrowdStrike Falcon, contributing to endpoint protection policy development, exclusions management, and ongoing platform tuning
- Conducted vulnerability management activities using Tenable.io and Nessus, assisting with scanning schedules, risk-rated reporting, and remediation tracking with technical stakeholders
- Managed BeyondTrust Privileged Access Management (PAM) onboarding, configuring privileged account sessions and applying least-privilege principles to sensitive system access
- Administered Entra ID (Azure Active Directory) and supported the rollout of Conditional Access and Multi-Factor Authentication (MFA) policies to strengthen identity security
- Delivered security awareness training sessions and coordinated phishing simulation exercises for staff, tracking improvement in user susceptibility rates
- Administered Mimecast email security policies, investigating quarantined messages and adjusting filtering rules to balance protection with business continuity
- Produced security metrics reports and dashboards for the Head of Cyber Security, communicating risk posture and key performance indicators to senior stakeholders
- Supported Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) operations, contributing to threat investigation workflows

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Supported security operations across a Software as a Service (SaaS) and FinTech environment, including patch management, firewall policy review, and endpoint security configuration
- Administered identity and access management processes, enforcing least-privilege access principles and managing Joiner-Mover-Leaver (JML) workflows for system access
- Assisted with infrastructure quality assurance and security compliance activities, contributing to internal audit preparation and control assessments
- Monitored network security events and escalated potential incidents to senior engineers, supporting timely investigation and response

KEY ACHIEVEMENTS

- Led the full deployment and optimisation of CrowdStrike Falcon Endpoint Detection and Response (EDR) across 8,000 endpoints at UAL, establishing custom detection policies that delivered measurable improvements in mean time to detect (MTTD) for endpoint threats

- Engineered a suite of Microsoft Sentinel Security Orchestration, Automation and Response (SOAR) playbooks to automate phishing email triage, cutting analyst response time for email-borne threats and freeing capacity for higher-complexity investigations
- Spearheaded the university-wide deployment of Microsoft Defender for Identity (MDI) and Conditional Access policies, strengthening identity security for more than 8,000 users and significantly reducing the risk of credential-based attacks
- Delivered a structured Privileged Access Management (PAM) programme through BeyondTrust, eliminating standing privileged access for critical system administrators and replacing it with just-in-time session-based controls
- Drove a sustained reduction in critical and high-severity vulnerabilities through a risk-prioritised vulnerability management programme integrating Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
