

# PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Enterprise Security Operations

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

---

## PROFESSIONAL PROFILE

---

I am a Certified Information Systems Security Professional (CISSP) and Senior Cyber Security Engineer with over five years of experience designing, managing, and optimising enterprise security toolchains. I have specialist expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR) and Security Information and Event Management (SIEM) operations, and I have a strong track record administering a broad security stack that includes email security gateways, firewall management, identity and access management, Privileged Access Management (PAM), and vulnerability management. In a regulated, multi-thousand user environment, I have consistently reduced organisational risk through structured incident response, proactive threat hunting, and disciplined vulnerability remediation. I work effectively in small, high-impact security teams where breadth of contribution and strong stakeholder communication are essential.

## CORE SKILLS AND TECHNICAL STACK

---

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - Expert; hands-on deployment, tuning, and alert triage
- **SIEM and SOAR:** Microsoft Sentinel, KQL query development, automated playbook engineering and alert triage
- **Email and Web Security Gateways:** Mimecast - phishing defence, URL filtering, impersonation protection
- **Firewall and Network Security:** Check Point Harmony; rule management, policy review, IDS/IPS oversight
- **Identity and Access Management (IAM):** Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust - just-in-time access, session recording, privileged credential management
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Endpoint and Threat Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium
- **Scripting and Automation:** PowerShell
- **Incident Response:** NIST SP 800-61 framework, MITRE ATT&CK
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus

## PROFESSIONAL EXPERIENCE

---

**University of the Arts London (UAL) - Senior Cyber Security Analyst / Engineer** *March 2025 - Present*

- Manage and optimise CrowdStrike Falcon across an 8,000-user enterprise, including Endpoint Detection and Response (EDR), NG-SIEM, Prevent, Insight, and Discover modules, ensuring comprehensive endpoint protection and real-time threat visibility
- Administer and tune Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) in Microsoft Sentinel, building KQL-based detection rules and automated response playbooks that reduce alert triage workload and accelerate incident handling
- Manage Mimecast email and web security gateways, configuring policies to protect against phishing, malware, business email compromise, and data loss threats
- Administer Check Point Harmony firewall policies, reviewing rule bases and updating configurations in line with infrastructure changes and emerging threat intelligence
- Oversee Intrusion Detection and Prevention System (IDS/IPS) tuning, reducing false positives while maintaining effective network threat detection

- Manage Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) configurations, maintaining strong identity and access controls across the enterprise
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance and securing access on both managed and unmanaged devices
- Manage BeyondTrust Privileged Access Management (PAM) to control and audit privileged account sessions, minimising the risk of lateral movement via compromised privileged credentials
- Coordinate vulnerability scanning and remediation using Tenable.io, AppCheck, Nessus, and Pentera Breach and Attack Simulation (BAS), prioritising findings by exploitability and business impact
- Lead end-to-end incident response following NIST SP 800-61, covering triage, containment, eradication, recovery, and post-incident review
- Manage and renew security certificates and PKI configurations, maintaining encryption and trust standards across production systems
- Remediate external penetration test findings, coordinating cross-team remediation to close identified vulnerabilities within agreed timelines
- Deliver staff security awareness training programmes and phishing simulations, reducing end-user susceptibility to social engineering attacks

### **University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity**

*March 2022 - March 2025*

- Performed Security Information and Event Management (SIEM) alert triage and investigation in Microsoft Sentinel, following incident response playbooks to classify, escalate, and resolve security events
- Supported the enterprise-wide deployment of CrowdStrike Falcon EDR, contributing to policy design, exclusions management, and ongoing platform optimisation
- Conducted vulnerability scanning and risk-rated remediation tracking using Tenable.io and Nessus, working with infrastructure owners to close findings within agreed SLAs
- Managed BeyondTrust Privileged Access Management (PAM) onboarding and session configuration, enforcing least-privilege access for privileged accounts
- Administered Entra ID (Azure Active Directory) and supported the rollout of Conditional Access policies and Multi-Factor Authentication (MFA) across the organisation
- Managed Mimecast email security policies, investigating quarantined messages and tuning filtering rules to balance security with business continuity
- Delivered security awareness training sessions and ran phishing simulation exercises, tracking and reporting improvement in user susceptibility over time
- Produced security metrics dashboards and reports for senior stakeholders, summarising risk posture and key operational performance indicators

### **HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure**

*February 2021 - March 2022*

- Supported security operations across a Software as a Service (SaaS) and FinTech environment including patch management, endpoint security, firewall policy review, and access management
- Managed identity and access management processes including Joiner-Mover-Leaver (JML) workflows, enforcing least-privilege access across corporate systems
- Contributed to infrastructure quality assurance and compliance activities, supporting internal audit preparation and security control assessments
- Monitored network and endpoint security events, escalating potential incidents and assisting with initial triage and investigation

### **KEY ACHIEVEMENTS**

---

- Delivered the full deployment and operational optimisation of CrowdStrike Falcon Endpoint Detection and Response (EDR) across 8,000 endpoints, establishing custom detection policies that improved mean time to detect (MTTD) for endpoint-borne threats
- Built and deployed a Microsoft Sentinel Security Orchestration, Automation and Response (SOAR) playbook library that automated phishing email triage, reducing analyst handling time and freeing capacity for complex threat investigations

- Led the implementation of Microsoft Defender for Identity (MDI) and Conditional Access across a complex multi-site environment, strengthening the identity security posture for more than 8,000 users
- Deployed BeyondTrust Privileged Access Management (PAM) to replace standing privileged access with just-in-time, session-based controls for critical system administrators
- Achieved sustained reduction in critical and high-severity vulnerabilities through a risk-prioritised programme integrating Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus findings with structured remediation tracking

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
-
