

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience protecting enterprise infrastructure across cloud and on-premises environments. I have deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) platforms, firewall management, Multi-Factor Authentication (MFA) / Single Sign-On (SSO), and Mobile Device Management / Mobile Application Management (MDM/MAM). I have led end-to-end incident response programmes aligned to industry frameworks and have extensive experience managing vulnerability scanning, endpoint protection, and identity governance within regulated environments. I am looking for a permanent hybrid role where I can continue to protect and evolve a security infrastructure at pace.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation Security Information and Event Management (NG-SIEM)), Microsoft Defender for Endpoint (MDE)
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel (Kusto Query Language (KQL)), SOAR automation and playbook development
- **Firewall and Network Security:** Check Point Harmony, Web Application Firewall (WAF) / Distributed Denial of Service (DDoS) protection concepts
- **Email and Endpoint Security:** Mimecast email security, Tanium, Microsoft Intune / MDM / MAM
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Incident Response:** NIST SP 800-61 framework, MITRE ATT&CK framework, end-to-end triage and forensic investigation
- **Scripting and Automation:** PowerShell, SOAR playbook automation
- **Compliance Frameworks:** ISO 27001, NIST Cybersecurity Framework (CSF), CIS Controls, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead the university's security engineering function, owning the configuration, tuning, and optimisation of the CrowdStrike Falcon EDR platform across an 8,000-user environment, driving significant improvements in threat visibility and response time.
- Manage and maintain the SIEM/SOAR platform, authoring detection rules, alert correlation logic, and automated response playbooks that reduce mean time to respond (MTTR) for security incidents.
- Lead end-to-end incident response engagements aligned to the National Institute of Standards and Technology (NIST) SP 800-61 framework, from initial triage through to root cause analysis and post-incident reporting.
- Oversee the Mimecast email security gateway, including policy management, anti-phishing rules, and threat intelligence integration, protecting staff and students from email-borne threats.
- Administer identity and access management controls via Microsoft Entra ID (Azure Active Directory), Conditional Access policies, and Multi-Factor Authentication (MFA)/Single Sign-On (SSO) solutions to enforce Zero Trust access principles.

- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) policies via Microsoft Intune, securing thousands of university-issued and bring-your-own devices.
- Drive the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising remediation of critical vulnerabilities aligned to CIS Controls.
- Maintain and evolve the BeyondTrust Privileged Access Management (PAM) solution, controlling privileged credential usage and reducing the university's privileged attack surface.
- Conduct proactive threat hunting using CrowdStrike Falcon Insight and MITRE ATT&CK-aligned hypotheses, identifying and neutralising threats before alert escalation.
- Collaborate with IT and infrastructure teams to oversee WAF / DDoS protection controls and security gateway policies, maintaining resilient perimeter defences.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed daily SIEM alert triage and security event investigation, escalating and managing incidents in line with the university's incident response procedures and NIST SP 800-61 guidelines.
- Deployed and managed the CrowdStrike Falcon EDR platform across the full estate, including policy configuration, host group management, and sensor health monitoring.
- Administered Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and the Microsoft 365 Defender suite, protecting email, endpoints, and identities at scale.
- Managed Mimecast email security configuration and handled security incidents involving phishing, business email compromise, and malware delivery via email.
- Maintained Active Directory (AD), Azure Active Directory (Azure AD/Entra ID), and identity governance controls, including MFA enrolment, Conditional Access policy reviews, and access lifecycle management.
- Supported MDM/MAM compliance for the Intune-managed device estate, enforcing security baselines and compliance policies across Windows, iOS, and Android platforms.
- Contributed to vulnerability scanning programmes using Nessus and Tenable.io, producing risk-ranked reports for senior stakeholders and tracking remediation progress.
- Developed PowerShell scripts to automate repetitive security operations tasks, improving team efficiency and consistency of response.
- Authored and maintained security policies and procedures aligned to ISO 27001, Cyber Essentials Plus, and the NIST Cybersecurity Framework (CSF).

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security and infrastructure engineering for a SaaS FinTech organisation, implementing and managing endpoint security, Single Sign-On (SSO), and Mobile Device Management (MDM) solutions.
- Configured and maintained identity and access controls, including Azure Active Directory (Azure AD) provisioning, MFA enforcement, and role-based access control (RBAC) policies.
- Managed endpoint security tooling and supported incident investigation, applying security best practices to protect a cloud-native application environment.
- Supported compliance activities including security audits, risk assessments, and gap analysis against ISO 27001 and Cyber Essentials Plus frameworks.

KEY ACHIEVEMENTS

- Led the CrowdStrike Falcon EDR deployment across an 8,000-user environment at UAL, achieving full endpoint visibility and materially reducing dwell time for threats.
- Designed and implemented a SOAR automation programme that automated triage for high-volume low-severity alerts, freeing analyst capacity for high-priority incident response.
- Achieved and maintained Cyber Essentials Plus certification for the organisation, demonstrating robust control of endpoint, identity, and network security.
- Reduced time to detect and respond to phishing campaigns by integrating Mimecast threat intelligence feeds directly into the SIEM platform.
- Developed a library of KQL-based detection rules in Microsoft Sentinel aligned to MITRE ATT&CK tactics and techniques, improving detection coverage across the estate.

- Successfully led multiple high-severity security incident responses, containing threats, preserving evidence, and producing executive-level post-incident reports.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
